BTCC vs Bitstamp: Overview

	BTCC	BTCC vs. Bitstamp	Bitstamp
Supported Cryptocurrencies	300+	Only 70+	
Fees	Compared with other major crypto exchanges, the fees charged by BTCC is relative low, such as only charging 0.06% for both takers and makers	Compared with other major exchanges, Bitstamp's fee structure is relatively competitive, such as charging no fees for trades valued at less than \$1,000	
Security	Industry-leading security, with no reported hacks or security breaches to date	Despite laying great emphasis on security, there is still room for improvement; in 2015, Bitstamp experienced a security breach, resulting a loss of roughly 19000 BTC	
Advanced Trading Features	Provide a large number of service, including spot trading, futures trading, and mining pools	Compared to BTCC, Bitstamp's feature set is limited, such as lack of margin trading, crypto derivatives features, NFT marketplace and a rewards card	

Customer Service	Offer 24/7 excellent customer service via email and live chat, provide demo trading and rich learn resource for newcomers	There are still room for improvement in terms of customer service, due to its absence of live chat for customer support
Service Scope	Offer service in more than 100 countries and regions with more than 6 million registered users	Offer service to over 4 million customers globally
Ease of Use	Intuitive interface, catering to both newcomers and experienced traders	Offer a beginner-friendly interface, but the platform may not cater to the needs of seasoned traders looking for advanced features

Comparison Summary

After comparison, it is not difficult to find that the two old exchanges we are looking at are very different trading platforms. BTCC is an all-encompassing crypto exchange that supports various types of trading features, along with crypto futures trading, spot trading, copy trading, demo trading, etc. Bitstamp, on the other hand, is an old-school exchange platform focusing purely on crypto trading through instant buying and spot trading features.

In total, BTCC provides much more choices to users than Bitstamp. BTCC is better for investors who:

- Focus on larger selection of tradable coins
- Lay great emphasis on trading security
- Have access to many advanced trading features, like margin trading
- Obtain excellent and timely customer support

How to Trade Crypto Futures on BTCC?

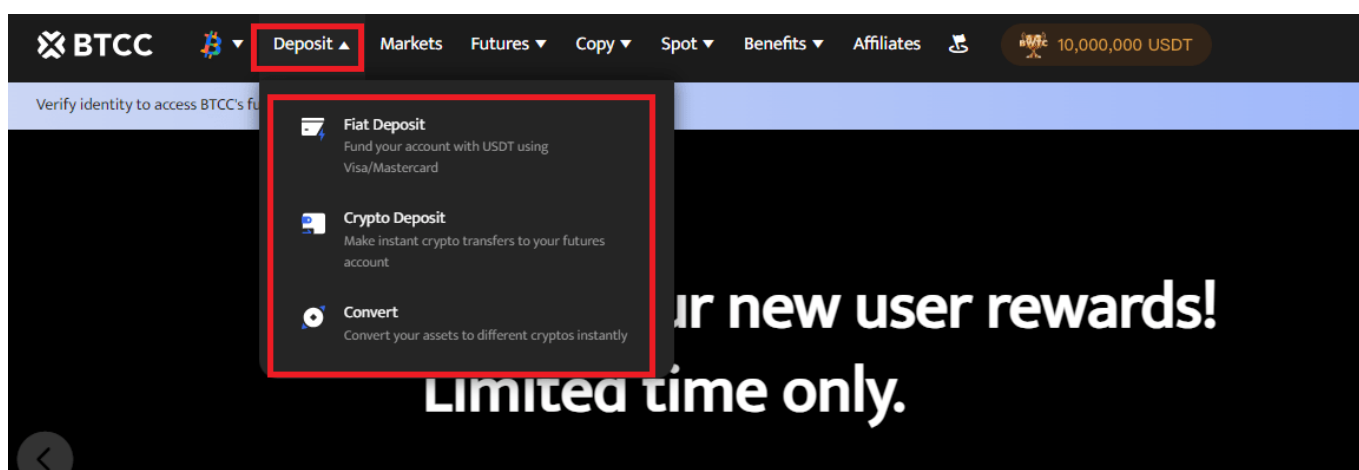

BTCC supports trading for USDT- M Perpetual Futures contracts with a leverage of up to 500x, you can trade over 300 cryptocurrencies on BTCC at the most competitive price and highest security.

The following sets forth the step-by-step guidance for crypto futures trading (take Bitcoin as an example) on cryptocurrency exchange BTCC:

Step One: go to the [BTCC homepage](#) and log in to your BTCC account. If you do not have an account, you need to [register](#) first.

Step Two: go back to the [BTCC official homepage](#), choose “Deposite”, and then fund your account with your preferred method (fiat deposit, crypto deposit or convert).

Step Three: go back to the BTCC official homepage, choose “Futures” -“USDT-M Perpetual Futures Contract”, and find BTC/USD trading pair.

You can also directly click the button below to enter the BTC order page.

[TRADE_PLUGIN]BTCUSDT,BTCUSDT[/TRADE_PLUGIN]

Step Four: choose the contract trading order type. Futures contract orders on BTCC platform include market orders, limit orders and SL/TP orders.

- **Market Order:** users place orders at the best price in the current market to achieve fast trading.
- **Limit Order:** Limit orders are a type of order to buy or sell futures at a price more favourable than the market price. When you buy at a price lower than the market price or sell at a price higher than the market price, the order will be in the form of a limit order.
- **SL/TP Order:** SL/TP orders are a type of order to buy or sell futures at a price less favourable than the market price. When you buy at a price higher than the market price or sell at a price lower than the market price, the order will be in the form of a SL/TP order.

The screenshot displays the BTCC futures trading interface. At the top, the leverage is set to 50x. Below this are 'Open' and 'Close' buttons. A red box highlights the order type selection area, which includes 'Market', 'Limit', and 'SL/TP' options. The 'Market' option is currently selected. Below the order type selection, there is a 'Free 0.00USDT' label and a 'Best Bid Price' button. A 'Quantity' input field is shown with 'BTC' as the selected currency. The 'Contract Value' is approximately 0.00USDT. A slider bar is visible below the contract value. There is a checkbox labeled 'Set TP/SL'. At the bottom, there are 'Open long' and 'Open short' buttons. The interface also displays 'Max long 0.00 BTC', 'Max short 0.00 BTC', and 'Margin 0.00 USDT'.

Step Five: adjust the leverage multiple.

Please keep in mind that operating leverage carries the risk of liquidation. Leverage should be adjusted based on your financial status and risk tolerance.

Step Six: choose the lot size and set the SL/TP price .

Step Seven: after setting the basic data information, users can choose to buy (open long) or sell (open short) after entering their ideal price. Traders should remind that the price cannot be higher or lower than the highest buying price or lowest selling price of the platform.

Step Eight: click the buy or sell button, and BTC futures contract order is completed.
