What is Axie Infinity?

At its core, Axie Infinity is a metaverse gaming project filled with fascinating creatures known as Axies that players can collect as pets. Ultimately, players aim to battle, breed, collect, raise, and build kingdoms for their Axies. The game is built by Sky Mavis on Ethereum's Ronin side-chain.

Profiting from buying, battling, and breeding is at the center of this project as it paves a path for earning opportunities while gaming.

Axie Infinity is a Pokemon-inspired play-to-earn metaverse game that is powered by the Ethereum blockchain. Axie's metaverse, also known as Lunacia is made up of over 90,000 land plots. The Axies use this Land as their home while the users can freely exchange these Land plots, which are represented as NonFungible tokens (NFTs).

The project seeks to build a cohesive ecosystem of an immersive gaming experience based on player-owned economies. This feature puts Axie Infinity in a superior position from other metaverse-based games.

Axie Infinity Shards (AXS) are ERC-20 governance tokens for the Axie Universe. In essence, AXS holders will be able to claim rewards if they stake their tokens, play the game, and participate in key governance votes. Thus, AXS's primary use cases lie in Governance, Staking, and Payments. The success of Axie Infinity in 2021 is largely due to its swift scaling via the Ronin chain that was designed specifically for AXS.

Additionally, to breed Axies, users would require Smooth Love Potion (SLP), which are the in-game token rewards. Players can earn SLP tokens during the gameplay and trade them for money at an exchange.

At the time of writing, primary revenue sources for Axie Infinity include:

- Breeding fees for breeding Axies.
- A 4.25% Axie Marketplace fee from sales of Axie NFT assets: Axies, land, and land items.

Going forward, Axie Infinity plans to run a 'Game-as-a-Service' model while introducing a variety of features in the coming times. The potential revenue streams for the project include earning fees on in-game consumables. Also, as per the project's claims, it can charge fees when players want to level up their game characters, play in tournaments, and craft new assets.

However, it becomes vital to take note of the corresponding impact on the increased costs for the users. The efficacy of these developments alongside the competitor's moves could influence AXS's trajectory in the future.

One other thing to point out is that the Axie Infinity game's blockchain, Ronin (RON), fell victim to the largest crypto hack in history in April 2022, when hackers took control of the network and transferred more than \$600m worth of crypto into a wallet.

Axie Infinity Price History

Now let's take a quick look at the Axie Infinity price history. While past performance should never be taken as an indicator of future results, knowing what the crypto has done in the past can give us some much-needed context when it comes to either interpreting an axie infinity price prediction or making one of our own.

When AXS first came onto the open market in November 2020, it was worth about \$0.18. After that, it got caught up in the crypto boom of early 2021 and reached a periodic high of \$10.85 on 28 April

that year. There was then a dip as the market slumped over the summer, but the news that bitcoin (BTC) had reached record levels later on in the year, coupled with a growing interest in play-to-earn, the Metaverse and NFTs, saw it reach an all-time high of \$165.37 on November 06, 2021. That high could not be sustained and it closed the year at \$93.30.

While 2021 was a very positive year for Axie Infinity, 2022 was a year which saw disaster strike both the coin and the crypto sector as a whole. While AXS initially peaked at \$97.78 on 3 January, it was downhill to a low of \$42.11 as Russia invaded Ukraine on 24 February. There was something of a recovery to \$74.37 on 25 March, but it was back down from there, as the Ronin hack of Axie Infinity and the Terra Luna crash left it at a low of \$11.92 on 18 June 2022.

Although there was a small recovery after that, the collapse of the FTX (FTT) exchange sent the market into turmoil and AXS closed 2022 at a low of \$6.05, down more than 90% over the course of the year.

Current Axie Infinity Price

Though hit hard, Axie Infinity has been struggling to keep up its heightened NFT sales, users, and ultimately, its price.

AXS has been in a good upward trend recently, increasing by 7.3% in the past seven days and 9.4% in the past fortnight.

At the time of writing, AXS is trading at \$9.11 with a market capitalization of \$1,056,231,268, ranking #54 amongst all cryptocurrencies by that metric. In the past 24 hours, the price of Axie Infinity has risen 0.62% with a trading volume of \$67,996,032.

AXS Price Prediction Conclusion: Is Axie Infinity Still Profitable?

Axie Infinity is one of the most popular metaverse projects incorporating games, NFTs, and cryptocurrencies. It could be a potentially good investment for risk-tolerant investors who are looking for a metaverse-blockchain play.

Based on our AXS price prediction, it can be concluded that it is profitable to invest in Axie Infinity for the long term. By 2030, the average price of Axie Infinity is expected to be around \$69.83. Our Axie Infinity price forecast shows that the token is likely to have a slow growth rate, so it might take some time before you can see any good profits.

Our advise is to have a very small amount of AXS in your portfolio. If Metaverse becomes a reality and it gets adoption, we might see AXS coin skyrocket, and now that the price is down, it is a wise investment to make.

However, it is important to note that we are betting on the future of virtual reality and the metaverse still has uncertainties, and the success of Axie Infinity will depend on its ability to grow its user base, attract developers, and build its platform.

In closing, please know the forecast figures are generated using our price prediction tool and in that matter, not a guarantee, that the actual price action will follow what we mentioned. Forecasts are not immune to changing circumstances and will be updated with new developments. Always do your own research and evaluate all necessary factors before making any investment.
