What is Ethereum (ETH)?

Ethereum (ETH), one of the most dominant coin in the crypto market, only after Bitcoin. Generally speaking, ETH is the native digital currency of a decentralized, open-source computer network known as the Ethereum Network. Comparing with Bitcoin, ETH shared many similarities. Both coins rely on underlying networks which have associated blockchains, use “private keys” and “wallets” to enable transfers and track ownership, facilitate the creation of new supply via “mining”, include software source code that governs the cryptographic operations that verify and secure transactions and allow participants in the network to modify the open-source software and persuade other users and miners to adopt the proposed modification.

Like BTC, ETH can serve as a means of exchange and/or a store of value. Ethereum draws great attentions from developers as its applications are utilized without central control, downtime, fraud, or third-party interference. Today, Ethereum (ETH) has gained growing popularity with its multiple purposes ranging from payments to investment to innovation.

Step Three: go back to the BTCC official homepage, choose “Futures” - “USDT-M Perpetual Futures Contract”, and find the Ethereum (ETH) trading pair.

You can also click the button below to directly enter the Ethereum (ETH) trading page ↓

[TRADE_PLUGIN]ETHUSD,ETHUSD[/TRADE_PLUGIN]

Step Four: choose the contract trading order type. BTCC contract orders are divided into market orders, limit orders and SL/TP orders.

- **Market Order:** users place orders at the best price in the current market to achieve fast trading.
- **Limit Order:** Limit orders are a type of order to buy or sell futures at a price more favourable than the market price. When you buy at a price lower than the market price or sell at a price higher than the market price, the order will be in the form of a limit order.
- **SL/TP Order:** SL/TP orders are a type of order to buy or sell futures at a price less favourable than the market price. When you buy at a price higher than the market price or sell at a price lower than the market price, the order will be in the form of a SL/TP order.

Step Five: adjust the leverage multiple.

Please keep in mind that operating leverage carries the risk of liquidation. Leverage should be adjusted based on your financial status and risk tolerance.

Step Six: choose the lot size and set the SL/TP price .

Step Seven: after setting the basic data information, users can choose to buy (open long) or sell (open short) after entering their ideal price. Traders should remind that the price cannot be higher or lower than the highest buying price or lowest selling price of the platform.

Step Eight: click the buy or sell button, and the Ethereum (ETH) futures contract order is completed.
