What Is Crow With Knife (CAW)?

Crow With Knife (CAW) is a meme-based cryptocurrency that has rapidly evolved from internet joke to full-fledged Web3 ecosystem token. Riding the wave of the infamous “crow with knife” viral videos and memes, CAW positions itself as a rebellious yet community-centric digital asset with DeFi features, NFT integration, and DAO governance.

Unlike joke meme coins that fizzle out, CAW offers:

- **Staking rewards**
- **NFT access**
- **Decentralized governance**
- **Real-time community voting on proposals**

Launched in early 2025, CAW started as an ERC-20 token and quickly bridged to Solana for scalability.

The Viral Origins of CAW: Meme Meets Crypto

The internet fell in love with videos of crows carrying knives—real, unedited clips showing the bird’s intelligence and eerie resemblance to calculated intent. As the meme gained traction, crypto developers saw an opportunity.

The Symbolism

- Crows = intelligence, adaptability
- Knife = disruption, chaos, precision

This mix became the backbone for Crow With Knife (CAW)—a crypto brand that’s edgy, smart, and agile.

Timeline:

- 2020-2021: Meme goes viral on Reddit, YouTube, TikTok
- 2024: Concept of CAW born in crypto Telegram channels
- Jan 2025: Token launch
- Mar 2025: NFT collection released
- Q3 2025: Over 35,000 holders

How CAW Coin Works: Utility and Ecosystem

CAW is more than just a meme—it’s a functioning ecosystem designed to reward holders and creators. Here’s how:

Core Utilities:

- Staking: Lock CAW tokens for passive APY rewards (up to 20%)
- NFT Integration: Use CAW to mint and trade “Knife Crows” NFTs
- DAO Governance: Propose and vote on future CAW developments
- Merch and Gaming: CAW is accepted in select Web3 stores and indie games

Unique Feature:

- Murder DAO: A decentralized autonomous organization governed by CAW holders, named after a group of crows (“a murder”).

Tokenomics of Crow With Knife (CAW)

Understanding CAW’s tokenomics helps gauge its long-term value.

Metric	Value
Token Ticker	CAW
Blockchain	Ethereum + Solana (Multi-chain)
Total Supply	999,999,999 CAW
Circulating Supply	680,000,000 CAW (July 2025)
Burn Mechanism	2% of each transaction
Staking Rewards Pool	15% of total supply
Team Allocation	10% (Locked for 1 year)
Community Airdrops	20% of total supply
Liquidity Lock	3 years

Deflationary Mechanism:

Every time someone buys or sells CAW, 2% is burned, reducing overall supply—this increases scarcity and long-term value.

BTCC FAQs

Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the platform's infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

Is KYC Necessary for BTCC?

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

Is There a Mobile App for BTCC?

Indeed. For users of iOS and Android, BTCC has a mobile app. The exchange's website offers the mobile app for download. Since both the web version and the mobile app have the same features and capabilities, they are comparable.

Will I Have to Pay BTCC Trading Fees?

Indeed. BTCC levies a fee for trade, just like a lot of other centralised exchanges. Each user's VIP level, which is unlocked according to their available money, determines the different costs. The BTCC website provides information on the charge rates.

Can I Access BTCC From the U.S?

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
