How To Withdraw Using Coindraw: A Useful Guide For Users In 2025

The integration of blockchain technology into online gambling has ushered in a multitude of advantages, with faster, safer, and more affordable deposits and withdrawals being just a fraction of the benefits. By capitalizing on these enhancements, gamers worldwide are now able to ascend to the next level of online gambling, effectively bypassing the cumbersome and costly processes imposed by traditional payment providers. Furthermore, this technological advancement eliminates the red tape and administrative hurdles that often accompany mainstream financial transactions.

While the rise of crypto gambling is hardly a novel development, having evolved into a multimillion-dollar industry over the past decade and continuing its upward trajectory, it is crucial to acknowledge that the efficacy of crypto gambling hinges largely on the casino and payment provider one chooses. This is precisely where Coindraw crypto payments enters the picture.

However, one might ask, what exactly is Coindraw? How does its payment settlement system operate within the realm of online casinos? And more importantly, how does this revolutionary Bitcoin withdrawal method benefit players? This article aims to provide a comprehensive introduction to these pertinent questions.

BTCC, one of the longest-running crypto exchanges in the world, supports crypto demo trading, crypto copy trading, crypto spot trading for 240+ crypto pairs, as well as crypto futures trading for 360+ crypto pairs with a leverage of up to 500X. If you want to start trading cryptocurrencies, you can start by signing up for BTCC.

Step 2: Complete BTCC's identity verification

Kindly verify your identity to ensure full compliance and enhance your trading experience on BTCC. You can access the [identity verification page](#), fill out your country, upload your ID documents, and submit your selfie. You will receive a notification once your identity has been successfully verified.

Step 3: Fund your BTCC account

On the [BTCC official homepage](#), choose “Deposit”, and then fund your account with your preferred method

Step 4: Place your crypto futures order on BTCC

Go back to the BTCC official homepage, choose “Futures” - “USDT-M Perpetual Futures Contract”, and find the crypto trading pair that you want to trade.

Then, choose the contract trading order type. Futures contract orders on BTCC platform include market orders, limit orders and SL/TP orders.

- **Market Order:** users place orders at the best price in the current market to achieve fast trading.
- **Limit Order:** Limit orders are a type of order to buy or sell futures at a price more favourable than the market price. When you buy at a price lower than the market price or sell at a price higher than the market price, the order will be in the form of a limit order.
- **SL/TP Order:** SL/TP orders are a type of order to buy or sell futures at a price less favourable

than the market price. When you buy at a price higher than the market price or sell at a price lower than the market price, the order will be in the form of a SL/TP order.

The screenshot displays a trading interface with a dark theme. At the top, a 'Leverage' dropdown is set to '50x'. Below this are 'Open' (green) and 'Close' (grey) buttons. A red rectangle highlights the order type selection area, which includes 'Market' (selected), 'Limit', and 'SL/TP'. To the right of these options is an information icon. Below the order type selection, the text 'Free 0.00USDT' is shown next to a calculator icon. A 'Best Bid Price' button is visible. The 'Quantity' input field is set to 'BTC'. Below this, the 'Contract Value' is approximately '0.00USDT', accompanied by a slider. A checkbox for 'Set TP/SL' is present. At the bottom, there are 'Open long' (green) and 'Open short' (red) buttons. The bottom section also displays 'Max long' and 'Max short' values as '0.00 BTC', and 'Margin' values as '0.00 USDT'.

Next, adjust the leverage multiple.

Please keep in mind that operating leverage carries the risk of liquidation. Leverage should be adjusted based on your financial status and risk tolerance.

Then, choose the lot size and set the SL/TP price. After setting the basic data information, users can choose to buy (open long) or sell (open short) after entering their ideal price. Traders should remind that the price cannot be higher or lower than the highest buying price or lowest selling price of the platform.

Finally, click the buy or sell button, and the crypto futures contract order is completed.
