What is Meme Coin?

Meme coins represent a subset of cryptocurrencies, akin to Bitcoin and Ethereum, that pay tribute to memes – humorous or intriguing concepts encapsulated within images, videos, or other media formats. Like the memes they're based on, meme coins are designed to go viral and be shared.

As a unique genre of cryptocurrencies, meme coin has gained significant popularity in the digital asset market. Meme coins typically use standard blockchain protocols, but unlike cryptocurrencies

such as Bitcoin and Ethereum, they don't have any serious financial or technological purpose. Despite their unconventional origins, meme coins have demonstrated the capacity to attain substantial market capitalizations. Their widespread appeal and subsequent investment interest are often swayed by influential individuals or social media trends, resulting in highly volatile price fluctuations.

Overall, meme Coins are usually featured by volatility, community-driven and potential for high risks and reward. Although meme coins may be entertaining to some, they also belong to highly risky investments as they hold little or no intrinsic value.

How Do Meme Coins Work?

Meme coins operate similarly to other cryptocurrencies in that they leverage blockchain technology to foster a decentralized and secure transactional landscape, eliminating the need for a central governing authority. Traders can engage in buying, holding, or exchanging meme coins across various cryptocurrency exchanges, where their value is predominantly dictated by the dynamics of supply and demand.

What sets meme coins apart is their ability to rally fans around niche topics or amusing content, frequently igniting viral marketing campaigns that bolster their popularity. Many meme coins also use smart contracts on platforms like Ethereum to enable additional functions such as staking or access to special community rewards. Despite their often humorous origin, trading meme coins requires a comprehensive grasp of cryptocurrency market trends and adept risk management strategies, as they are known for their high volatility.

As for the advantages and disadvantages of buying meme coins, we list a detail list for you.

Pros

Cons

- As a kind of crypto, the price of meme coins are very volatile, it is easier for you to obtain high return through this kind of trading than traditional investments in a short period.
- Meme coins can offer a unique humor and fun for the community.
- Compared with major established coins, meme coins are relatively cheap.
- Some meme coins offer practical use cases.

- Trading meme coin is a kind of highly risky investments as they hold little or no intrinsic value
- Some meme coins may lack transparency regarding their development team, roadmap, and other important information.
- Although there are some restrictions and limits on crypto trading, digital assets are currently mostly unregulated in Canada and around the world.
- Meme coins usually have a massive or uncapped supply, which may lead to the lower price per token.
- Market dynamics of meme coins can be easily affected by current trends.

If Bitcoin was the original cryptocurrency, [Dogecoin](#) was the original meme coin. Launched in 2013, Dogecoin (DOGE) was created by Jackson Palmer and Billy Markus, featuring a Shiba Inu dog. Unlike Bitcoin's limited supply, Dogecoin does not have a limit on the number of coins that can be generated.

As crypto market saw many optimistic factors in 2024, a bull run can be expected to occur in 2025. According to our market analysis, we are very confident about the outlook of Dogecoin. There is no doubt that Dogecoin is a promising option for Australian investors. It is predicted Dogecoin price would reach \$0.32 on the high end and a lower end of \$0.07825 and an average price of \$0.1150 by the end of 2025.

As of writing the article, \$DOGE is traded at \$ 0.1422, boasting a market cap of \$ 21.2B, and witnessing a hefty 24-hour trading volume of \$ 3.7B. \$DOGE Token saw a 24-hour change of -4.89%, with minor fluctuations of -0.43% over the past hour.

Created anonymously in August 2020, [Shiba Inu \(SHIB\)](#) was another dog-themed meme coin based on the same set of internet memes as Dogecoin. SHIB is an Ethereum-based ERC-20 token. Since launch, Shiba Inu has gained huge popularity and success.

Shiba Inu is considered as a direct challenger to Dogecoin, capturing the imagination of investors with its cute dog mascot and a massive supply. Since April, Shiba Inu price has seen huge rally, it reached a new high of \$0.00004289 in April 5, 2024.

As SHIB is a relatively rich and potentially valuable meme coin, we believe it is a good option for Australian traders to invest in April 2025. It is anticipated Shiba Inu (SHIB) to be traded at a minimum value of \$0.000000544, a maximum potential price of \$0.0000463 by the end of 2025.

Falling way behind DOGE and SHIB in terms of market capitalisation, Pepe is a meme coin based on a meme popularised by the often-problematic image board website, 4chan. Since launched in April 2023, Pepe Coin has rapidly gone viral. Because of its unique deflationary mechanisms and redistribution systems, Pepe Coin received large large popularity among investors.

Since the approval of spot ETH ETFs by SEC, the overall crypto market is basically bullish. The

initial bull run of 2024 was ignited by the PEPE price rally which FLOKI, BONK, WIF, etc later followed. In 2024, PEPE price experienced large spike. In early April, PEPE was only traded at a price of \$0.00000272. PEPE price rapidly surged to \$0.00000716 in April 5, then PEPE price increased amid volatility and reached a peak of \$0.00001050 in April 14.

Pepe price surged over 15.65% following Trump’s victory in election. Considering the current state of Pepe (PEPE) and its potential as an investment, there are huge attraction for Australian investors to explore this meme cryptocurrency, believing it is a good investment option for Australian traders in this April. It is estimated that by the end of 2025, Pepe coin price can be traded at a maximum price of around \$0.0000124.

As of writing the article, \$PEPE is traded at \$ 0.000006035534, boasting a market cap of \$ 2.5B, and witnessing a hefty 24-hour trading volume of \$ 689.5M. \$PEPE Token saw a 24-hour change of -6.42%, with minor fluctuations of 0.68% over the past hour.

In the dog-dominant meme coin landscape, Floki Inu (FLOKI) has emerged as one of the most popular dog copycat coins in the crypto market. Inspired by Elon Musk, the billionaire CEO of the electric car manufacturer Tesla, Floki Inu (FLOKI) was created by an unknown team of developers who were enthusiastic fans and members of the Shiba Inu community. FLOKI token runs on both the Ethereum blockchain and the Binance Smart Chain (BSC) network, allowing FLOKI holders to store and trade their tokens using either blockchain.

Floki Inu is a meme coin with unique charm and potential, and the community-driven and ecosystem construction behind it provides a solid foundation for its future development. Notably, Floki Inu (FLOKI) is more than just a meme coin, it's building an ecosystem that includes the following major projects: Valhalla, FlokiPlaces, and Floki University.

As of writing the article, \$FLOKI is traded at \$ 0.000047353913, boasting a market cap of \$ 452.6M, and witnessing a hefty 24-hour trading volume of \$ 82.7M. \$FLOKI Token saw a 24-hour change of -6.82%, with minor fluctuations of 0.10% over the past hour.

Despite being a relatively new crypto project, Floki Inu's market position and influence are expected to further increase as it continues to launch new utilities and strengthen cooperation with other projects. FLOKI price rallied 14% after Trump's win in US Election. Given its huge potential and unique ecosystem, we regard this meme coin as a good investment option for Australian traders in April 2025, believing its will bring investors generous return.

[Bonk \(BONK\)](#) is the first dog-themed meme coin project built on the Solana blockchain. Launched on 25th December 2022, it led to a rise in the value of the SOL token (a rise of 34% in 48 hours). The main goal of BONK is to bring back liquidity to Solana-based decentralised exchanges (DEXs). It is developed with the idea of a full-fledged community coin that can be traded on all dApps built on Solana.

In 2023, BONK experienced a massive recovery, growing significantly in market cap and even briefly surpassing FLOKI Inu to become the fifth largest meme coin. BONK, as a cryptocurrency, uses blockchain technology to ensure the normal operation of the distribution, verification, burning and other processes of tokens.

As of writing the article, \$BONK is traded at \$ 0.000009507662, boasting a market cap of \$ 745.0M, and witnessing a hefty 24-hour trading volume of \$ 89.4M. \$BONK Token saw a 24-hour change of -6.51%, with minor fluctuations of -0.90% over the past hour.

BONK has a huge supply and is relatively cheap compared to other cryptocurrencies, which makes it psychologically more cost-effective and accessible to investors. Given the remarkable achievement it

has made and strong ecosystem, we list this meme coin as one of the best meme coin to buy for Australian traders in April 2025.

Dogwifhat (WIF) is a Solana blockchain-based meme coin inspired by an online meme of a Shiba Inu wearing a pink beanie. Boasting a market capitalization of approximately \$4 billion, Dogwifhat (WIF) has ascended to the ranks of the third-largest meme coin, trailing only DOGE and SHIB. This remarkable achievement was achieved within a mere four months of its launch, which is largely attributed to its catchy meme concept of a dog wearing a hat.

As of writing the article, \$WIF is traded at \$ 0.3187, boasting a market cap of \$ 318.3M, and witnessing a hefty 24-hour trading volume of \$ 359.1M. \$WIF Token saw a 24-hour change of -7.18%, with minor fluctuations of -0.70% over the past hour.

Since its launch, Dogwifhat (WIF) has risen rapidly in the cryptocurrency market, at one point reaching a high market cap (such as a market cap of about \$4 billion at one point). As a meme coin featured with unique cultural symbol and community identity, Dogwifhat (WIF) has established itself as a good investment in 2025. Launched in February 2024, [Brett \(BRETT\)](#) is a meme coin on the Base network, and its mascot is a character in Matt Furie’s Boys’ Club comic, who was a dancer and loved video games. BRETT rapidly received a lot of attention and support from the crypto community after its launch. With the fast growth of the community of supporters and believers, \$BRETT’s market capitalization soon surpassed \$300 million.

Apart from its profound cultural implications, BRETT serves practical purposes within the Base ecosystem. As a native token, BRETT facilitates transactions, incentivizes participation, and fosters community engagement. Through its utilization, users gain access to a diverse array of features and functionalities offered by the Base platform, thereby amplifying its utility and value proposition within the broader cryptocurrency landscape.

Brett is an explosive meme coin that’s already delivered a 140x gain in 2024 and looks set to generate even more profits for traders. According to \$BRETT price prediction, it suggests this meme coin can deliver a significant price gain by the end of the year, with larger gains ahead in 2025 and

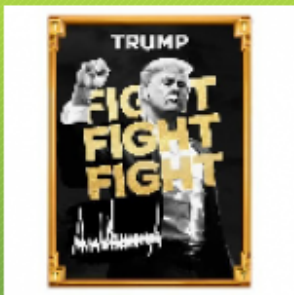

beyond. Taking all factors into consideration, we list Brett (BRETT) as a good investment option for Australians for this April.

There is no denying that [Official TRUMP \(\\$TRUMP\)](#) is one of the most valuable meme coin in April 2025. Only two days before the official inauguration of the 47th president of the United States, US President-elect Donald Trump launched his own cryptocurrency Official TRUMP (\$TRUMP). Specifically, Official TRUMP (\$TRUMP) is launched on the Solana blockchain, with a total of one billion coins, 800 million of which are possessed by Trump-owned corporations, while 200 million are in circulation.

Notably, this launch sparks a feverish buying that apparently sent its market capitalization skyrocketing to several billion dollars. In less than 48 hours of this token launch, the token rallied to an all-time high of \$73.43 on Jan. 19, 2025. Undoubtedly, the extensive attention garnered from the meme community and Donald Trump's supporters is poised to sustain Official TRUMP (\$TRUMP) project's momentum, making it one of the best meme coins to invest in in 2025.

As of writing the article, \$TRUMP is traded at \$ 7.9252, boasting a market cap of \$ 1.6B, and witnessing a hefty 24-hour trading volume of \$ 945.2M. \$TRUMP Token saw a 24-hour change of -14.15%, with minor fluctuations of -0.76% over the past hour.

Conclusion

Given recent remarkable performance and analysis, meme coins emerge as potential candidates for investors seeking high returns in April 2025. Amid a favorable environment, we are confident that PEPE, DOGE, SHIB, FLOKI, BONK, WIF, MEW, PENGU and Official TRUMP are good choice for Australian traders looking for generous return from investing in meme coins. These promising meme coins could gain momentum as the new administration pushes for blockchain-friendly policies, making this a unique investment opportunity for crypto investors.

How to Buy Meme Coin on BTCC?

Just like you can open a brokerage account to buy and sell stocks, you can open an account with a cryptocurrency exchange to buy meme coins. Choosing a suitable exchange is also crucial in the process of trading cryptos. For those with interests in meme coins, we would like to introduce [BTCC](#), one of the longest-running exchanges in the world, for your trading.

BTCC stands out in many aspects, like high liquidity & volume, flexible leverage up to **500x**, rich rewards, etc. We believe join BTCC would make your trading journey more delightful!

The following sets forth the guidance for buying meme coins on cryptocurrency exchange BTCC:

Step 1: Create a BTCC account

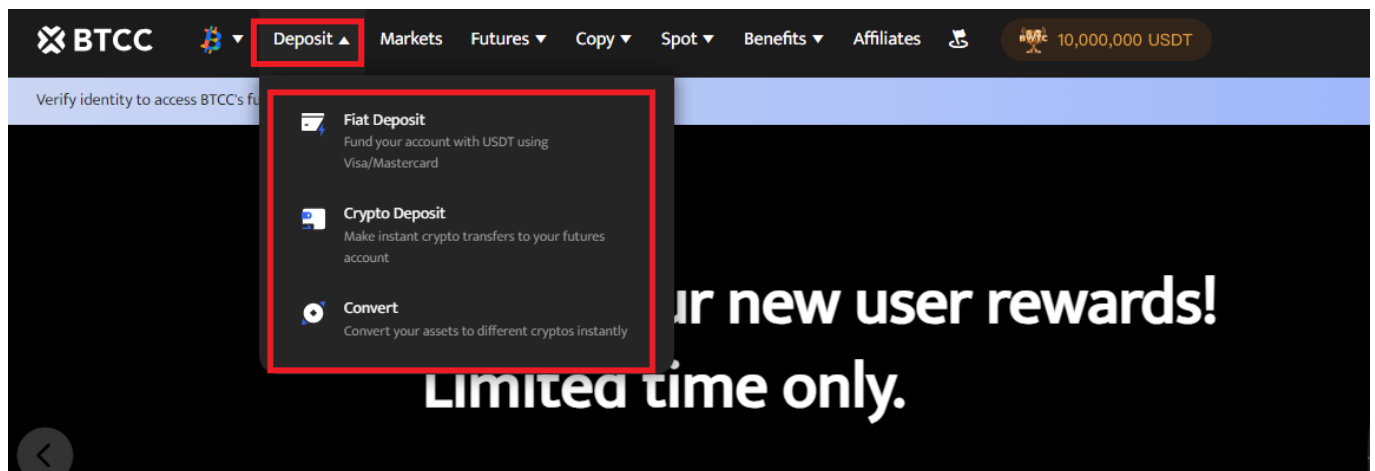

[Sign up](#) BTCC to start your journey on this leading crypto exchange.

Step 2: Complete BTCC's identity verification

Kindly verify your identity to ensure full compliance and enhance your trading experience on BTCC. You can access the [identity verification page](#), fill out your country, upload your ID documents, and submit your selfie. You will receive a notification once your identity has been successfully verified.

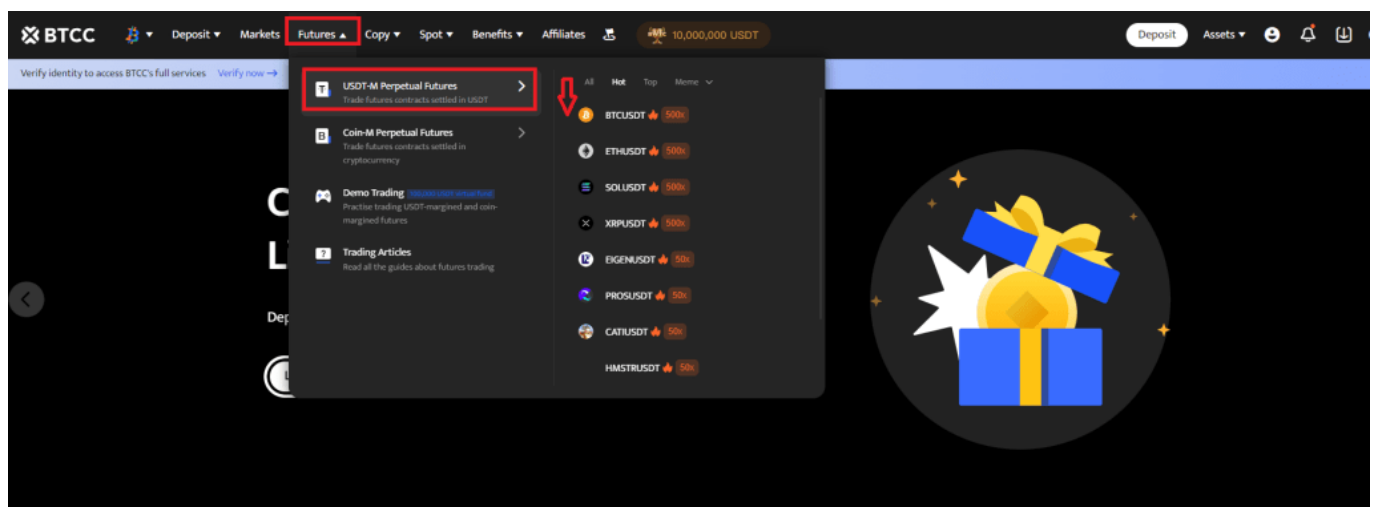

Step 3: Fund your BTCC account

On the [BTCC official homepage](#), choose “Deposit”, and then fund your account with your preferred method

Step 4: Place your crypto futures order on BTCC

Go back to the BTCC official homepage, choose “Futures” - “USDT-M Perpetual Futures Contract”, and find the meme coin trading pair that you want to trade.

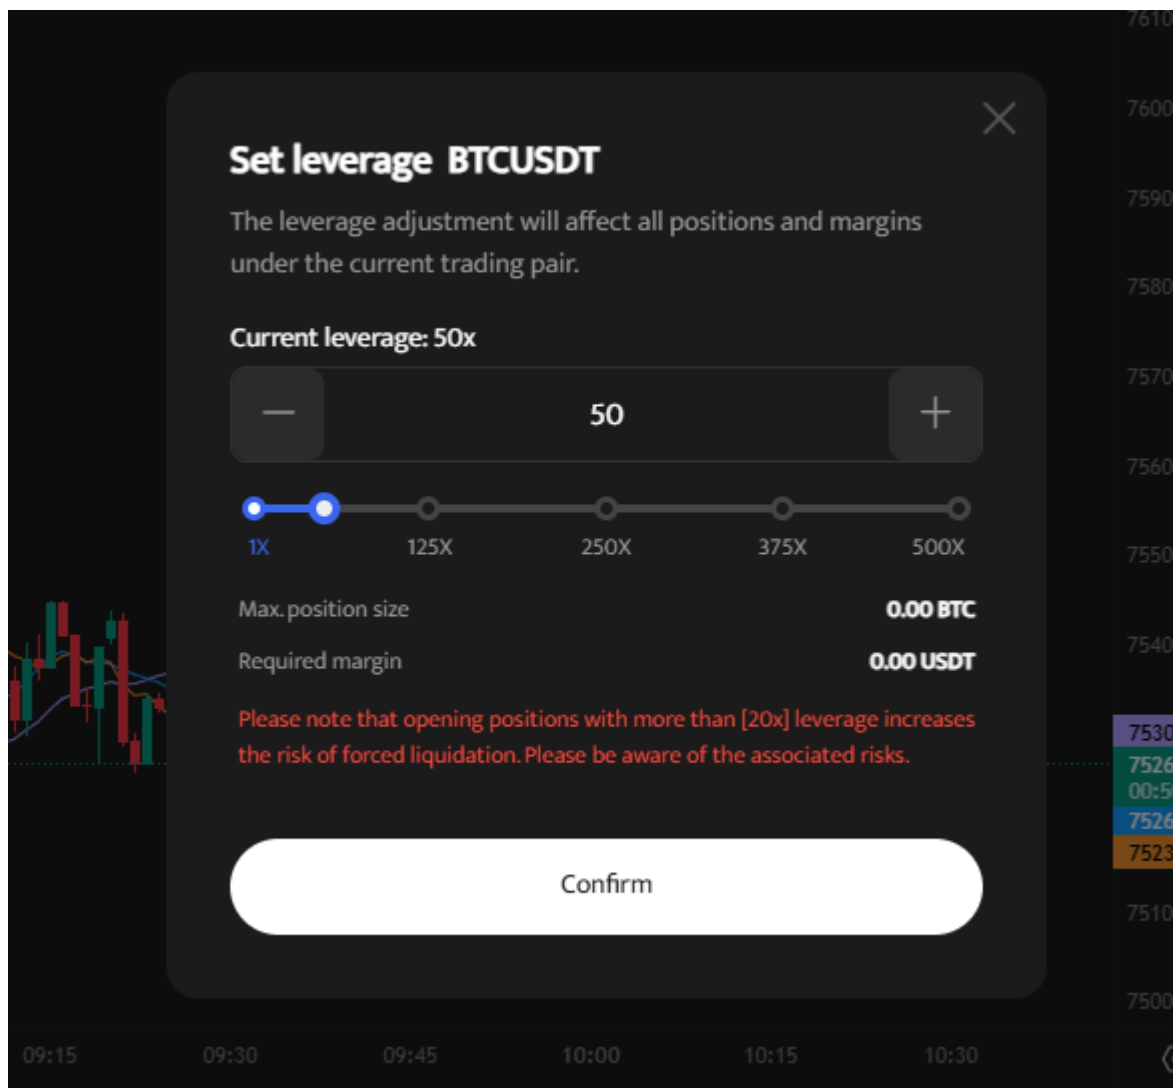

Then, choose the contract trading order type. Futures contract orders on BTCC platform include market orders, limit orders and SL/TP orders.

- **Market Order:** users place orders at the best price in the current market to achieve fast trading.

- **Limit Order:** Limit orders are a type of order to buy or sell futures at a price more favourable than the market price. When you buy at a price lower than the market price or sell at a price higher than the market price, the order will be in the form of a limit order.
- **SL/TP Order:** SL/TP orders are a type of order to buy or sell futures at a price less favourable than the market price. When you buy at a price higher than the market price or sell at a price lower than the market price, the order will be in the form of a SL/TP order.

The screenshot displays a trading interface with a dark theme. At the top, a 'Leverage' dropdown is set to '50x'. Below this are 'Open' (green) and 'Close' (grey) buttons. A red rectangle highlights the order type selection area, which includes 'Market' (selected), 'Limit', and 'SL/TP'. To the right of these options is an information icon. Below the order type selection, the text 'Free 0.00USDT' is shown next to a calendar icon. A 'Best Bid Price' button is visible. The 'Quantity' input field is set to 'BTC'. Below this, the 'Contract Value' is approximately '0.00USDT', accompanied by a horizontal slider. A checkbox for 'Set TP/SL' is present. At the bottom, there are two large buttons: 'Open long' (green) and 'Open short' (red). Below these buttons, the 'Max long' and 'Max short' values are both '0.00 BTC', and the 'Margin' is '0.00 USDT' for both.

Next, adjust the leverage multiple.

Please keep in mind that operating leverage carries the risk of liquidation. Leverage should be adjusted based on your financial status and risk tolerance.

Then, choose the lot size and set the SL/TP price. After setting the basic data information, users can choose to buy (open long) or sell (open short) after entering their ideal price. Traders should remind that the price cannot be higher or lower than the highest buying price or lowest selling price of the platform.

Finally, click the buy or sell button, and the crypto futures contract order is completed.
