What Is Hamster Combat?

A popular tapping game on Telegram, Hamster Kombat is similar to its forerunner, the Notcoin clicker game. Playing as the head honcho of a made-up cryptocurrency exchange, each player must conquer 10 levels to elevate their startup to the pinnacle of their field in Hamster Kombat. In the

hilarious and strategic Hamster Kombat Telegram game, you may earn virtual currency in a variety of ways, such recruiting friends, finishing tasks, joining the Hamster Telegram group, mining, boating energy, etc. Player anticipation is already high because to the TONNE networks’ upcoming debut and airdrop of the Hamster Kombat coin.

With the launch of Hamster Kombat Telegram, a native token called HMSTR was introduced. The airdrop will be revealed in July of 2024, and the listing is set for June of the same year.

Hamster Kombat Coin Price Prediction 2024-2030

On Telegram, you can find the tap-to-earn minigame called Hamster Kombat. With each tap, players can win cash by interacting with a hamster. Players can tap as much as they want and earn as many coins as they want.

Many gamers and cryptocurrency investors see Hamster Kombat as a potential successor to Notcoin, which may explain its meteoric rise to popularity. Launched in May, Notcoin allowed users to convert their in-game coins to the \$NOT cryptocurrency over the TONNE Network blockchain. It was one of the first tap-to-earn games on Telegram.

Instantaneous results: Notcoin’s price skyrocketed from \$0.01 at inception to \$0.029 two weeks later, with a market cap of nearly \$3 billion at its peak. Before the \$NOT coin debut, several gamers tapped to earn, and they became crypto millionaires almost immediately.

Anyone using Telegram or trading cryptocurrencies is jumping at the chance to tap and earn, and now Hamster Kombat seems to provide a similar option. Since its release at the tail end of March, the fighting game Hamster Kombat has amassed over 150 million gamers. More than 8.8 million people are following the initiative on X as well.

That ranks it among the most played video games of all time in terms of virality, irrespective of the platform. With more than 800 million people using Telegram, Hamster Kombat has plenty of room to develop.

Hamster Kombat Coin Price Prediction 2024

When the Hamster Kombat cryptocurrency token releases in July, Notcoin will be the greatest resource for estimating its potential value. The value of Notcoin's token, which was launched at a price of \$0.01, increased by 190% in under two weeks. It has surpassed the native \$TONNE token on the Toncoin blockchain in value and is currently the second most valuable cryptocurrency within the Toncoin ecosystem.

Due to a lack of official announcements, we can only speculate as to the exact pricing of the Hamster Kombat token, but we expect it to launch in July at \$0.01, matching the price of \$NOT. Given the immense popularity of Hamster Kombat compared to Notcoin, we anticipate that the token for Hamster Kombat might enter the market with a valuation exceeding \$1 billion upon debut.

We anticipate that demand for Hamster Kombat's cryptocurrency will skyrocket following the launch. Its enormous social media following and the fact that it has successfully attracted regular Telegram users to its tap-to-earn game give it the potential to pump harder than Notcoin. We estimate a possible gain of 7.5x, leading to a price of \$0.075.

This is our most optimistic forecast for Hamster Kombat in 2024, since we do not believe the token can maintain its current price. Profitable traders in the token launch will probably unload their holdings at the all-time high, causing the price of Hamster Kombat coins to fall again. We estimate the coin's market cap to be close to \$4 billion, with support at \$0.04.

We project the following annual changes to the price of the Hamster Kombat cryptocurrency:

2024	Price
September	\$0.060
October	\$0.050
November	\$0.035
December	\$0.040

Hamster Kombat Coin Price Prediction 2025

Hamster Kombat will encounter a unique concoction of opportunities and challenges in the year 2025.

According to proponents of the Hamster Kombat coin, the game will entice millions of Telegram users to try cryptocurrency for the first time, which will increase demand for all tokens.

The popularity of Hamster Kombat may also persuade current cryptocurrency holders to transfer their holdings to the TONNE Network. Because of the TONNE Network's meteoric rise to prominence in the cryptocurrency market, that development is worthy of special mention. Total value locked (TVL) for the network has increased 20 times since March, reaching \$600 million.

The value of Hamster Kombat's cryptocurrency will certainly rise as the number of users on TONNE Network increases, since more people will likely purchase it.

Other tap-to-earn games, such as TapSwap and W-Coin, will also pose a threat to Hamster Kombat. The popularity of Hamster Kombat could take a hit if these games attract more players and viewers, which would be bad news for the Hamster Swap coin.

Another possible competitor to Hamster Kombat would be TONNE Network meme currency. The greatest long-term strategy for Hamster Kombat after its tap-to-earn airdrop is to become a meme coin for TONNE Network users. The number of people involved with Hamster Kombat could decrease if new meme coins such as Resistance Dog or TONNE Fish Memecoin get more traction than it does.

Overall, we're keeping our fingers crossed that Hamster Kombat can make some progress in 2025. Because of its partnership with Telegram and superior dependability in comparison to other lightning-quick blockchains like Solana, we anticipate further fast growth for TONNE Network. We also think that the enormous fan base of Hamster Kombat will ensure the success of this

cryptocurrency as it evolves into a viral meme coin.

Based on this information, we project that the average price of Hamster Kombat in 2025 will be \$0.055, with a possible maximum of \$0.110. If that price were to hold, Hamster Kombat's market valuation would be second only to \$TONNE, representing an 11x gain for gamers today.

Low	\$0.020
Average	\$0.055
High	\$0.110

Hamster Kombat Price Prediction 2026- 2030

Our faith in Hamster Kombat's capacity to continue being relevant after 2025 is dwindling. More sophisticated and interesting play-to-earn crypto games will most certainly supersede the initial tap-to-earn game with the cryptocurrency, particularly if metaverse development progresses and users seek out more immersive gaming experiences.

Furthermore, no meme coin has been successful in maintaining its appeal for longer than a few years. There is a lot of grassroots meme culture surrounding Dogecoin, Shiba Inu, and Pepe, but not Hamster Kombat. So, while Hamster Kombat's meme status might help it in 2025 and maybe even 2026, we don't see it going widespread after 2027.

Consequently, the token's value will gradually decline after 2025, according to our Hamster Kombat estimate. By the end of the decade, we expect the average price of HMSTR to be \$0.020, which would bring Hamster Kombat's price back to almost its initial coin offering price.

2027	\$0.040

Is Hamster Coin a Good Investment?

Hamster Kombat cannot be purchased. The only way to get your hands on it is to play the Hamster Kombat game and tap to earn. Then, when it drops, you may trade in your in-game cash for the cryptocurrency.

Time is the only variable, therefore it's no wonder over 150 million Telegram users have begun earning bitcoin using the Hamster Kombat bot. Later this summer, the Hamster Kombat cryptocurrency could offer a 7.5x pump, which would be even more impressive than Notcoin's growth.

Our Hamster Kombat price forecast indicates that the token may have further upward potential until 2025, providing even greater rewards to community members who hang on to it.

But if you're looking for a cryptocurrency to hold for the long haul, Hamster Kombat isn't it. In 2026 and beyond, the token will encounter challenges that can lead to a decline in its value by the decade's conclusion. Accordingly, 2025 might be a good year to begin selling Hamster Kombat token hoards.

Can I Earn Money Using the Hamster Kombat Airdrop?

Notcoin was listed successfully, and active users made a profit, as is already known. Is the Hamster Kombat airdrop going to be any different? We can find a way to do it.

The tapping game that is played over Telegram has some rumours going around. We expect \$HMSTR to become public at some point. But how much money and prizes are up for grabs in this game?

To start, unlike Notcoin, the Hamster Kombat airdrop is not based on your balance but rather your account level and passive income. Because of this, there is no use in hoarding coins; instead, you should upgrade your account right away with the coins you already have.

The second point is that the rumour mill has it that players would have to wait two years before they get their hands on the cryptocurrency. It stands to reason that the price won't plummet right following a potential listing. Maybe nobody will be around in two years. In due time, the remaining "whales" will systematically acquire all of your "hard-earned money" at rock-bottom prices.

Furthermore, regarding the third point, the creators of Hamster Kombat remain a mystery. Will the

Hamster developers be able to handle the deluge of complicated jobs that await them, given that the Notcoin team was well-known prior to the clicker's introduction and had a track record of successful projects?

Conclusion

An intriguing opportunity arises with Hamster Kombat, where traders can earn tokens simply by tapping on the game's mascot, a hamster, on its Telegram channel. Many questions remain, though, regarding the project's ability to airdrop cash and the loyalty of the Hamster Kombat community thereafter.

Investors and traders considering Hamster Kombat may wish to diversify their holdings by purchasing coins that have had more conventional launches.
