Babylon Airdrop Guide: Everything You Need To Know About It

Babylon, a protocol designed for native, self-custodial Bitcoin staking, has recently drawn great attention due to its airdrop event. On April 10, the Babylon Foundation announced its TGE with a successfully executed airdrop. Besides, Binance has introduced Babylon (BABY) as the its 64th HODLer Airdrops program.

The Web3 project has also opened up the registration window and shared the specifics of its highly anticipated airdrop. In this article, we will explore the key details of the airdrop and discuss potential BABY token price movement.

Binance Introduces Babylon (BABY) as its 14th HODLer Airdrop Project

On April 10, Binance has introduced Babylon (BABY) as the its 64th HODLer Airdrops program. Users who subscribed their BNB to Simple Earn (Flexible and/or Locked) and/or On-Chain Yields products from **2025-03-07 00:00 (UTC) to 2025-03-12 23:59 (UTC)** can get the airdrops distribution.

The HODLer Airdrops token rewards amount to 75 million BABY, representing 0.75% of the Genesis Total Token Supply. An additional 121.6 million BABY will be allocated to other marketing campaigns six months after the spot listing.

Upon listing on Binance, the total token supply will be 10,015,636,491 BABY, with a circulating supply of 2,294,036,491 BABY (22.90% of the total token supply).

BABY HODLer Airdrops Details

- Token Name: Babylon (BABY)
- Genesis Total Token Supply: 10,000,000,000 BABY

- Max Token Supply: Infinite (8% annual inflation for the first year. Inflation rate for year 2 onwards is subject to governance proposals)
- HODLer Airdrops Token Rewards: 75,000,000 BABY (0.75% of Genesis Total Token Supply)
- Additional 121,600,000 BABY will be allocated to the other marketing campaigns (in batches) 6 months after spot listing. Details will be shown in a separate announcement.
- Total Token Supply upon Listing on Binance: 10,015,636,491 BABY
- Circulating Supply upon Listing on Binance: 2,294,036,491 BABY (22.90% of total token supply)
- Network Details: [Babylon Explorer](#) (will be available at public launch)
- Listing Fee: 0
- Research Report: [Babylon \(BABY\)](#) (will be available within 24 hours of publishing this announcement)

After the airdrop, BABY was listed on Binance Spot on April 10, 2025, 18:00 (ET). Trading would open for five pairs: BABY/USDT, BABY/USDC, BABY/BNB, BABY/FDUSD, and BABY/TRY.

What is Babylon?

Babylon is a Proof-of-Stake (PoS) blockchain platform built using the Cosmos SDK. It is a groundbreaking project that utilizes Bitcoin (BTC) as stake to enhance the security of other PoS chains.

While Proof-of-Work (PoW) blockchains rely on computational power to secure the network, PoS blockchains depend on the amount of stake to maintain network security. However, next-generation PoS blockchains often face challenges during the launch phase, where individuals or organizations can acquire large amounts of stake, gaining control over the system. This can either lead to centralization or force the system to offer high returns to attract operators, resulting in rapid inflation.

Babylon addresses these challenges by leveraging the security power of Bitcoin to reinforce the safety of PoS chains. This approach not only protects PoS networks but also offers a new revenue stream for Bitcoin holders, aligning the interests of both Bitcoin and PoS blockchain ecosystems.

At the heart of Babylon lies a transformative concept—Bitcoin staking. This mechanism enables Bitcoin holders to put their idle BTC to work by staking it to bolster the security of proof-of-stake

(PoS) blockchains, while simultaneously earning yield. The result is a two-sided marketplace: PoS chains in need of additional security can offer rewards, and Bitcoin holders can supply capital in exchange for yield.

What sets Babylon apart from traditional staking models is that it eliminates the need to bridge BTC to other chains or rely on centralized custodians. Instead, Babylon introduces a secure and decentralized protocol that allows users to stake their Bitcoin trustlessly, without giving up custody. At the same time, it provides full slashable security guarantees to PoS chains—ensuring accountability and reinforcing network integrity.

Babylon Airdrop Detail: Who is Eligible & How to Participate?

The **Babylon (BABY) airdrop** on Binance follows a **retroactive distribution model**, meaning eligibility is determined based on users' past activities—not future participation. If you're wondering whether you qualify, here's a comprehensive overview:

□ Eligibility Criteria

To be eligible for the BABY airdrop, users must have subscribed BNB to either **Simple Earn (Flexible or Locked)** or **On-Chain Yields** products between:

March 7, 2025, 00:00 (UTC) and March 12, 2025, 23:59 (UTC).

If your BNB was held in these products during the qualifying period, you are already eligible for the airdrop.

The reward allocation is based on your **average BNB holdings** during this timeframe, compared to the **total average BNB holdings** across all participants. Note that a **holding cap of 4%** is applied—any amount exceeding this cap will not increase your airdrop share.

□ Verification Requirements

To receive BABY tokens, users must:

- Complete **account verification (KYC)**.
- Reside in an **eligible jurisdiction**.

Please note that **BABY tokens will not be available for deposits or withdrawals** in the following countries: **Belgium, France, Italy, Poland, Spain, and Sweden**. Users in these regions can only **buy or sell** BABY on Binance's platform.

▣ Airdrop Timeline

- **HODLer Airdrop information** is expected to be available within **12 hours** of Binance's official announcement on **April 9, 2025**.
- Eligible users will receive BABY tokens in their **Spot Wallets** at least **1 hour prior to the official trading launch**, scheduled for:

April 10, 2025, at 10:00 (UTC).

▣ Trading Pairs

Once live, **BABY** will be tradeable against the following pairs:

- **BABY/USDT**
- **BABY/USDC**
- **BABY/BNB**
- **BABY/FDUSD**
- **BABY/TRY**

The token will carry a **Seed Tag**, indicating it is a newly listed and potentially more volatile asset.

Babylon (BABY) Price Prediction: How High Can BABY Go Post Binance Listing?

As excitement builds around the airdrop and Binance listing, the question arises of what the BABY token's price will be at launch and how it will perform.

According to data from CoinMarketCap, BABY reached a new all-time high of \$0.149 on April 10, 2025. The token surged by 72% following its listings on Binance and Bitget, climbing to \$0.1365. This significant price increase occurred immediately after BABY was listed on both exchanges and the Babylon Genesis mainnet went live—the first Layer-1 blockchain to leverage Bitcoin's security.

The following sets forth the BABY to USD Chart

[Babylon Price](#)

In the short-term, experts predict that BABY could see significant price fluctuations following its Binance listing. Early estimates suggest that the token could initially trade between \$0.50 and \$1.00, depending on demand and overall market conditions. The excitement surrounding its listing could drive prices to the higher end of this range, especially if there is a rush of speculative buying.

For the long-term, the price of BABY will be heavily influenced by the success of the Babylon project and its ability to integrate with the growing PoS ecosystem. If the platform delivers on its promises and the project gains traction, BABY could see sustained growth, with a potential price target of \$2.00 to \$3.00 by the end of 2025. This would place the token among the more established players in the space, contingent on adoption and use cases.

How to Buy the BABY Token?

At present, BABY token has secured listing on major crypto exchanges like Binance, Biget, MEXC, etc., where interested investors can buy this crypto.

Unfortunately, \$BAB token is not available on BTCC platform at present. However, it is worth mentioning that BTCC, one of the longest-running crypto exchanges in the world, supports trading for 300+ cryptocurrencies with a leverage of up to 500X. If you want to start trading cryptocurrencies, you can start by signing up for BTCC.

Conclusion

Following the official launch of BABY Coin and the Babylon Genesis network, the project has entered a critical growth phase. As a utility token with real-world functions, such as governance, transaction fees, and staking rewards, BABY is uniquely positioned to benefit from the increasing adoption of Babylon's Bitcoin-secured Proof-of-Stake model.

While BABY's post-listing price could experience a significant surge, it's important for investors to remain cautious. As with any newly listed token, the price will likely see high volatility, especially in the days following its launch. For long-term investors, the success of the Babylon platform and its ability to attract users and integrate with PoS networks will be the key factors driving sustained price growth.

Investors should monitor the market closely and be prepared for fluctuations as the token matures within the Binance ecosystem.
