DOGS (DOGS) Price Prediction 2024,2025,2030- Is DOGS a Good Investment?

[Dogs](#) is a brand-new meme coin that debuted with the biggest [cryptocurrency](#) airdrop ever on [TON Network](#). The project quickly rose to the top 10 largest meme coins by market capitalisation after its initial trade frenzy twice destroyed the TON blockchain.

Traders and investors of meme coins are now wondering what will happen to \$DOGS. We'll examine \$DOGS in more detail and project the price of this meme coin in 2024, 2025, and 2030 in our Dogs price prediction.

[Open a free BTCC account and receive 10 USDT welcome bonus](#)

What Is DOGS Token?

Built on TON's proprietary blockchain technology is the DOGS token. Instead of giving most of its tokens to investors or team members, the project prioritizes giving them to the community. The DOGS tokenomics report states that the community will receive 81.5% of the total supply, with 73%

set aside for long-term Telegram users who would receive rewards based on their age and participation. This will encourage more community involvement. Six million confirmed users have asked to add DOGS tokens to their Telegram wallets or exchanges, demonstrating the project's already high level of community enthusiasm.

DOGS stands out from the crowd for a number of reasons:

- It has surpassed the 50 million-holder mark before the DOGS token listing, setting it apart from other meme tokens that have been issued.
- The TON blockchain, which is well-known for its integration with Telegram, is where DOGS is launched. Significant excitement may be stoked by such a link.
- The fact that the community owns more than 80% of the DOGS tokens means that massive sell-offs are less likely to occur and that the token price may eventually settle.

It is impossible to forecast price swings due to the DOGS token's unique characteristics and quirks, which may generate a fresh surge of enthusiasm about the project's potential. But here are a few ballpark figures:

- Assume a market cap of \$55 billion; aim for \$0.10.
- With a market capitalization of \$100 billion, the extreme target is \$0.2.
- The most probable range is \$0.04 (equivalent to \$22 billion in market cap) to \$0.07 (equivalent to \$38 billion in market cap).

DOGS (DOGS) Price History

With an initial listing price of approximately \$0.0011, \$DOGS debuted on August 26, 2024. With extra tokens reserved for centralised exchanges, the coin went live with a free airdrop to over 42 million Telegram members. For instance, Binance held a restricted launchpool where investors could purchase \$DOGS tokens, which accounted for four percent of the total supply.

The massive \$DOGS airdrop and trading that followed caused a seven-hour outage on the TONNE network. As token claims persisted and trading volume stayed above \$1 billion, the blockchain saw another fall yesterday.

A dramatic increase in the price of \$DOGS to \$0.0016 occurred following the arrest of Pavel Durov in France. Following that, on September 1, 2024, its price dropped to its present level of \$0.0012. At the moment, \$DOGS is the ninth most valuable meme coin, with a market cap of \$628.66 million.

📄 Name	DOGS
📄 Symbol	DOGS
📄 Rank	#75
📄 Price	\$0.0015180934646984

DOGS (DOGS) Price Prediction 2024-2030

Our Dogs price forecast mostly includes the following information:

- The current Dogs price on September 1, 2024, according to our real-time \$DOGS to USD price chart, is \$0.0012.
- In just three days since its introduction, Dogs has risen to become the ninth-largest meme coin in terms of market value, with a current valuation of \$628.66M.
- We anticipate that \$DOGS will maintain its upward trajectory throughout 2024’s last months, eventually reaching \$0.0014.
- We anticipate that Dogs will trade at an average of \$0.0015 in 2025, with a possible peak of

\$0.0032 by 2030's close.

From 2024 to 2030, we have compiled the following Dogs price forecast:

Year	Average Price	Potential Low	Potential High
2024	\$0.0013	\$0.0012	\$0.0014
2025	\$0.0015	\$0.0013	\$0.0016
2030	\$0.0032	\$0.0020	\$0.0050

DOGS (DOGS) Price Prediction 2024

One of the biggest token launches in crypto history happened this week, and it set the crypto market ablaze. More than 42 million people, including all users who had engaged with the Dogs mini-app in Telegram before its launch, received tokens through an airdrop from the initiative.

The TONNE blockchain has had two crashes in the three days since \$DOGS began trading, perhaps due to the massive scope of the launch. But that doesn't change the fact that over \$1 billion is still traded in \$DOGS. With a market capitalisation of \$628.66M, the token is the ninth biggest meme coin and is almost caught up to the leading Base meme coin, \$BRETT.

Although the \$DOGS token has lost 11% of its value since its airdrop launch, this does not appear to be a negative indicator for the token's future. Given that \$DOGS was distributed at no cost, it is not surprising that many recipients choose to cash out their tokens right away.

The number of individuals who are clinging to their \$DOGS tokens is astonishing. An enormous and devoted following was formed by the project in an instant. It helped that the project's release coincided with the arrest of Pavel Durov, founder of Telegram, which prompted a flood of support from people in the crypto community and on Telegram.

It seems that \$DOGS will be around for a while, as it is now the biggest meme coin on TONNE. Binance, Bybit, OKX, Bitget, and Gate.io all feature the \$DOGS cryptocurrency for trade, and its Telegram channel has approximately 17 million users.

This bodes well for \$DOGS, which should have plenty of momentum to ride out into the fall. By year’s end, we anticipate \$DOGS will have risen to an average price of \$0.0014.

Our forecast for the next six months’ worth of \$DOGS price action is as follows:

Month	Potential Low	Average Price	Potential High
October 2024	\$0.0012	\$0.0012	\$0.0012
November 2024	\$0.0012	\$0.0012	\$0.0012
December 2024	\$0.0012	\$0.0012	\$0.0013
January 2025	\$0.0012	\$0.0013	\$0.0013
February 2025	\$0.0012	\$0.0013	\$0.0014
March 2025	\$0.0012	\$0.0013	\$0.0014

DOGS (DOGS) Price Prediction 2025

We expect Dogs’ momentum to persist beyond 2025, with the help of a robust crypto bull market that attracts additional investors to popular meme coins.

The potential for Bitcoin's price to reach \$200,000 in 2025 has analysts predicting a crypto trading frenzy and increased visibility for meme coins such as \$DOGS. Meme currencies have historically benefited from the increased use of high-risk, high-reward investing strategies that have been spurred by Bitcoin's ascent.

In 2025, Pavel Durov's and Telegram's future will be the greatest mystery. Durov was recently indicted with numerous offences by the French government. With all eyes on Durov in 2025 (and maybe even a trial), \$DOGS will only rise in value and become a meme coin representing defiance of authority. As a show of support for Durov, millions of people will likely purchase and hold \$DOGS because that is a topic that many in the crypto and Telegram communities find meaningful.

However, government-sponsored assaults on Telegram's core operation might significantly damage \$DOGS. Since Telegram is integral to the TONNE blockchain and the meme coin in particular, a drop in Telegram's user base might lead to a precipitous drop in the value of \$DOGS and other prominent TONNE meme coins.

Although Telegram may see regulatory challenges in 2025, we do not anticipate a significant assault on the platform at that time. If Telegram were a nation, its community of over 900 million users would dwarf all but two nations. France is the only European country that will face significant challenges in dismantling the platform.

Considering all of information, we anticipate that by 2025, the average price of \$DOGS will reach \$0.0015, with a potential high of \$0.0016.

[TRADE_PLUGIN]BTCUSDT,ETHUSDT[/TRADE_PLUGIN]

DOGS (DOGS) Price Prediction 2030

We anticipate that Dogs will continue to grow in value and prominence over the coming years,

making it the most valuable meme coin on TONNE Network. With a market cap that is 150 times larger than Povel Durev, the second most valuable meme coin, there aren't many serious contenders that could unseat it.

This is significant because we expect the TONNE blockchain and Telegram to have tremendous growth in the second part of the decade, which is reflected in our TONNE price projection. As more capital enters the TONNE Network, a large chunk of it will most certainly go to \$DOGS, the ecosystem's most popular meme coin.

Another possibility is that \$DOGS will strengthen its ties to Telegram. Not only does the messaging app have an in-built wallet for TONNE ecosystem tokens like \$DOGS, but it might also support paying group moderators using \$DOGS instead of just \$TONNE. In addition, \$DOGS may introduce a tap-to-earn game on Telegram in the vein of Notcoin or develop a new token ecosystem on the platform in the style of Shiba Inu.

There may be some mystery around the future of the coin, but all signs point to upward price movements for \$DOGS. By the end of the decade, our \$DOGS price projection has us pegged the average price at \$0.0032, representing a difference of 167.38% from today's price.

This is the complete range of prices we predict for \$DOGS between 2026 and 2030:

- **2026:** \$0.0018
- **2027:** \$0.0021
- **2028:** \$0.0025
- **2029:** \$0.0029
- **2030:** \$0.0032

Is DOGS a Good Investment?

Despite the enthusiasm in the crypto world for the project's listing, there are a number of important considerations when assessing the DOGS project's viability as an investment.

Cons:

- Concerns regarding the DOGS project's transparency have been raised due to the lack of information regarding its developers.
- Due to the big airdrop and quick listing on major exchanges, the token's early trading days may be very volatile.
- Gain booking concerns will be magnified once the token is live on exchanges due to the negative price action leading up to the launch and the enormous token unlock (502.48 billion tokens, or 91.4% of supply) on 26 August.
- There will be no guarantee of community involvement once the coin hits the market as long as its success depends on its continuous utility inside the Telegram ecosystem.

Pros:

- A large portion of the 53 million users that DOGS token has rapidly attracted will be able to participate in the forthcoming airdrop.
- An innovative "Dogenomics" feature of the token gives 81.5% to the community and 73% to Telegram OGs, which can increase its popularity.
- One of the most prominent exchanges now lists the DOGS coin.
- In order to encourage more participation in the DOGS ecosystem, Telegram premium subscribers get extra incentives and benefits.

When choosing to invest in new projects or take part in airdrops, keep in mind that all cryptocurrency investment has some degree of risk. You should never put your money into DOGS (or any cryptocurrency) without first doing your homework.

Where to Trade Crypto Futures?

You can trade crypto futures on BTCC Now. Over 300 USDT-margined perpetual trading pairs are available for users to trade, including many popular altcoins and meme-coins.

[**Trade crypto futures Now**](#)

You can deposit and receive up to [10,055 USDT](#) now when you sign up and verify your account on BTCC. Every new user gets a **10 USDT** coupon after completing their registration. You will also get an additional **20 USDT** coupon on completing your KYC verification.

About BTCC

BTCC is a leading cryptocurrency trading platform that is distinguished by its ability to balance the simplicity of use with advanced features. It provides a comprehensive educational program through the BTCC Academy, 24/7 customer support, and robust security to both novices and experts. BTCC is a top choice for digital asset investors due to its emphasis on user contentment, which fosters a secure and informed trading environment across a variety of cryptocurrencies.

BTCC is one of the few exchanges in the market that offers high-leverage options for investors and concentrates extensively on futures trading. Users have access to more than 300 USDT-margined perpetual trading pairs, which encompass numerous prominent altcoins and meme-coins. Additionally, the platform has recently implemented spot trading to facilitate novice users who may not be acquainted with futures trading.

- **Established Reputation:** BTCC is one of the oldest and most well-known cryptocurrency exchanges, having been operational since 2011. Its history in the market enhances its credibility and trustworthiness.
- **A Diverse Selection of Cryptocurrencies:** BTCC allows customers to access and exchange a wide range of digital assets.
- **Margin and Futures Trading:** BTCC provides margin and futures trading options, allowing customers to expand their trading holdings and potentially increase their profits.
- **Proficient Trading Instruments:** such as real-time market data, trading charts, and technical analysis indicators. These tools can help users make informed trading decisions.
- **Security Measures:** BTCC values security and uses a variety of safeguards to secure customer payments and information. This includes two-factor authentication (2FA) and cold storage of cryptocurrency assets.
