How to Sell Pi Network Coin in 2025: A Complete Beginner's Guide

Pi Network has amassed over 47 million users worldwide with its promise of easy mobile mining. But as millions of users ask, "How to sell Pi Network coin?", the answer remains unclear due to its ongoing Enclosed Mainnet phase.

This SEO-optimized guide breaks down everything you need to know about selling Pi coin, current workarounds, official policies, and realistic options for monetizing your Pi holdings in 2025. We'll also include low-competition, high-volume Ahrefs long-tail keywords to help this article rank high on Google and provide accurate, actionable answers to frustrated Pioneers.

What is Pi Network?

Pi Network is a mobile-first cryptocurrency project launched in 2019 by Stanford PhDs. It allows users to mine coins by simply clicking a button on their smartphones once per day.

Unlike Bitcoin, Pi doesn't consume heavy energy or require mining rigs. Instead, it uses the Stellar Consensus Protocol (SCP) and a trust-based validation mechanism.

- Founded: March 14, 2019
- Users: 47+ million (as of July 2025)
- Current Phase: Enclosed Mainnet (no external trading)

- KYC Rollout: Ongoing, required for all transfers

Can You Sell Pi Coin in 2025?

Technically, no. As of now, Pi Coin cannot be officially sold, traded, or withdrawn to external exchanges.

The Pi Core Team has repeatedly emphasized that Pi remains in Enclosed Mainnet, meaning:

- No exchange listings are allowed
- No wallet transfers to non-KYC users
- No external trading pairs exist officially

However, that hasn't stopped the P2P and OTC (over-the-counter) communities from creating unofficial markets to trade Pi for cash, goods, or services.

Why Is Pi Still in Enclosed Mainnet?

The Enclosed Mainnet is designed to:

- Allow users to complete KYC (Know Your Customer)
- Prevent bots and multiple account exploitation
- Encourage real utility over speculation
- Develop decentralized apps (Pi Apps) in a safe test environment

Until the majority of users are verified and developers finish ecosystem infrastructure, the Pi Core Team will not enable exchange listings or free movement of tokens outside the Pi Wallet.

How to Sell Pi Network Coin (Step-by-Step)

If you're still wondering how to sell Pi Network coin, here's a clear breakdown of your current options:

1.Sell Pi in P2P Marketplaces (Unofficial)

This is not recommended by the Pi Core Team and carries risk.

Steps:

- 1.Join a Pi-related community (e.g., Pi P2P Telegram, Discord, Reddit)
- 2.Verify your Pi balance and KYC status
- 3.Find a verified buyer willing to trade Pi for fiat or goods
- 4.Agree on a price (common range: \$5-\$40/Pi)
- 5.Use Pi Wallet to send the agreed amount
- 6.Confirm receipt of funds or goods

Always use escrow services or mutual trust; scams are rampant.

2.Barter Pi for Products (Pi Commerce)

Some merchants within the Pi ecosystem accept Pi for:

- Electronics
- Food
- Services (e.g., graphic design, writing, repairs)
- Clothing

Platforms:

- PiChain Mall
- PiBarterMall

- Pi Lifestyle Market
- Local Pi trading Facebook groups

It's not a direct "sale," but it lets you extract value from your Pi holdings.

Is It Legal or Safe to Sell Pi Coin?

Legality

Selling Pi is not illegal in most countries. However, the Pi Core Team forbids trading Pi until Open Mainnet to avoid premature speculation.

Safety Risks

- P2P trades carry high risk of scams
- No buyer protection on unofficial platforms
- You may get banned from the app if caught trading Pi for fiat

Advice: Only proceed if you're aware of the risks and are dealing with trusted traders.

OTC & P2P Methods to Sell Pi Coin (Unofficial)

Here are some methods being used by Pioneers worldwide:

Platform	Method	Risk Level	Comments
Telegram Groups	Manual P2P Sales	High	Many scam reports; proceed with caution
WhatsApp Groups	Local trading communities	High	Trusted referrals preferred
Facebook Groups	Barter & cash sales	Medium	Check user reviews before dealing
Pi Lifestyle	Trade Pi for goods	Low	Real-world utility growing
Local Meetups	Direct Pi-for-cash swaps	Medium	Always meet in public places

Always confirm the buyer is KYC-verified, or else transactions will fail.

When Will Pi Coin Be Listed on Exchanges?

The Pi Core Team has hinted at Open Mainnet sometime in late 2025 or early 2026, depending on:

- KYC completion rate
- Ecosystem readiness
- Developer onboarding
- Network decentralization

Until then, Pi won't appear on Binance, Coinbase, or KuCoin, despite some fake listings you might see.

Beware of scam tokens pretending to be "PI" on PancakeSwap or other decentralized exchanges. These are not official.

What Can You Do With Pi Until Then?

While you can't officially sell Pi yet, you can still:

- Participate in Pi Hackathons and earn rewards
- Buy goods/services on PiCommerce platforms
- Stake or HODL in your Pi Wallet

- Join dApps in development like PiCare, PiWork, and PiStore
- Invite more users to increase mining rate before halving events

These activities build Pi's ecosystem and may increase its future utility and price.

FAQs About Selling Pi Network Coin

Q: Is it possible to sell Pi coin now?

Not officially. Only peer-to-peer (P2P) trades are possible in unofficial groups. The Pi Core Team discourages this.

Q: What is the current value of Pi coin?

There is no official market price. Unofficial trades vary from \$5 to \$100 per Pi, depending on location and hype.

Q: Can I transfer Pi to an exchange?

No. Pi is not listed on any CEX or DEX. Transfers are limited to KYC-verified Pi Wallets only.

Q: Will I get banned if I sell Pi?

Possibly. Users caught engaging in unofficial selling may face account restrictions or mining suspension.

Final Thoughts: Should You Sell Pi Coin in 2025?

Sell (Unofficially) if:

- You're dealing with a trusted P2P buyer
- You're comfortable with risk
- You need short-term value or utility

Hold if:

- You're waiting for official exchange listings
- You want to avoid scams
- You believe in Pi's long-term ecosystem

For now, selling Pi is not for everyone. Most users are better off waiting for Open Mainnet and real exchange listings.

Can You Sell Pi Coin Today?

Action	Status	Comment	User Recommendation
Official Exchange	❌ Not Available	Still in Enclosed Mainnet phase	Wait for official announcements
P2P Trading	❌ Possible	High risk - not endorsed by Pi Core Team	Use trusted escrow services
Product Bartering	❌ Active	Pi Commerce ecosystem expanding	Verify merchants in Pi Directory
Future Exchange Listing	❌ Coming Soon?	Expected post-2025 (Open Mainnet dependent)	Accumulate & wait for verification

Final Answer: You can sell Pi coin in unofficial ways in 2025, but it's risky and unsupported. If you want full value, wait for Open Mainnet and verified exchange listings.

By creating an account, I agree to BTCC's [Privacy Policy](#) and [User Agreement](#).

Step 2: Finish the KYC

The Know Your Customer (KYC) procedure is the next step after your account is operational. The main goal of this stage is to maintain compliance and security. You must upload identification, such as a passport or driver's license. You'll receive a confirmation email as soon as your documents are validated, so don't worry—it's a quick process.

Step 3. Deposit Funds

After that, adding money to your account is simple. BTCC provides a range of payment options, such as credit cards and bank transfers. To get your money into your trading account, simply choose what works best for you, enter the amount, and then follow the instructions.

- **Fiat Deposit.** Buy USDT using Visa/Mastercard (KYC required).
- **Crypto Deposit.** Transfer crypto from another platform or wallet.

Fund Your Account

I don't have crypto assets

Fiat Deposit

Fund your account with USDT using Visa/Mastercard

P2P

Buy and sell cryptos with flexible payment methods and 0 transaction fees.

Crypto Deposit

Get the deposit address for BTC, ETH, or any other crypto and deposit via the blockchain.

Step 4. Start Trading

If you wish to follow profitable traders, you might go for copy trading, futures, or spot trading. After choosing your order type and the cryptocurrency you wish to trade, press the buy or sell button. Managing your portfolio and keeping track of your trades is made simple by the user-friendly interface.

BTCC FAQs

Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the platform's infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

Is KYC Necessary for BTCC?

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

Is There a Mobile App for BTCC?

Indeed. For users of iOS and Android, BTCC has a mobile app. The exchange's website offers the mobile app for download. Since both the web version and the mobile app have the same features and capabilities, they are comparable.

Will I Have to Pay BTCC Trading Fees?

Indeed. BTCC levies a fee for trade, just like a lot of other centralised exchanges. Each user's VIP level, which is unlocked according to their available money, determines the different costs. The BTCC website provides information on the charge rates.

Can I Access BTCC From the U.S?

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
