Fantom (FTM) Price Prediction in 2022: Will FTM Reach \$1?

When it comes to funding, the [crypto](#) community has been more than kind to ambitious and forward-thinking endeavors. that significantly alter the system by providing novel benefits. With its support for smart contracts, Fantom is one such protocol that could change the face of the [DeFi](#) industry.

Launching the FTM token was motivated by a desire to ensure interoperability among all existing transaction infrastructures. The platform's scalability is enabled by the "Direct Acyclic Graph" (DAG) smart contract architecture.

Marketers' attention has been piqued by the network's specific characteristics and the recent 335 M FTM incentive offer. Who is interested in whether or not the FTM price will reach \$5 by 2022? Do you consider yourself to be one of the many investors that are interested in FTM? We've done the legwork for you and displayed what we believe to be a reasonable price forecast for FTM through 2022 and beyond.

Fantom (FTM), Explained

Fantom is a decentralized smart contract platform that is open source and requires no special permissions to use. Crafted to fix the problems of the first blockchains. The DeFi token employs a novel authorization protocol for aBFTs dubbed Lachesis. Because of this, the token platform can function at a considerably higher speed and lower cost than was possible with earlier technology.

In order to address technical issues with smart contract platforms, including slow transaction times, Fantom has developed its own coin, called FTM. The developers, so the rumor goes, believe they've gotten the time down to under two seconds. The alternative currency uses a very secure leaderless Proof-of-Stake process. Not only that, but the protocol is ERC 20 and BEP 2 compliant as well.

Fantom (FTM) Price Prediction in 2022

With a price of \$2.2552, FTM pricing had begun its journey to the year 2022. By January 17th, the altcoin had reached its quarterly high of \$3.374. However, on January 22nd, the FTM price had fallen to \$1.8100, indicating that the increase had been temporary. On February 24th, at a price of

\$1.314, FTM saw its price drop to its all-time low. The first quarter ended at \$1.5430 after a brief upswing.

The price of Fantom in the second quarter was \$1.613 per share. The altcoin died in the second quarter as the industry as a whole experienced turmoil due to the insolvency crises of big companies. With a loss of almost 80% for the quarter, operations were halted at \$0.2452.

Fantom (FTM) Price Prediction in Q3

As a result of the 335 million FTM incentive program's success, volumes have increased, and new dapps have been deployed. Until the conclusion of the quarter, the digital asset's price has the potential to rise to \$0.4365.

But investors' and traders' priorities are at odds, and their efforts aren't producing the results they'd hoped for. A drop of \$0.3075 for FTM is possible. However, if neither the bears nor the bulls have any say in the matter, the middle price can settle around \$0.3675.

Fantom (FTM) Price Prediction in Q4

In the final three months of 2022, the FTM price might spark a rocketing surge if retailers and wholesalers maintain their optimistic view. More people may be interested because of the social attitudes. By the end of 2022, this may have influenced FTM's price to reach its quarterly high of \$0.5765.

While normal conditions and routine transactions may keep the price at its current level of \$0.475. If the bears get the better of the bulls and the market crashes, that is. By the end of the year, the price of Fantom may find stability around \$0.4015.

Fantom (FTM) Price Prediction in 2023

If conditions are favorable to Fantom's objectives, measures like incentive programs, network perks, and the stance of the community may be implemented. The protocol's popularity could grow, attracting more backers. As a result, the price may rise to the yearly high of \$1.068.

But if things don't go as planned and the digital asset is attacked by false information and skepticism (FUD), then the opposite is true. Assuming no further price drops occur, the altcoin's value would bottom out at \$0.518. All things considered, a price of \$0.73 per coin seems reasonable for the digital asset.

Fantom (FTM) Price Prediction in 2024

The pie chart displays the breakdown of addresses kept over time. At this time, 67.58k cruisers have the lion's share of FTM. Next came the 19.77,000 holders, then the 67.58,000 traders. You can see from the rising trend of the hodler count that the past year has been a very busy one for the cryptocurrency market. The increase in FTM hodlers bodes well for the future growth of its price.

Successively, seeking stimulus from hodlers the price would remain resilient to enormous downswings. Conversely, the boost in bullish volumes will aid FTM price rise to a maximum of \$1.729. On the other side, it might take a tumble to the lows of \$0.869. That being said, the average price might land at \$1.242.

Fantom (FTM) Price Prediction in 2025

Long-term price forecasts require an examination of the asset's track record. And its behavior when bears rule the market. From a chronological standpoint, Fantom has historically been quite sensitive to market swings. To put it another way, by the end of 2025, the price might have flipped to at least \$1.391.

This lightning-fast smart contract platform may see the price of the coin rise to \$3.045 if it continues to develop at its current rate of growth. This could be spurred on by rising protocol usage. Together with fruitful connections and partnerships. Fantom's price may find stability at \$1.987 if its historical trend is any indication.

Fantom (FTM) Price Prediction in 2022: FAQs
