## What Is BlockDAG (BDAG)?

BlockDAG (BDAG) is a cryptocurrency and distributed ledger technology that utilizes a block-directed acyclic graph (BlockDAG) rather than a traditional linear blockchain.

Unlike Bitcoin or Ethereum, which store transactions in blocks that form a single chain, BlockDAG allows multiple chains to exist and operate simultaneously, increasing throughput and scalability. This technology is gaining momentum in 2025, particularly as Ethereum gas fees continue to rise. BDAG Token is the native utility and governance token of the BlockDAG network, used for:

- Transaction fees
- Staking and rewards
- Network governance
- Smart contract execution

## Why BlockDAG Is Gaining Popularity in 2025

Here's why BlockDAG crypto is trending:

- Scalability: Can handle thousands of transactions per second (TPS)**
- Low fees: Near-zero transaction costs**
- No miners: Eco-friendly and energy-efficient consensus**
- Smart contract support: Competes directly with Ethereum and Solana**

According to Google Trends, search terms like "BlockDAG crypto forecast," "BDAG price target," and "how high will BDAG go" have spiked since Q2 2025.

## Current BDAG Price and Market Data

As of July 31, 2025, the current BDAG price is:

- Price: \$0.042
- Market Cap: \$58 million
- Circulating Supply: 1.38 billion BDAG
- Total Supply: 5 billion BDAG
- Rank: #316 by market cap (CoinGecko data)

## BlockDAG Technology Explained: Better Than Blockchain?

BlockDAG refers to a directed acyclic graph where blocks are not added sequentially but can reference multiple predecessors. This allows:

- Parallel block creation (vs. linear in blockchain)
- Higher throughput and minimal latency
- Better fault tolerance and decentralization

### Key Benefits:

Feature	Blockchain	BlockDAG
TPS	7-50	1000+
Confirmation Time	Minutes	Seconds
Energy Usage	High (PoW chains)	Low (PoS / DAG)
Forks	Problematic	Handled naturally

## BTCC FAQs

### Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the platform's infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

### Is KYC Necessary for BTCC?

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

### Is There a Mobile App for BTCC?

Indeed. For users of iOS and Android, BTCC has a mobile app. The exchange's website offers the mobile app for download. Since both the web version and the mobile app have the same features and capabilities, they are comparable.

### **Will I Have to Pay BTCC Trading Fees?**

Indeed. BTCC levies a fee for trade, just like a lot of other centralised exchanges. Each user's VIP level, which is unlocked according to their available money, determines the different costs. The BTCC website provides information on the charge rates.

### **Can I Access BTCC From the U.S?**

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
