## **What is Meme Index?**

The Meme Index is a decentralized platform that facilitates access to the meme coin market through four distinctive indexes: Titan, Moonshot, MidCap, and Frenzy. Each of these indexes offers a different level of volatility, empowering users to select between safer and higher-risk investment opportunities. This allows investors to explore the immense growth potential of meme coins while tailoring their investments according to their risk tolerance.

- **Meme Titan Index:** This index focuses on well-established meme coins with a market capitalization of at least \$1 billion, including Dogecoin (DOGE), Shiba Inu (SHIB), and Pepe (PEPE). These blue-chip meme coins have demonstrated strong resilience over time. The Meme Titan Index provides an entry point for investors who want exposure to the meme coin space but prefer to avoid extreme volatility.
- **Moonshot Index:** This index tracks meme coins with market caps between \$250 million and \$1 billion. It offers a balanced opportunity for investors seeking more growth potential without venturing into smaller, higher-risk tokens.
- **Midcap Index:** Comprised of meme coins with a market value ranging from \$50 million to \$250 million, this index features coins that tend to be more volatile than those in the Moonshot and Titan indices. However, they also present a higher potential for returns if they gain investor interest.
- **Meme Frenzy Index:** The most speculative index, this includes newer and less-established meme coins that can experience significant price fluctuations. While these coins have the potential for exponential gains if they go viral, they come with a much higher risk of failure.

By blending fresh concepts, decentralized technology, and community-driven decision-making, the Meme Index has revolutionized meme coin investing, making it simpler and more adaptable. It represents a significant milestone in the meme coin ecosystem, as it consolidates comprehensive market exposure into meticulously curated indexes. This innovative platform seamlessly integrates

decentralization, community governance, and innovation, catering to the needs of meme coin enthusiasts.

## **\$MEMEX Staking**

Generous staking rewards is regarded as one of the standout features of the Meme Index presale. According to its tokenomics, the team allocated 25% of the total supply to staking rewards.

By staking MEMEX on the Meme Index platform, investors gain access to four separate “baskets” of meme coins, which are designed to offer a safer way to navigate the volatile meme crypto market by combining the price performance of several coins at once.

It now offers an eye-catching **543%** APY and extra rewards during the presale stage to incentivize broad interest early on.

## Welcome to \$MEMEX Staking

The distribution of \$MEMEX token rewards will occur at a rate of 388.5 \$MEMEX tokens per ETH block. These rewards will be disbursed over 3 years and will be claimable once claim goes live.

With over 184 million \$MEMEX tokens already staked, this provides great value and reflects solid participation from the community. By staking their \$MEMEX tokens, the investors impact the price stability of the tokens because doing so reduces the supply in circulation.

Moreover, such a high APY will encourage investors to hold \$MEMEX longer as the staking rewards will be distributed over 3 years.

## Meme Index (\$MEMEX) Price Prediction

The crypto market's volatility demands a forward-looking approach, allowing investors to anticipate potential price movements and position themselves strategically. Therefore, before deciding whether \$MEMEX is a good investment, predicting the future prices of \$MEMEX is crucial for investors to make informed decisions.

### Meme Index (\$MEMEX) Price Prediction 2025

As to Meme Index (\$MEMEX) Price Prediction for 2025, as the Meme Index is expected to deliver on its promise of providing market exposure for staking, more tokens are likely to be locked up in the stake pool by next year. That will decrease the supply on crypto exchanges, increasing the price.

Given all these factors, \$MEMEX is predicted to witness a price rally in 2025, potentially hitting a maximum price level of \$0.0172 towards the last quarter of 2025. However, under a bearish circumstance, it is projected that \$MEMEX would drop to a lowest price level of 0.0149, resulting in an average trading price of 0.01605.

### Meme Index (\$MEMEX) Price Prediction 2026

As for Meme Index (\$MEMEX) Price Prediction for 2026, it is predicted that 2026 would be a significant year for the \$MEMEX token. Staking rewards will continue in 2026, implying that the complete supply of tokens will not be immediately available on cryptocurrency exchanges. This factor alone has the potential to prop up the token's price. By the midpoint of 2026, it is anticipated that the \$MEMEX's value will reach a maximum price level of \$0.0196.

Furthermore, an influx of new meme coins is expected to emerge, thereby ensuring a continuous influx of trendy tokens within the meme indices. Although \$MEMEX is poised to maintain a favorable trajectory throughout much of the year, we foresee a decline to a lowest price of \$0.0129 by year-end, with an average price hovering around \$0.01625 in 2026.

### Meme Index (\$MEMEX) Price Prediction 2030

In terms of long-term price prediction for 2030 on Meme Index (\$MEMEX), Meme Index (\$MEMEX)'s value could experience an even more dramatic surge. As the ecosystem expands to accommodate new meme tokens, most investors will come to consider \$MEMEX as a passive investment opportunity.

Our current price prediction for 2030 shows \$MEMEX token will likely reach a highest price level of \$0.083, which is a huge jump from its 2025 price. However, under a bearish circumstance, it is projected that \$MEMEX would slump to a lowest price level of \$0.0263, resulting in an average trading price of \$0.05465.
