What is mCoin (MCOIN)?

First, here's a unique crypto airdrop initiative that stands out from the others I've covered here. mCoin is a truly revolutionary form of digital currency because it can be used with or without an Internet connection. That's an example of a "hybrid currency," by the way. Therefore, mCoin provides a means of exchange for previously unbanked individuals and companies.

Given that well over half the world's population still lacks access to the internet, this is an issue. As a result, they are unable to fully benefit from the many developments in cryptography and blockchain technology.

But mCoin's mission is to provide them with a blockchain technology that welcomes all users and works with any mobile device.
