BTCC Crypto Market Highlights (June 4)

1. Market Snapshot

Lee Jae-myung has been elected as the new President of South Korea, raising market expectations for the approval of spot crypto ETFs and the issuance of a Korean won-based stablecoin. Meanwhile, the U.S. steel and aluminum tariff hikes announced by Donald Trump will take effect from June 4, and Truth Social, the media platform associated with Trump, has filed for a Bitcoin ETF. The U.S. April JOLTS job openings came in higher than expected, boosting confidence in the labor market's resilience. BTC continues to move sideways, while market attention shifts to the U.S. May ADP employment data due tonight.

2. Global Marco & Policy Outlook

Key Events Today:

- U.S. May ADP employment data to be released (previous value: 6.2)

- The U.S. House Financial Services Committee will hold its second full hearing on crypto market structure and stablecoin regulation.

Major Macro Highlights:

1. U.S. Employment Data Beats Expectations

On Tuesday, the April JOLTS job openings stood at 7.391 million, above the expected 7.1 million. The previous figure was revised up from 7.192 million to 7.2 million. Ahead of Friday's May Nonfarm Payroll report, the Bureau of Labor Statistics indicated the report will include revisions due to redesigned survey methodology.

2. Lee Jae-myung Elected South Korean President

According to JTBC News, Democratic Party candidate Lee Jae-myung won the 21st presidential election. Lee has pledged to engage in dialogue with North Korea and boost economic growth. He has also expressed support for the approval of spot crypto ETFs and proposed issuing a Korean won-based stablecoin.

3. Trump's Steel and Aluminum Tariff Hike Effective June 4

On June 3, the White House announced that former President Donald Trump would double tariffs on imported steel and aluminum products from 25% to 50%, effective at 12:01 a.m. EDT, June 4, 2025. Trump cited national security concerns, stating that the previous tariffs had not sufficiently bolstered domestic capacity utilization to meet defense needs.

4. Fed Officials Sound Rare Unified Inflation Warning

On June 3, multiple Fed officials warned of renewed inflationary risks, partly due to Trump's proposed tariffs, which may lead to stagflation. Atlanta Fed President Bostic said inflation has not eased sufficiently, while Chicago Fed President Goolsbee warned tariffs could cause price spikes. Fed Governor Cook reiterated the importance of price stability and the need to remain flexible in policy response. Markets largely expect rates to remain unchanged at the June meeting.

5. California Assembly Passes Bitcoin Payment Bill

The California State Assembly passed Bill AB 1180 by a unanimous vote of 68-0, allowing the state to accept Bitcoin and other digital currencies as payment. The bill has now been sent to the state Senate for further review.

6. Ethereum Co-founder Joe Lubin in Talks with Sovereign Wealth Fund

Joe Lubin, Co-founder of Ethereum and CEO of Consensus, said on Tuesday that his firm is in discussions with a major sovereign wealth fund and leading bank from a "very powerful"

nation about building infrastructure based on Ethereum. He predicted Ethereum will enter a “decentralized supercycle” and may become the backbone of a new global financial system.

Traditional Market Recap:

- U.S. indices closed higher: S&P 500 +0.58%, Dow Jones +0.51%, Nasdaq +0.81%.
- Gold initially fell on stronger-than-expected job data but rebounded; currently trading at \$3,390/oz, up 0.4% intraday.
- South Korea’s KOSPI index rose over 2% in early trading after the election, now up ~15% YTD, leading among major Asia-Pacific markets.

3. Bitcoin Liquidation Map

Based on Coinglass data, at the current BTC price of \$105,474, a drop below \$104,000 could trigger \$1.5 billion in long liquidations across major CEXs. Conversely, a break above \$107,000 would trigger \$630 million in short liquidations. Traders are advised to manage leverage levels prudently.

4. BTC Long/Short Ratio

As of 10:00 AM, Coinglass reports the global BTC long/short ratio at 0.9216, with longs at 47.96% and shorts at 52.04%.

4. Blockchain Headlines

- Satoshi Nakamoto's net worth surpasses \$116.7 billion, overtaking Bill Gates
- Trump-affiliated Truth Social files for a Bitcoin ETF
- Vitalik: Ethereum leads in CR and security; Bitcoin leads in some other aspects
- Spanish coffee chain Vanadi plans to invest over \$1.1 billion in Bitcoin, rebranding as a "Bitcoin-first" company
- BlackRock's IBIT spot Bitcoin ETF enters top 25 U.S. ETFs, reaching \$72.4 billion AUM in just 1.4 years
- Sources: Pump.fun aims to raise \$1 billion via token sale, valued at \$4 billion
- Ethereum spot ETFs see \$109 million net inflow yesterday, marking 12 consecutive days of inflows

5. Institutional Perspectives- Daily Picks

- *Bloomberg*: Trump's meme coin wallet sparks intra-family crypto debate
- *Standard Chartered*: Corporate BTC accumulation boosts demand but could pose future sell-off risks
- *Metaplanet CEO*: Metaplanet tops Tokyo Stock Exchange in trading volume and turnover
- *K33*: Trump's tariff policy and U.S. budget bill to drive June crypto market volatility
- *10x Research*: Ongoing token unlocks and narrative fatigue stall altcoin market
- *Matrixport*: Bitcoin remains the capital favorite amid declining altcoin momentum

6. BTCC Exclusive Market Analysis

The stronger-than-expected U.S. April JOLTS job openings data has bolstered market confidence in labor market resilience, but also raised expectations for the Fed to maintain higher rates for longer, adding short-term pressure to risk assets. Meanwhile, the election of Lee Jae-myung, who supports spot crypto ETFs and a KRW-based stablecoin, could provide a medium-term boost to South Korea's crypto sentiment.

On June 4, BTC continued its sideways movement, trading at \$105,438, remaining within a short-term consolidation range. BTCC analyst Kevin noted that if BTC falls below the key support level of \$105,000, bears may push further toward the \$103,000 zone. Conversely, a breakout above \$106,500 could open the door to test the \$107,700 resistance level. Traders are advised to monitor key technical levels and wait for a clearer directional breakout.

Why Trade Crypto on BTCC

Founded in 2011, BTCC is among the world's oldest and most reliable bitcoin exchanges. Many traders use BTCC because it has established a solid reputation in the market for security and regulatory compliance over the years. The platform is especially well-suited for traders in North America and Europe, with presences in the US, Canada, and Europe.

In addition to bitcoin trading, BTCC provides traders with access to non-crypto assets including gold, silver, and U.S. equities through cutting-edge features like copy trading, perpetual futures, and tokenized stocks. Both novice and seasoned traders searching for a secure and regulated platform can benefit from BTCC's range of offerings.

The firm's products are designed to meet the needs and desires of both rookie and experienced traders. Here are five reasons for using the exchange:

- Numerous transferable assets
- Excessive trading leverage

- Strong copy trading capabilities
- Perfect security record
- Interface that is easy to use
- Accessible to traders in the US and Canada

How to Trade Crypto on BTCC?

This brief instruction will assist you in registering for and trading on the BTCC exchange.

Step 1: Register an account

The first step is to hit the “Sign Up” button on the BTCC website or app. Your email address and a strong password are all you need. After completing that, look for a verification email in your inbox. To activate your account, click the link in the email.

Step 2: Finish the KYC

The Know Your Customer (KYC) procedure is the next step after your account is operational. The main goal of this stage is to maintain compliance and security. You must upload identification, such as a passport or driver's license. You'll receive a confirmation email as soon as your documents are validated, so don't worry—it's a quick process.

Step 3. Deposit Funds

After that, adding money to your account is simple. BTCC provides a range of payment options, such as credit cards and bank transfers. To get your money into your trading account, simply choose what works best for you, enter the amount, and then follow the instructions.

- **Fiat Deposit.** Buy USDT using Visa/Mastercard (KYC required).
- **Crypto Deposit.** Transfer crypto from another platform or wallet.

Fund Your Account

I don't have crypto assets

Fiat Deposit

Fund your account with USDT using
Visa/Mastercard

P2P

Buy and sell cryptos with flexible payment
methods and 0 transaction fees.

I have crypto assets

Crypto Deposit

Get the deposit address for BTC, ETH, or any
other crypto and deposit via the blockchain.

Step 4. Start Trading

If you wish to follow profitable traders, you might go for copy trading, futures, or spot trading. After choosing your order type and the cryptocurrency you wish to trade, press the buy or sell button. Managing your portfolio and keeping track of your trades is made simple by the user-friendly

interface.

BTCC FAQs

Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the platform's infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater

security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

Is KYC Necessary for BTCC?

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

Is There a Mobile App for BTCC?

Indeed. For users of iOS and Android, BTCC has a mobile app. The exchange's website offers the mobile app for download. Since both the web version and the mobile app have the same features and capabilities, they are comparable.

Will I Have to Pay BTCC Trading Fees?

Indeed. BTCC levies a fee for trade, just like a lot of other centralised exchanges. Each user's VIP level, which is unlocked according to their available money, determines the different costs. The BTCC website provides information on the charge rates.

Can I Access BTCC From the U.S?

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
