5 Best Meme Coins to Buy in November 2024

[Meme coins](#), which derive from online memes and are frequently supported by robust communities, transcend beyond just digital currency and instead represent a cultural phenomena. Some of the most popular meme coins have grown astronomically, reaching multi-billion dollar market capitalisation, despite the fact that many of them are useless.

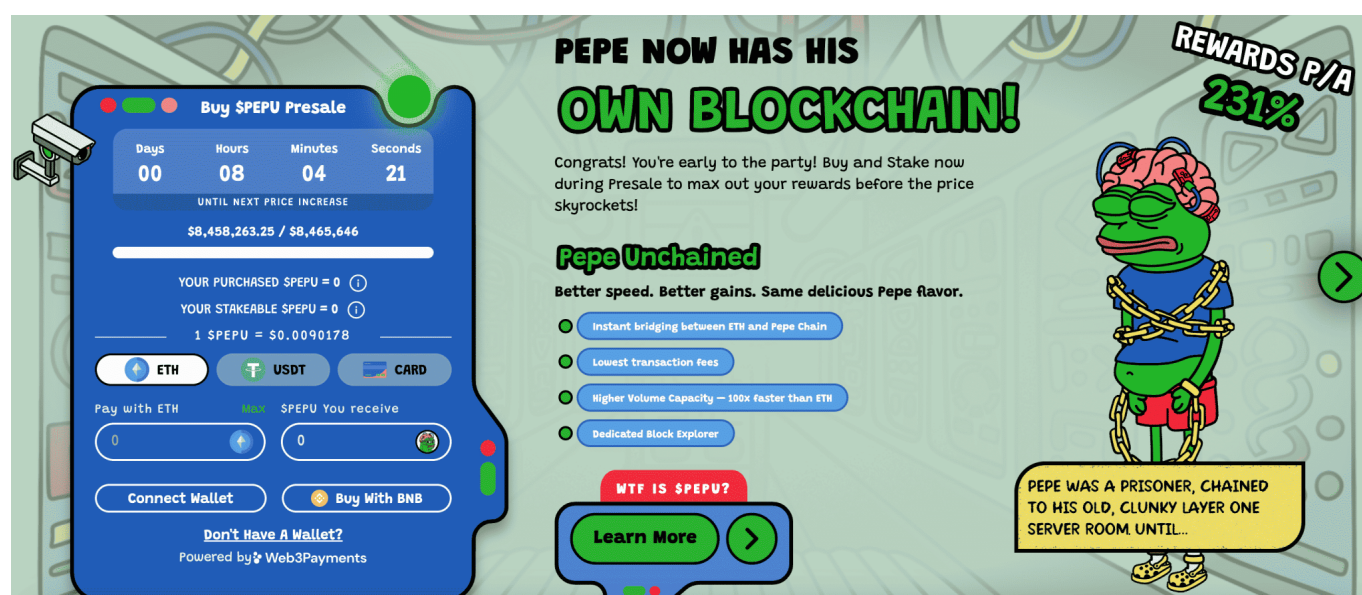

This article examines the top meme coins available right now, taking into account a number of variables like market capitalisation, user base support, and use cases. We also examine the factors that influence their pricing, the reasons behind their popularity among investors, and the risks connected to these digital assets. In addition, we explore the definition of meme coins, their quantity, the top newly released meme coins, and how to buy them.

Best Meme Coins to Buy in November 2024

Making a cryptocurrency from scratch calls for technical know-how, but making it into a viral meme coin is an entirely different beast. Here we'll take a closer look at the most popular meme currencies on the market right now and analyse what's going to drive their future prices higher.

1. Pepe Unchained - Best L2-Layer Meme Coin with Cheaper Gas Prices

The image displays the Pepe Unchained (\$PEPU) presale interface and landing page. On the left, a blue 'Buy \$PEPU Presale' panel features a countdown timer (00 Days, 08 Hours, 04 Minutes, 21 Seconds) and a progress bar showing \$8,458,263.25 / \$8,465,646. It includes fields for 'YOUR PURCHASED SPEPU' and 'YOUR STAKEABLE SPEPU', both at 0, and a conversion rate of 1 SPEPU = \$0.0090178. Payment options for ETH, USDT, and CARD are listed, along with a 'Connect Wallet' button and a 'Buy With BNB' button. A note at the bottom states 'Powered by Web3Payments'. The main section, titled 'PEPE NOW HAS HIS OWN BLOCKCHAIN!', congratulates users on being early and lists benefits: instant bridging between ETH and Pepe Chain, lowest transaction fees, higher volume capacity (100x faster than ETH), and a dedicated block explorer. A cartoon Pepe character, depicted as a prisoner with chains and a brain icon, is shown with a speech bubble stating: 'PEPE WAS A PRISONER, CHAINED TO HIS OLD, CLUNKY LAYER ONE SERVER ROOM. UNTIL...'. A 'REWARDS P/A 231%' badge is in the top right. A 'Learn More' button is at the bottom.

The most promising new meme coin available today is Pepe Unchained (\$PEPU). In addition to being the first PEPE token ever, it boasts unprecedented transaction speed and security thanks to its unique Layer2 chain. Plus, petrol prices on Layer 2 are much lower, so you can make the most of your investment.

\$PEPU stands out from other meme coins because it integrates state-of-the-art blockchain technology with meme currency. The coin's first week of sales brought in more than \$1.2 million as investors recognised its potential. The token is currently riding high on an ever-increasing wave of enthusiasm, having raised over \$10.7 million.

Pros

- In just two months, the project has raised almost \$10.7 million.
- Quick ETH to PEPE Chain bridging is available, with reduced transaction costs and increased liquidity.
- PEPU blends Layer blockchain technology with the immersive appeal of PEPE.
- Faster transactions, reduced gas costs, and a seamless trading experience are all provided by the Layer 2 chain.
- There is a maximum 187% APY.

Cons

- Market volatility is typically higher for meme coins.
- It is vulnerable to changes or problems in the Ethereum ecosystem because it is a Layer2 solution that depends on Ethereum's stability and performance.

Another new meme coin that we have included on our list is Shiba Shootout (\$SHIBASHOOT). It instantly strikes a chord with Americans by portraying the famous Shiba Inu doge meme as a cowboy. It is going to release Shiba Sharpshooter, its own play-to-earn game, for both iOS and Android.

In addition to its many useful features, \$SHIBASHOOT has a referral programme and a community storytime season where tokens are awarded to the best stories. Additionally, token holders have the chance to win significant crypto prizes through a lottery system. Plus, you can receive rewards of more than 950% just by purchasing and staking the token. Over \$1 million has been raised by the project as of press time.

Pros

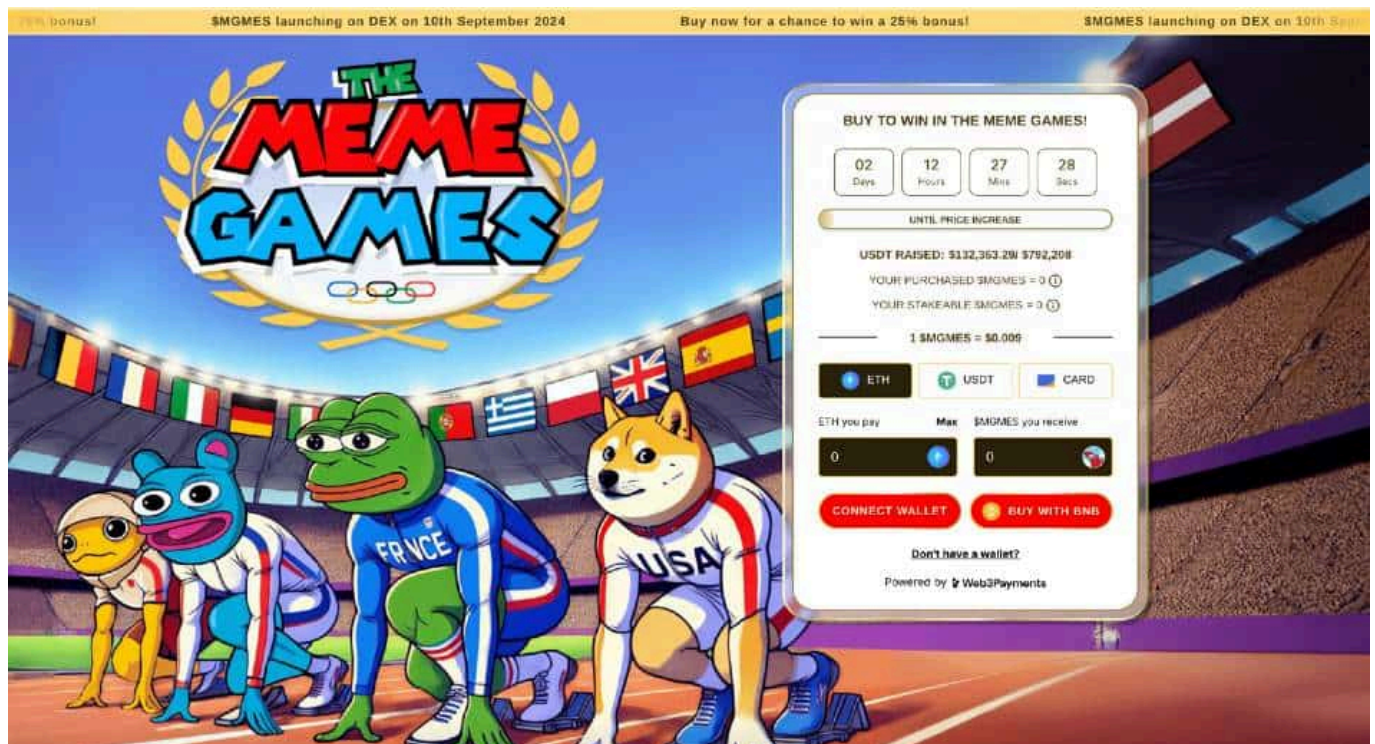

- Several useful and entertaining applications centred on a western theme.
- The renowned Shiba doge meme will appear in an exciting Web3 game that you may play with it.
- You can still take advantage of the incredible 904% APY.
- A discounted price of \$0.02 during the presale period.

Cons

- We are currently unable to provide the play2earn game.
- As more coins are staked, the staking APY will reduce.

[TRADE_PLUGIN]BTCUSDT,ETHUSDT[/TRADE_PLUGIN]

3. The Meme Games - Top Meme Coin for Spectators of the Summer Olympics

Anyone who loves the Olympics should absolutely get The Meme Games as their meme coin. In a lighthearted and competitive setting, it unites Dogecoin, Pepe, and Turbo, three of the most popular meme characters. The idea is not too complicated. If you want a shot at the 25% presale bonus, all you have to do is choose your favourite meme currency. Everyone gets an equal shot at winning thanks to the random and fair competition. In addition, there is an opportunity for investors to earn an astounding annual percentage yield (APY) of more than 480%.

In the meme coin space, you must watch The Meme Games, which runs alongside the Olympics and captures the passion of sports enthusiasts and crypto investors alike. As a result, this new meme coin is an excellent initiative to look into if you enjoy both memes and cryptocurrency. Coin presale is happening right now if that isn't enough. As a result, you may acquire it for a pitiful \$0.00935.

Pros

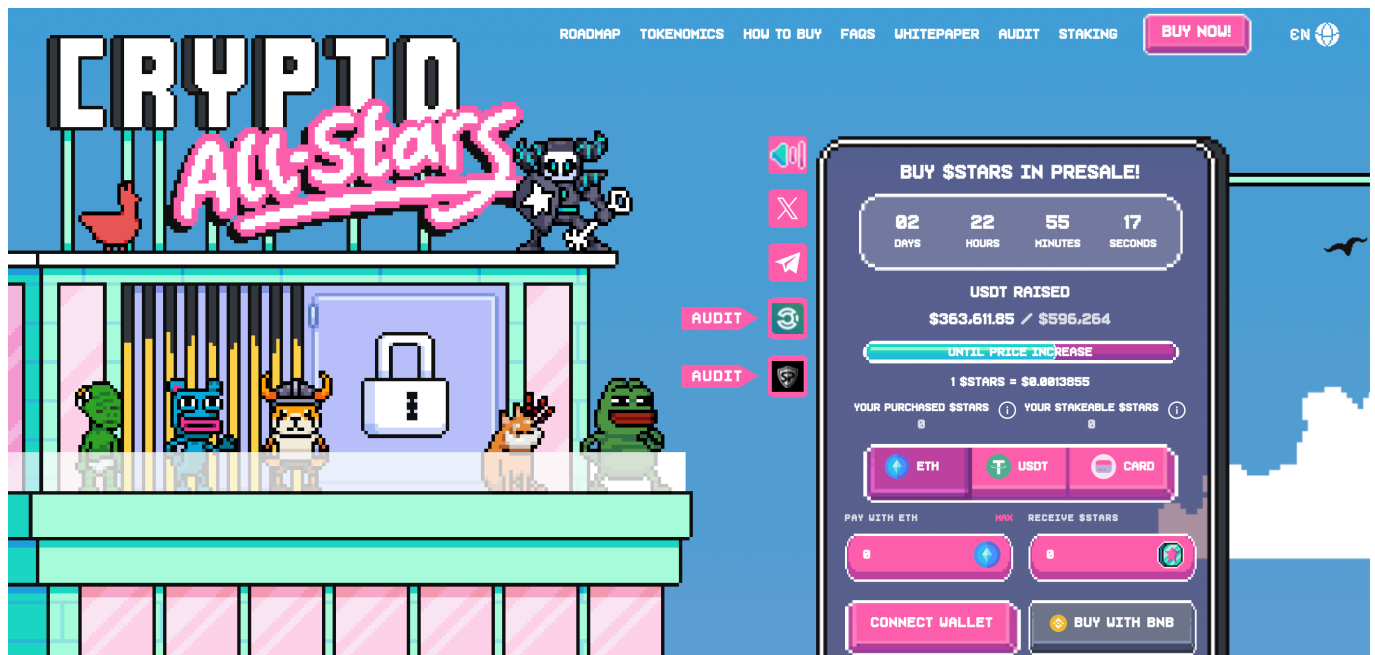

- It combines the best meme characters with the Paralympics and the Olympics.
- Every purchase comes with an incredible 25% presale bonus and 165 million dashes.
- The competition is completely level-playing since every meme athlete has an equal shot of winning.
- Verified smart contracts contain all presale purchase winners.
- Attempts to debut on DEX scheduled for November 10, 2024.

Cons

- Some brand-new meme coin initiative, and it's completely useless.
- A crypto meme project with huge risks and potential rewards.

[TRADE_PLUGIN]BTCUSDT,ETHUSDT[/TRADE_PLUGIN]

4. Crypto All-Stars -Unified Meme Coin Staking Reward Crypto Platform

One prominent meme coin presale, Crypto All-Stars (\$STARS), is working on a universal staking contract called the MemeVault that will allow users to stake all of their favourite meme coins in one spot. Meme coins like BONK, WIF, DOGE, PEPE, and TURBO are all part of this. Your stake will give you \$STARS regardless of the coin you use.

Rewards will be earned three times faster for those who already own \$STARS tokens. So, it could be wise to stock up on \$STARS during its presale while it's still cheap. Investor confidence appears to be high, as we raised about \$1 million in just a few weeks after the presale began. Investors can rest easy knowing that Crypto All-Stars's staking smart contract is secure because it has undergone audits by both Coinsult and SolidProof.

Pros

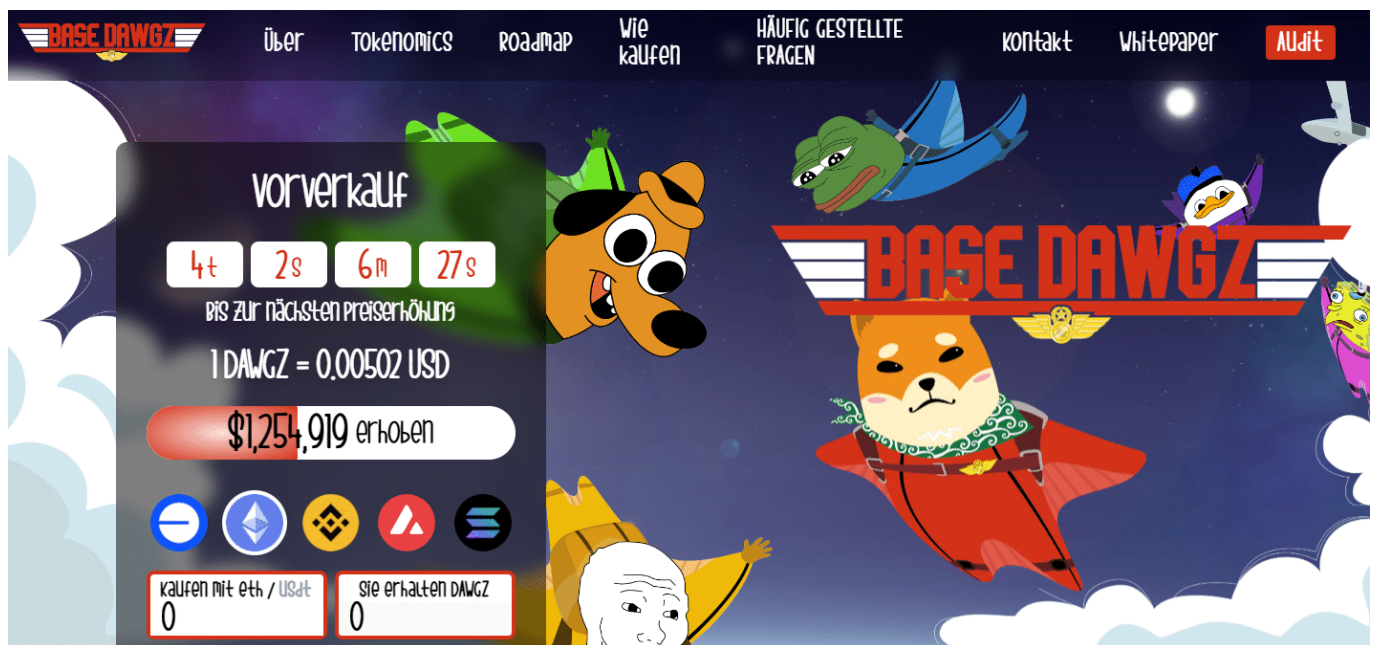

- Earning \$STARS tokens by staking popular meme currency under a single smart contract.
- Impressive returns from presale staking.
- Two prominent security organisations verify the smart contract.
- Nearly \$1 million has been raised for the initiative in the short time since it was launched.

Cons

- A high-risk, high-reward investment is meme coins.

[TRADE_PLUGIN]BTCUSDT,ETHUSDT[/TRADE_PLUGIN]

5. Base Dawgz - A Leading Meme Coin With Share-to-Earn Style Benefits

Thanks to its unique airdrop giveaway, multichain flexibility, and staking payouts, Base Dawgz (\$DAWGZ) has quickly become one of the top meme coins today. Base Dawgz will link up with the Ethereum, Solana, Binance, and Avalanche networks using cutting-edge Web3 technologies like Wormhole and Portal Bridge. As a result, it will facilitate easy movement across various blockchain systems.

Base Dawgz is one of the finest meme currencies since its holders have a lot of room to grow their wealth. Offerings of more than 782% APY are available at the moment. The project is also running a campaign called "Be Social for Airdrop" where users can earn rewards by sharing the initiative with others. X will serve as a platform for interested investors to exchange and develop Base Dawgz memes during the presale. You can earn points that can be turned into \$DAWGZ tokens with every

piece of content you create on Base Dawgz.

Pros

- An exceptional multi-chain adventure that includes ETH, SOL, BSC, and AVAX.
- Creating and sharing content after the presale ends is a great way for users to earn points.
- Its smart contracts have been thoroughly audited to guarantee the security of its users and assets.
- Three million dollars have been raised for the project thus far.

Cons

- A coin with great reward but considerable risk

[TRADE_PLUGIN]BTCUSDT,ETHUSDT[/TRADE_PLUGIN]

Are Meme Coins a Good Investment?

Only a small number of the tokens on our list of meme currencies provide anything truly special. This makes it that much more difficult to determine which meme coins are worth investing in. In what follows, we'll examine some of the potential benefits of investing in meme coins.

- **Potentially Huge Gains From Meme Coins**

We've shown that, unlike many of the top penny cryptos we've researched, meme coins don't have any meaningful utility. However, several of these tokens have historically caused the largest market

swings in the cryptocurrency space.

In 2021, the price of Dogecoin rose from about \$0.009 to \$0.68, a gain of nearly 7,000%. Supporting online communities is a common cause of these sudden price fluctuations. However, as the excitement and demand subside, the price might plunge to rock-bottom levels.

By the end of 2021, Dogecoin had fallen from an all-time high of \$20.21 to a price of about \$0.17. This is why traders need to exercise extra caution while putting their money into meme coins.

- **Meme Coins Might Be Useful**

Not every meme coin is based on anything currently popular online. Some of the new crypto meme initiatives that have been recently highlighted are instead incorporating utilities into their overall ecosystem.

Consider the Shiba Inu as an example. The integration of this meme coin with smart contracts is quite exciting. Like Dogecoin, Tamadoge is a meme coin that has integrated Web3 and P2E functions into its ecosystem. Investors no longer need to rely on unfounded hunches when selecting the top meme currencies in 2024.

Instead, they should think about the best meme coins now on the market. This manner, it will be less of a challenge to find promising cryptocurrencies for investment.

- **Solid Community Support**

Those looking to invest in meme currencies should prioritize those that have a sizable fan base. We've shown that the general public has considerable sway over the value of a meme coin.

Members of the community can help a token gain popularity by spreading the word about it, convincing others to buy it, and so on. Therefore, social networking sites and discussion forums like

Reddit are excellent places to look for potentially explosive meme coins.

Nonetheless, there is no assurance that a meme coin's value will rise only due to support from the online community. While there November be an exception or two, putting money into a meme currency simply because the project has a large number of social media followers is a very dangerous choice.

[**Trade on BTCC Now**](#)

Risks of Investing in Meme Coins

The cryptocurrency market as a whole is highly speculative. Cryptocurrencies are extremely risky due to their unregulated nature and extreme volatility. Even more is at stake when dealing with meme money.

With a few notable exceptions, most meme coins do not serve any practical use. Therefore, the worth of these digital tokens is often determined solely by the excitement generated by social media.

Furthermore, many meme coin ideas have ended up being flops. For the uninitiated, rug pulls are schemes in which cryptocurrency developers disappear with investor dollars. Investors should exercise extreme caution while selecting the most promising meme coins for their holdings.

It is possible for investors to profit from meme crypto coins by buying low and selling high at the proper times. Investing in cryptocurrencies with solid foundations that can withstand the test of time is the best course of action.

Which Meme Coin Will Hit \$1?

The unpredictable character of the cryptocurrency market makes it difficult to predict which meme coin will hit \$1. Having said that, there are meme coins that have demonstrated promising results. Some meme coins, like Shiba Inu and Dogecoin, have been around for a while and have a large fan base, thus they're excellent candidates to hit \$1.

Not only may these popular coins reach this mark, but so could a number of exciting new meme coins. Some examples of these are PlayDoge, PepeUnchained, WienerAi, and Base Dawgz.

Where to Buy the Best Meme Coins

We recommend utilizing a cryptocurrency exchange if you wish to acquire meme coins. These platforms specialize in facilitating crypto transactions and provide home-based access to the entire market.

On decentralized exchanges (DEXs) such as Pancakeswap and Uniswap, you can find meme coins such as Floki Inu that have not yet been listed on larger centralized crypto exchanges. Visit the official website of the coin to obtain the correct contract address before using them.

Today, investors have more options than ever to purchase meme currencies. BTCC is our pick for the finest cryptocurrency exchange.

BTCC- Best Place to Buy Meme Coins

Now you can trade Meme Coins on [BTCC](#). [BTCC](#), a [cryptocurrency exchange](#) situated in Europe, was founded in November 2011 with the goal of making crypto trading reliable and accessible to

everyone. BTCC is a crypto exchange offering users liquid and low-fee futures trading of both cryptocurrencies and tokenized traditional financial instruments like stocks and commodities.
