5 Best Memecoin Supercycle Tokens to Buy in 2024

The “memecoin supercycle,” the largest [cryptocurrency](#) trend of 2024, is beginning to take shape. With profits that seem almost too good to be true, meme currencies are attracting the market’s attention as Bitcoin keeps soaring.

Consider the recent incident of a trader who, in less than a year, made \$3 million on a modest \$96 MAGA (TRUMP) investment. These kinds of stories may seem like fairy tales, but as we approach a possible supercycle, they are becoming more frequent.

This supercycle is evident everywhere. For example, Pepe Unchained (PEPU) has raised more than \$22 million in early fundraising before going public. This demonstrates how eager investors are to follow the next great meme coin fad.

The meme coin market of 2021 is no longer in existence. From being jokes, these coins have developed into important initiatives with practical applications. Given the explosive growth in cryptocurrency usage worldwide, the next supercycle has the potential to completely change the market and the way we see cryptocurrency investing.

[TRADE_PLUGIN]BTCUSDT,ETHUSDT[/TRADE_PLUGIN]

What is the Meme Coin Supercycle?

An ideal storm occurs during the memecoin supercycle when the coin's viral appeal, practical use, and market momentum all come together to propel its meteoric rise. The days of writing off the top meme currencies as hoaxes or scams are over. Something more substantial has now come to light.

Over the last three years, these coins have made tremendous strides. Building real Layer-2 solutions to tackle real problems is the goal of projects like Pepe Unchained. Some are venturing into PolitiFi territory, such as FreeDum Fighters. Now, creating valuable crypto ecosystems is more important than simply posting amusing memes.

The next meme coin season may be yet another watershed moment for meme coins, when they take centre stage and maybe even surpass all other cryptocurrencies in terms of performance. What sets this cycle apart, though, is the context and timing: a developing market, more robust communities, and meme coins that do more than just make jokes.

[TRADE_PLUGIN]BTCUSDT,ETHUSDT[/TRADE_PLUGIN]

Best Memecoin Supercycle Tokens

Here we take a look at the ten meme coins that are most likely to experience explosive growth during the highly anticipated supercycle. Nevertheless, we do not base our rankings just on hype. In order to identify the initiatives with the most potential for the future and those without, we have examined them thoroughly.

Utility, innovation, social emotion, community participation levels, development team activity, and social media momentum are key aspects in our review. In the nick of time before the supercycle began, we were able to determine which meme coins would be the most prudent long-term investments.

1. Pepe Unchained (PEPU)

We predict that Pepe Unchained (PEPU) will be the most valuable meme coin throughout the supercycle. Traders on Ethereum suffer from hefty fees and slow speeds, but Pepe Unchained is taking on this problem head-on, unlike most meme coins.

This initiative is significantly improving the meme coin market by creating a specialised Layer-2 solution, Pepe Chain. Traders will have access to a custom-built DEX and Pepe Chain speeds that are up to 100 times faster than Ethereum, according to the whitepaper.

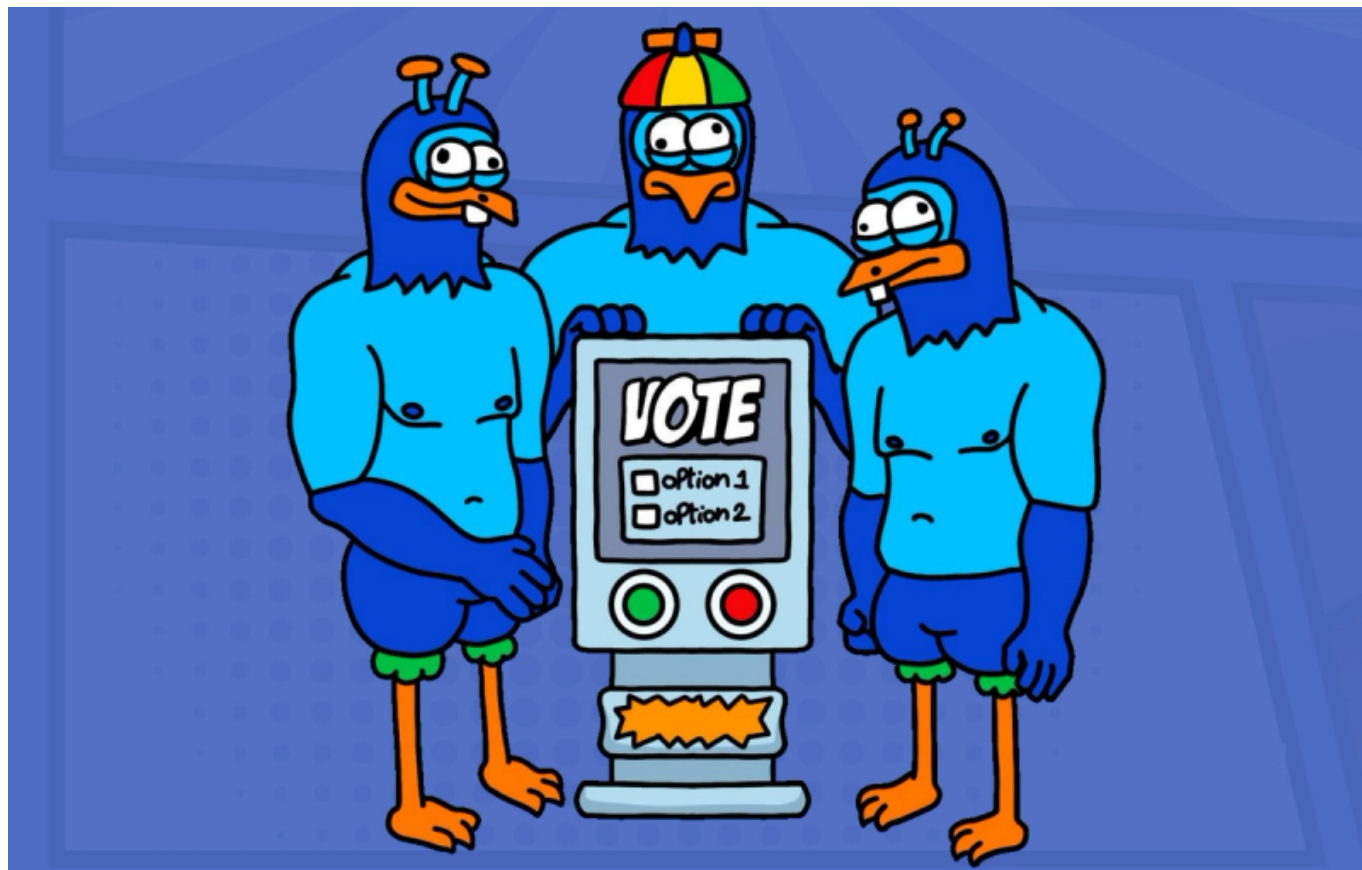

The data speaks for itself. The ambitious goal of Pepe Unchained has attracted substantial investment, with a presale of almost \$22 million. The tokenomics of the project are especially attractive, since early adopters will receive 40% of the total 8 billion tokens. It seems like the team is really concerned about the community.

You have a meme coin that is truly investing in its future when you consider the enormous staking rewards. That is why we think Pepe Unchained, a supercycle cryptocurrency, has the potential to revolutionise the meme coin industry.

[TRADE_PLUGIN]BTCUSDT,ETHUSDT[/TRADE_PLUGIN]

2. Flockerz (FLOCK)

Keep an eye on Flockerz (FLOCK) if you're looking for meme currencies that are about to burst in the supercycle. This initiative is giving its community members actual control over the project and a chance to earn actual money through its Flocktopia DAO.

The Vote-to-Earn model is the main innovation of Flockerz. Members of the community can earn additional FLOCK tokens and have a say in governance initiatives with this arrangement. It's the same as receiving compensation for actively contributing to the ecosystem.

Coinsult and SolidProof have already audited FLOCK, which adds to Flockerz's appeal. Plans for marketing initiatives and DEX listings are all part of their detailed strategy for the future.

Flockerz might be appealing to those seeking a cryptocurrency to stake. Also, while the project is still in its presale phase, you can purchase FLOCK tokens at a discounted price before they are available to the public.

3. FreeDum Fighters (DUM)

The release of FreeDum Fighters (DUM) could have been timed better than any other meme coin this year. It's more than simply capitalising on election fever; it's built a whole PolitiFi ecosystem around the power struggle between MAGATRON and Kamacop 9000.

There is substantial evidence supporting this strategy. According to a new analysis by CoinGecko, PolitiFi tokens did better than more conventional meme currencies from the beginning of the year until August. With a presale of nearly \$300,000, FreeDum Fighters appears to be well-positioned to take advantage of this trend.

The innovative method of staking is the main attraction of the project. Staking tokens allows users to

vote for a candidate of their choosing and earns rewards from the pool of assets held by the candidate running against them. On top of that, there will be arguments every week with bonus incentives.

With its focus on community involvement, FreeDum Fighters is at the forefront of a memecoin supercycle. Anyone with an interest in politics or the meme coin industry should keep an eye on this one.

[TRADE_PLUGIN]BTCUSDT,ETHUSDT[/TRADE_PLUGIN]

4. Crypto All Stars (STARS)

One such effort that addresses an actual issue with meme coins is Crypto All-Stars (STARS). What amounts to a central meeting place for meme coin traders, the team is constructing the “MemeVault”—a specialised staking platform.

Imagine a market where all your favourite meme currencies could be staked for prizes. Retail traders looking for passive income will find all they need at Crypto All-Stars, from the best Solana joke coins to the top Base chain utility tokens.

At the time of writing, Crypto All-Stars have raised over \$2.7 million during their presale. Staking STARS tokens during the presale allows early adopters to gain more money before the actual launch even happens.

You should check out Crypto All-Stars if you want to make the most of the memecoin supercycle. Investors can secure possible profits before the first DEX listing while STARS tokens are still available at a discount.

[TRADE_PLUGIN]BTCUSDT,ETHUSDT[/TRADE_PLUGIN]

5. Memebet Token (MEMEBET)

A casino that takes meme coins has finally been granted to the “degen” community. That casino is Memebet (MEMEBET), and it was made for regular people who want to invest.

You may find Memebet Casino on both the web and Telegram. There is no need for users to go through a tedious KYC process since they can access the casino through the Telegram app. The ability to gamble anonymously utilising meme coins such as PEPE and DOGE is another perk.

An integral part of this ecosystem is the native MEMEBET token. The Play-to-Earn incentives system uses it to give out more cryptocurrency to players who are active on the casino's platform. Not only will MEMEBET token holders get access to the upcoming treasure boxes feature, but they will also receive exclusive bonuses and challenges.

The MEMEBET token stands out from the rest because it is a GambleFi coin. This memecoin supercycle play has the potential to be successful because of its unique qualities that set it apart from other leading gaming cryptocurrencies.

Is Memecoin Supercycle Token a Good Investment?

Finding meme coins that will go boom during the next predicted supercycle is a game of high-stakes risk-reward. It is essential to know what you are getting into, even though early investors in DOGE and PEPE currencies witnessed profits that changed their lives.

The possible benefits of investing in meme coins are obvious:

- Potentially astonishing returns (a classic case in point is the “Dogecoin millionaire” tale)
- Fewer hurdles to entry than more conventional cryptocurrencies
- As new coins are introduced daily, there are several opportunities to benefit.
- The community’s strong momentum during market bulls

On the other hand, astute investors take a calculated approach to meme currencies. The trick is to seek out projects like Pepe Unchained’s Layer-2 network or Shiba Inu’s Shibarium chain, which manage to mix viral appeal with practical use.

The takeaway is that meme currencies can be a game-changer during a crypto market supercycle, but you shouldn’t put all your eggs in one basket. Never put more money into the market than you can afford to lose, and always be an informed investor.

How to Purchase Memecoin Supercycle Tokens?

More and more people are eager to invest in meme currencies as they get popular exposure in the lead-up to the supercycle. The Pepe Unchained presale is one of the most talked-about events of the year, so let’s use it to illustrate how to purchase these coins:

Step 1 - Establish Your Wallet

Install an Ethereum wallet, such as MetaMask, on your device. Keep your seed phrase somewhere safe; you'll need it as a backup in case anything happens.

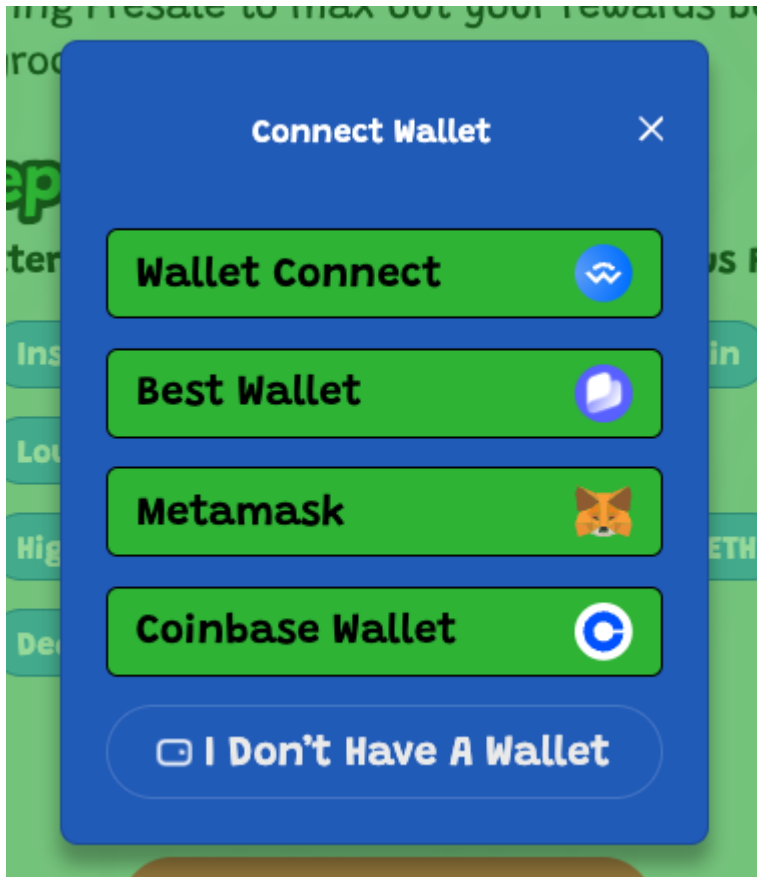

Step 2 - Acquire Some Ethereum or Tether

Purchase USDT or Ethereum on a cryptocurrency exchange such as Binance or Coinbase. Put the tokens you bought into your wallet, then set aside some additional money to cover gas costs.

Investors can also use Binance Coin (BNB) or a bank card to purchase Pepe Unchained tokens (PEPU) during the presale.

Step 3- Connect to the Presale

Click "Connect Wallet" on Pepe Unchained's website. The cryptocurrency market is rife with imitators, so be sure you're on the right site.

Step 4 - Buy Your PEPU

No minimum investment required; just enter the number of PEPU tokens you wish to purchase. Verify the transaction with your wallet provider after you've checked everything twice.

Step 5 - Stake Tokens

Once the presale wraps up, you'll be able to claim your PEPU tokens. But you can stake them immediately. You can increase your PEPU earnings in this way prior to the official DEX launch.

FAQs

Which supercycle memecoin has the potential to hit \$1?

Pepe Unchained is a candidate for this milestone, even if reaching \$1 is a significant accomplishment for meme coins. Because of its true utility and 8 billion token maximum, it is well-positioned to reach that goal in the event that a memecoin supercycle starts.

In 2025, which meme supercycle coin is going to blow up?

Since Pepe Unchained's Layer-2 technology attempts to address issues in meme coin trading, many are keeping a close eye on the company for 2025. Early investors think PEPU is positioned for long-term growth because features like a block explorer and a customised DEX are also in the works.

What is the crypto equivalent of a memecoin supercycle theory?

In the cryptocurrency space, a supercycle is a prolonged phase of expansion that lasts longer than a normal bull market, usually 12 to 18 months. For meme currencies, it signifies a prolonged upswing in which the tokens experience unprecedented price increases and widespread popularity.

Which supercycle token is the most promising memecoin?

One of the most promising memecoin supercycle tokens is Pepe Unchained. Its innovative Layer-2 system promises quicker transactions and reduced fees for traders, and it has garnered more than \$22 million in presale fundraising.

Where to Trade Crypto Futures?

You can trade crypto futures on BTCC Now. Over 300 USDT-margined perpetual trading pairs are available for users to trade, including many popular altcoins and meme-coins.
