What is Bitcoin Cash (BCH)?

Bitcoin cash is a hard fork, or spinoff, from the Bitcoin blockchain that occurred on 1 August 2017. Just before Bitcoin achieved its previous all-time high of \$20,000 at the end of 2017, Bitcoin Cash was developed. Although it is not the oldest, Bitcoin Cash is one of the biggest and best-known forks of the cryptocurrency.

The split came as the Bitcoin community could not reach consensus on a proposal to increase the network's capacity to allow for more transactions. A group of developers realized that the huge potential of Bitcoin could be further harnessed optimally through a hard fork, thereby increasing the block size limit.

The primary objective of Bitcoin Cash was to address the issues concerning rising transaction fees and controversies surrounding scalability in the blockchain. Keeping in perspective peer-to-peer transactions as the mainframe and security as the pivotal purposes, this BCH was poised to facilitate the increase in block size from one MB to eight MB, thereby achieving an exponentially high speed of transaction process.

A salient characteristic of this protocol is that it ensures liquidity and ensures lightning-fast speed of more transactions on the network.

Bitcoin Cash exists separately from BTC. Like BTC, the supply of BCH is capped at 21 million coins. The fixed supply is intended to limit inflation and make bitcoin cash a store of value. So far, more than 2,800 merchants accept BCH for payment, according to data compiled by Cryptowerk.

Bitcoin Cash (BCH) Price Prediction 2025

Our Bitcoin Cash price forecast for the year 2025 is now ready for review. We are optimistic about the coin's future in 2019 due to these values and the shifting crypto ecosystem.

Adoption is the first topic we should address. Triple-A reports that 562 million people across the globe currently possess cryptocurrency. An rise of 34% from 420 million the previous year, that is.

There may be a greater need for cryptocurrency payment solutions if this trend persists. Bitcoin Cash is a popular choice for regular payments because of its emphasis on quick and cheap transactions. In 2025, one possible scenario is buying a morning coffee with BCH.

How many people own crypto in 2024?

Cryptocurrency is on the rise. Around 562 million people worldwide, or the equivalent of 6.8% of the global population, now own digital currencies, up 34% from [420 million](#) in 2023.

...and the trend shows no signs of slowing down.

Next, we have the institutional perspective. Due to the overwhelming demand, a spot Ethereum ETF is expected to launch soon after the success of spot Bitcoin ETFs. Bitcoin Cash is not an exception; this flood of institutional capital could help all boats rise.

When we consider all of this, we are optimistic about Bitcoin Cash's future in 2025. With a potential 41.78% increase from its present price, our Bitcoin Cash price prediction indicates that the coin might reach \$765.64 before the end of the year. This would be the highest price point since May of 2021.

Bitcoin Cash Price Prediction 2026-2030

A Bitcoin Cash price prediction for the distant future is difficult to make. Having said that, we remain quite bullish on the coin's future.

The possible incorporation of Bitcoin Cash into the expanding realm of DeFi is a critical component of our optimistic view. There may be a dramatic increase in demand (and price) if BCH is able to enter this market.

Additionally, we are closely monitoring the compatibility between chains. Bitcoin Cash's team might go in a different direction, even though all the blue chip cryptocurrencies are looking inward. Another compelling argument for investors to purchase and retain BCH might be if the developers prioritize interoperability.

The most intriguing possibility, though, is the continuous development of Bitcoin Cash. Future possibilities are expected to be expanded upon with the inclusion of UTXO-based smart contract capabilities. This would increase the desirability of BCH among developers if it were to occur. Still, a plethora of other rivals is likely, which might reduce Bitcoin Cash's worth in the market.

Taking everything into account, our Bitcoin Cash price forecast for 2030 is \$2,702.76. Even while it wouldn't break any records, it would be a huge jump from where it is now.

Step 2: Finish the KYC

The Know Your Customer (KYC) procedure is the next step after your account is operational. The main goal of this stage is to maintain compliance and security. You must upload identification, such as a passport or driver's license. You'll receive a confirmation email as soon as your documents are validated, so don't worry—it's a quick process.

The screenshot displays two side-by-side panels representing the KYC process. The left panel, titled 'Account registration', is marked as 'Completed' with a green checkmark. It lists benefits such as a 'Daily withdrawal limit' of '10,000.00 USD' and a 'Requirement' section with a 'Successfully registered' status. The right panel, titled 'Identity verification', is marked as 'Verified' with a green checkmark. It lists benefits including 'Fiat deposit' and 'Crypto deposit' with 'No limit', a 'Daily withdrawal limit' of '1,000,000.00 USD', and 'Others' that are 'Eligible to get more coupons/rebates'. A 'Requirement' section includes a 'Selfie' icon. A large white button at the bottom of the right panel says 'Make large deposits'.

Step 3. Deposit Funds

After that, adding money to your account is simple. BTCC provides a range of payment options, such as credit cards and bank transfers. To get your money into your trading account, simply choose what works best for you, enter the amount, and then follow the instructions.

- **Fiat Deposit.** Buy USDT using Visa/Mastercard (KYC required).
- **Crypto Deposit.** Transfer crypto from another platform or wallet.

BTCC FAQs

Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the platform's infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

Is KYC Necessary for BTCC?

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

Is There a Mobile App for BTCC?

Indeed. For users of iOS and Android, BTCC has a mobile app. The exchange's website offers the mobile app for download. Since both the web version and the mobile app have the same features and capabilities, they are comparable.

Will I Have to Pay BTCC Trading Fees?

Indeed. BTCC levies a fee for trade, just like a lot of other centralised exchanges. Each user's VIP level, which is unlocked according to their available money, determines the different costs. The BTCC website provides information on the charge rates.

Can I Access BTCC From the U.S?

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
