## **What is Livepeer (LPT)?**

For optimal network safety, dependability, and efficiency, LPT crypto is designed to incentivize and coordinate network participants. In order to ensure the security of the network, it operates as a binding mechanism that financially incentivizes Orchestrators to play by the rules.

At the end of each period, or “round,” new LPT tokens are generated and given to Orchestrators and Delegators in accordance with their stakes. Participants in Livepeer are meant to have greater sway over the system than those who aren’t using it. Approximately one day is equal to one round. The inflation rate of LPT automatically adjusts based on the percentage of total supply that has been staked. The objective is to maintain a sustainable level of activity on Livepeer.

Broadcasters now have an affordable alternative to the costly, centralised infrastructure that has traditionally been relied upon thanks to the LPT framework. However, this does not imply that the only beneficiaries are broadcasters. In addition to improving the user experience, Livepeer’s approach allows companies in the sector to test out new revenue streams that don’t involve displaying advertisements or selling customer information.

And that’s not all: Livepeer thinks its technology can pave the way for a plethora of additional novel services. Examples include improved streaming apps for the creative economy or pay-as-you-go models for viewing digital media. Services like this will facilitate a more harmonious relationship

between customers, content producers, and platforms. It also fills a gap by making it possible to incorporate video into decentralised applications.

Livepeer Coin has a promising future, as seen by its limited token supply and the backing of the community. ## BTCC FAQs

### Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the platform's infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money

laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

### **Is KYC Necessary for BTCC?**

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

### **Is There a Mobile App for BTCC?**

Indeed. For users of iOS and Android, BTCC has a mobile app. The exchange's website offers the mobile app for download. Since both the web version and the mobile app have the same features and capabilities, they are comparable.

### **Will I Have to Pay BTCC Trading Fees?**

Indeed. BTCC levies a fee for trade, just like a lot of other centralised exchanges. Each user's VIP level, which is unlocked according to their available money, determines the different costs. The BTCC website provides information on the charge rates.

### **Can I Access BTCC From the U.S?**

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
