### **GUNZ (GUN) Price Prediction: How High Can GUN Go Post Binance Listing?**

GUNZ, a blockchain network created by Gunzilla Games, a video game company known for its battle royale game Off The Grid, is generating great buzz in crypto landscape. On March 27, Binance, a leading global cryptocurrency exchange, has unveiled its 66th Launchpool project: GUNZ (GUN). On March 31, GUNZ (GUN) was launched on Binance and other crypto exchanges, marking a major milestone for Web3 gaming.

With its listing on Binance and other major crypto exchanges happening on March 31, all eyes are on GUN's price reaction. Then, what is GUNZ (GUN)? How high can GUN go post Binance listing? This article will offer a price analysis and prediction for GUNZ (GUN), offering valuable insights for potential investors.

## What is GUNZ?

Developed by Gunzilla Games, GUNZ is a blockchain-based platform originally designed to support the player-driven economy of its flagship game, Off The Grid (OTG). However, it has since evolved into a full-scale blockchain infrastructure tailored for modern game development.

GUNZ is built on a Layer 1 Avalanche subnet, leveraging its scalability and energy efficiency to manage the gaming ecosystem seamlessly. By integrating blockchain technology, GUNZ ensures true ownership and tradeability of in-game assets, fostering a decentralized, player-driven economy within gaming environments.

Through blockchain and non-fungible tokens (NFTs), GUNZ enables players to own, acquire, and exchange in-game assets as digital collectibles. Additionally, users can earn passive income by renting out their digital assets, further enhancing the economic opportunities within the platform.

Currently, GUNZ is in its development phase, with a testnet already live processing a high volume of transactions. According to community updates, the mainnet launch is on the horizon, marking an important milestone in its evolution as a leading blockchain gaming ecosystem.

[TRADE\_PLUGIN]BTCUSDT,BTCUSDT[/TRADE\_PLUGIN]

# Key Features of GUNZ

GUNZ operates as a decentralized gaming ecosystem with many interesting features. Its key features include:

## Blockchain technology

GUNZ is a standalone Layer 1 (L1) blockchain that operates as a subnet within the Avalanche ecosystem. As a subnet, GUNZ leverages some of Avalanche's core features and infrastructure to achieve high throughput and low latency. Still, GUNZ works independently with its own group of validators.

The GUNZ blockchain is fully compatible with the Ethereum Virtual Machine (EVM) and Solidity-based smart contracts.

## Game integration

The first game to utilize GUNZ is Off The Grid, a free-to-play battle royale shooter. The game incorporates blockchain mechanics in a way that does not disrupt the core gaming experience.

Players who wish to engage with blockchain elements can collect and trade NFTs, while those who prefer a traditional gaming experience can play without interacting with crypto assets.

## In-game assets and NFTs

GUNZ enables the creation of in-game assets as NFTs. Players can earn, buy, or trade these assets on the GUNZ marketplace. One unique feature in Off The Grid is the presence of loot boxes called HEXes.

Players can collect HEXes during matches and decode (open) them to create NFTs. These NFTs can then be traded, used, or transferred across compatible games. The process of decoding HEXes involves the work of validators who hold Validator NFTs.

## Validator NFTs

You can think of Validator NFTs as software nodes responsible for minting in-game items on the GUNZ network. According to the official website, there are five types of Validator NFTs, each with a different power level, commission rate for resales, and hash power. Higher-rarity NFTs have better chances of being selected for a decoding transaction.

These NFTs can generate two types of rewards. The first comes from decoding HEXes. When a player decodes a HEX, a Validator NFT will be selected to handle the process and mint a new in-game item. The GUN fees paid by the player are then rewarded to the NFT owner while some GUN tokens are burned.

The second type of reward comes from resale commissions, meaning that Validator NFT owners can get a share of the commissions every time the minted items are traded on the GUNZ marketplace.

## Developer tools

GUNZ provides a suite of tools to help game developers integrate blockchain into their projects. These tools may include APIs for creating tokens and NFTs, a blockchain scanner for tracking transactions, a mobile app for iOS and Android, a marketplace for trading assets, and more.

Such developer tools make it easier for developers to incorporate blockchain technology into their games without requiring expertise in smart contract development.

The GUN token is the native digital currency of the GUNZ gaming platform, designed to support a decentralized economy across participating games like Off The Grid (OTG) and Technocore. Serving as both a utility and reward token, GUN enables players to trade, purchase, and unlock in-game items and features. Unlike traditional game currencies that are confined to a single title and controlled by a central authority, GUN operates on a blockchain, ensuring verifiable ownership and interoperability across multiple games.

Within the GUNZ ecosystem, GUN is primarily used to facilitate transactions in the in-game

marketplace. Players can buy, sell, and trade tokenized NFTs, including weapons, character enhancements, cosmetic upgrades, and hideout features. This player-driven economy allows gamers to extract real-world value from their in-game progress, exchanging digital assets in a secure, transparent environment.

GUN is also tied to gameplay incentives. Players can earn tokens by completing challenges, ranking highly in matches, extracting valuable loot, or utilizing specific gear effectively. This system promotes active participation and skill development, rewarding players not only with in-game progression but also tradeable digital assets that can be reinvested, traded, or held as a store of value.

**At present, \$GUN token is not available on BTCC platform at present. However, it is worth mentioning that BTCC, one of the longest-running crypto exchanges in the world, supports trading for 300+ cryptocurrencies with a leverage of up to 500X. If you want to start trading cryptocurrencies, you can start by signing up for BTCC.**

## **GUN Tokenomics**

The GUN token, native to the GUNZ gaming ecosystem, has a fixed maximum supply of 10 billion tokens, ensuring a clear cap on issuance to maintain scarcity and long-term value.

At the time of its public listing, the initial circulating supply will be approximately 604.5 million GUN, accounting for 6.05% of the total supply. To drive early adoption and liquidity, 400 million GUN tokens (4% of total supply) have been allocated as rewards through Binance Launchpool. Users can farm GUN by staking BNB, FDUSD, or USDC, with incentives structured as follows:

- 80% of the rewards are allocated to the BNB pool, reflecting its dominant role in the ecosystem.
- The remaining 20% is evenly split between the FDUSD and USDC pools, promoting diversified participation.

This initiative encourages early engagement and liquidity provisioning, strengthening the token's presence across multiple asset pools.

Besides, detail information about GUN token distribution sets as below:

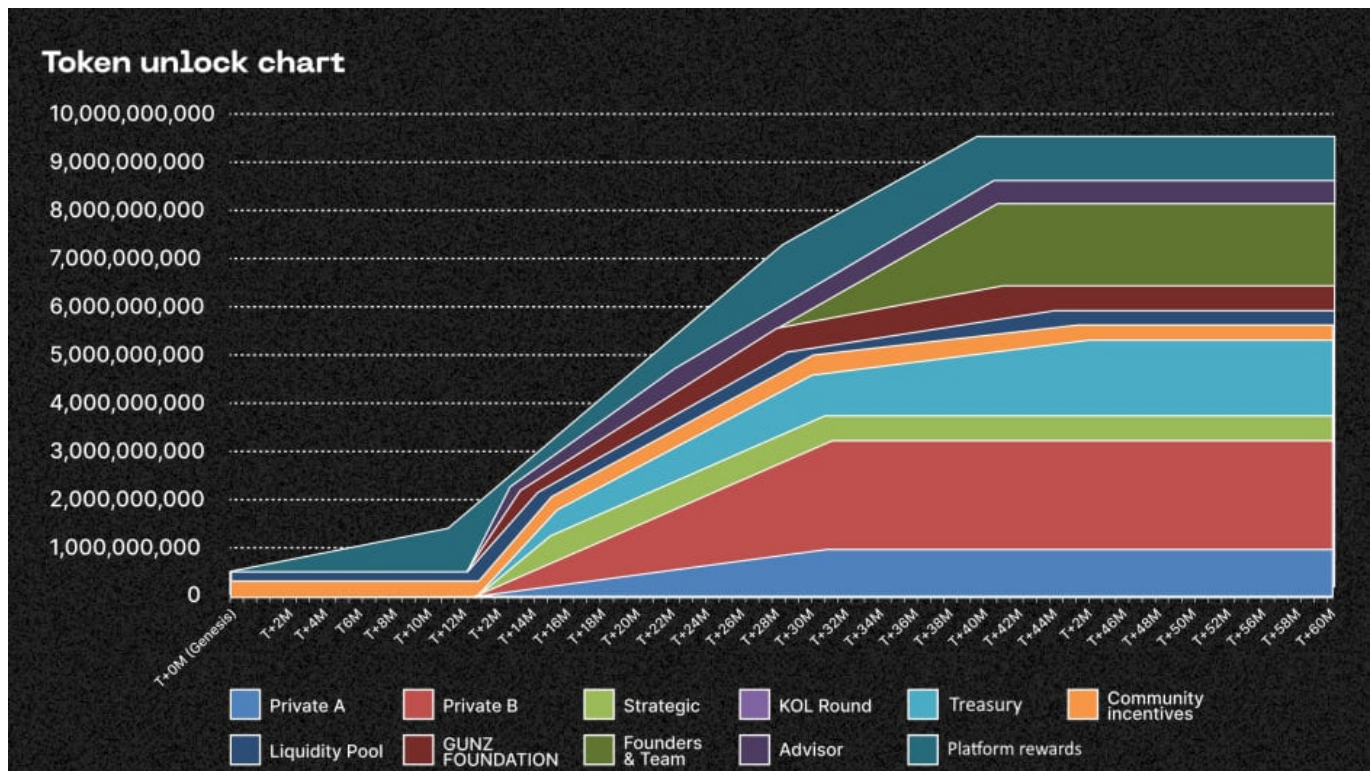

# \$GUN TOKENOMICS

|                       | TOKEN ALLOCATION      | % OF TOTAL SUPPLY | DAY @ UNLOCK  | CLIFF, MONTHS | VESTING, MONTHS |

| <b>TOTAL SUPPLY</b>   | <b>10,000,000,000</b> | <b>100.00%</b>    |   |               |                 |

In order to retain the gaming ecosystem and long-term ownership among society, there will be a token burn mechanism, a token buyback, and fair distribution for stakeholders and distributors. This system aims to maintain the game's sustainability while also creating consistent demand for the GUN token.

Gunzilla Games will dedicate 30% of the revenue generated by their game, Off The Grid, to regularly buy back GUN tokens from the market. The game will then use these tokens to replenish its reward pool and distribute them to players based on their performance, at a rate already shown on the main website.

## GUN Token Secures Listing on Binance and More other Crypto Exchanges

On March 27, 2025, Binance announced GUNZ (GUN) as the 66th project on Binance Launchpool. Users who locked their BNB, FDUSD, and USDC during the farming period are eligible to receive GUN airdrops. A total of 400 million GUN were allocated to the program.

On March 31, Binance Futures launched the GUNUSDT Perpetual Contract with up to 75x leverage at 13:00 (UTC). Besides, Binance Margin also added GUN as a borrowable asset, including GUN/USDT pairs, starting March 31 at 13:20 UTC.

What's more, the team behind GUNZ announced via X, that the coin went live on Binance and other exchanges, including Bitget, Gate.io, Bitfinex, Kucoin, and MEXC.

[\\$GUN](#) is now live on Binance and more exchanges!

With \$15.8B+ USD staked and 1.7M+ participants in Binance Launchpool, GUNZ just set a 7-month engagement record.

A new era for Web3 gaming starts now. [pic.twitter.com/lke0xzB8IN](https://pic.twitter.com/lke0xzB8IN)

— GUNZ Official (@GUNbyGUNZ) [March 31, 2025](#)

They also noted that with more than \$15,8 billion staked and over 1,7 million in Binance Launchpool participants, GUNZ set a 7-month engagement record. They said that a new era for Web3 gaming

starts now.

## Is GUNZ (GUN) a Good Investment in 2025?

GUNZ is more than just another game—it’s a groundbreaking fusion of next-gen gameplay and cutting-edge Web3 technology. Designed as a player- and developer-friendly blockchain gaming platform, GUNZ integrates NFTs, cryptocurrency transactions, and decentralized infrastructure, offering an unparalleled level of ownership and engagement. With its dynamic marketplace, NFT integration, and decentralized economy, this Layer 1 project redefines the gaming experience by empowering players and expanding creative possibilities for developers.

The GUN token has made a high-impact debut across multiple crypto exchanges, gaining significant traction in the market. Its integration with Binance’s diverse trading platforms has further solidified its presence, driving high participation rates and notable price volatility—a testament to the intense market interest in this Web3 gaming asset. However, while GUNZ shows tremendous potential, the blockchain gaming industry remains highly competitive. Its long-term success will ultimately depend on consistent innovation, strong community adoption, and strategic execution.

## How to Buy the GUNZ Token?

On March 31, GUN Token secured listing on major crypto exchanges like Binance, Bitget, Gate.io, Bitfinex, Kucoin, and MEXC, etc., where interested investors can buy this crypto.

Unfortunately, \$GUN token is not available on BTCC platform at present. However, it is worth mentioning that BTCC, one of the longest-running crypto exchanges in the world, supports trading for 300+ cryptocurrencies with a leverage of up to 500X. If you want to start trading cryptocurrencies, you can start by signing up for BTCC.

That's all information about GUNZ (GUN). If you want to know more information about GUNZ (GUN) and other cryptocurrencies, please visit [BTCC Academy](#).
