Can Moo Deng Hit \$10? Moo Deng (MOODENG) Price Prediction 2024, 2025 2030

A new meme coin called Moo Deng is based on the well-known pygmy hippopotamus that was born in Thailand's Khao Kheow Open Zoo. Developed using Solana's Pump.fun meme generator, the token skyrocketed to a market valuation of about \$600 million during the mid-November meme currency boom.

What does the \$MOODENG token's future hold? In our Moo Deng price projection, we'll cover all the essential information regarding \$MOODENG and project its value between 2024 and 2030.

What Is Moo Deng?

The Khao Kheow Open Zoo in Si Racha, Chonburi province, Thailand is home to Moo Deng, a baby pygmy hippopotamus born in July 2024. There are only about 2,000 wild pygmy hippos, making them an endangered species confined to West Africa.

The internet is going crazy with Moo Deng due to her endearing personality, theatrical reactions, unpredictable behaviour, and relatability, which are touching a chord with people all over the world. Some of the most recognisable logos in the world feature Moo Deng, including those of DreamWorks Animation, Universal Pictures, and even Windows.

In celebration of their remarkable winning streak, which included an 11-goal thriller in the UEFA Champions League, even the top German football team, Bayern Munich, created memes with Moo Deng emotions.

There has been some trickle-down effect from Moo Deng’s fame to the zoo. Reports indicate that the zoo’s social media following is growing, with its X (previously Twitter) page currently boasting over 100,000 followers as of writing. Additionally, the number of visitors has reportedly risen since she went viral.

The meteoric rise of a MOODENG token in the cryptocurrency market is not unexpected given its immense popularity.

Moo Deng Price Prediction 2024

Given that next month marks the end of 2024, we anticipate minimal market fluctuations for the \$MOODENG coin. Instead, following Moo Deng's record high of \$0.69 on November 15, 2024, we expect a brief consolidation period.

Following that record high—and the 520% gain before it—the price dropped dramatically, suggesting that \$MOODENG requires a cooling-down period before continuing its upward trajectory. The coin is no longer overbought, according to technical analysis, since it has returned to normal RSI and Bollinger Band values.

There may be a lot of activity next week as people get ready for the meme coin supercycle, but we still think \$MOODENG will stay around \$0.44 until the end of the year.

[TRADE_PLUGIN]BTCUSDT,ETHUSDT[/TRADE_PLUGIN]

Moo Deng Price Prediction 2025

As the meme currency industry finally hits its supercycle in 2025, Moo Deng's price might skyrocket. For traders hoping to make a killing in the first half of 2025, this meme coin—which was one of the most popular in Q4—may be a great option. On top of that, with a market valuation of just \$442.83M, \$MOODENG still has plenty of chance to produce gains of 10x before making its way into the top ten meme coins worldwide.

The concept of Moo Deng, the pygmy hippo, could also be beneficial. Animal enthusiasts all over the globe are sure to be enchanted by the real-life hippo in 2025, even if she will be a year older. With the recent publication of a Moo Deng-themed song in four languages, the Khao Kheow Open Zoo is

also doing their part to spread the word.

With Bitcoin's meteoric rise to \$200,000 and the subsequent influx of millions of new investors, this pygmy hippos craze is poised to clash with a digital gold rush. Some new investors will go for high-risk, high-reward tokens like \$MOODENG, while others will remain with more established meme coins like \$DOGE and \$PEPE. The token's price and trading volume are expected to remain strong throughout the year due to that.

Our \$MOODENG price projection for 2025 is quite positive, driven by these merging dynamics. From its current price of \$0.02, we anticipate a potential 85.50% increase to \$0.82.

Moo Deng Price Prediction 2026-2030

We also expect \$MOODENG to be one of the top meme currency supercycle tokens, and our Moo Deng price projection for 2026-2030 is extremely high. Why? Because this currency is led by a real animal, which means it will evolve and change over time, unlike most meme coins. Thus, fresh Moo Deng content can be made daily, with the chance for it to become viral and attract investors to purchase the Moo Deng token.

It is worth mentioning that pygmy hippos in captivity typically live between 30 and 50 years. When Moo Deng is six years old in 2030, she will still be a youngster in her hippo years and may still be as energetic and independent as she is now.

Moo Deng's notoriety may possibly be boosted by the plight of wild pygmy hippos. Deforestation poses a threat to the remaining 2,500 wild pygmy hippos, according to experts. Perhaps the popularity of Moo Deng and conservation efforts to save wild pygmy hippos will lead to a surge in the price of the \$MOODENG token. Alternatively, the token could find a new purpose as a utility token for supporting wildlife preservation initiatives.

Even though Moo Deng is expected to have enormous increases in 2025, it will still be a relatively mid-cap meme currency in early 2026, which is another positive aspect. Before competing with large Solana meme coins like WIF, BONK, or POPCAT, \$MOODENG could experience a 10x or even a 100x

increase in value. Therefore, this cryptocurrency has a lot of space to soar between 2026 and 2030.

We conclude that at the decade’s end, \$MOODENG will have reached \$8.39. Moo Deng is now one of the most promising cryptocurrency tokens due to its enormous rise of 1,775.54%.

Potential Highs and Lows of MOODENG

Even while we are quite optimistic about \$MOODENG, this does not guarantee that the token’s price movement will be straightforward. Due to the well-known volatility of meme coins, investors should prepare for both terrifying lows and explosive highs.

We’ve forecasted the possible highs and lows that Moo Deng might experience annually between 2026 and 2030 to help you get ready.

Is Moo Deng a Good Investment?

We are quite bullish on the Moo Deng price, projecting an 85.50% increase in 2025 and a 1,775.54% increase by 2030. Even when compared to the best presale cryptocurrencies, that might be a huge return.

The expected meme coin supercycle and the widespread adoration of the hippo behind it give us reasonable reason to believe in Moo Deng's future success. Consequently, we expect Moo Deng to deliver returns despite its probable price volatility in the years to come. Since this meme is likely to remain popular for a very long time, Moo Deng might be seen as a cryptocurrency investment with a long-term horizon.

[TRADE_PLUGIN]BTCUSDT,ETHUSDT[/TRADE_PLUGIN]

Can Moo Deng Hit \$10?

Assuming all goes according to plan, we estimate that the \$MOODENG coin might hit \$10 by 2030. Our forecast for the token's average price at decade's end is \$8.39.

Moo Deng (MOODENG) Price Prediction: Conclusion

It's worth noting that there may be seemingly contradicting pricing estimates. The future worth of any cryptocurrency cannot be predicted with any degree of certainty. Predicting prices involves a lot of variables, which is why this is the case. At any one moment, the price of a coin can be drastically altered by just one announcement. Any technological advancements made to the project or fluctuations in the market can have an impact on the value of a single coin. You should never put your money into a cryptocurrency without first doing your own investigation.
