## What Is Palantir Technologies (PLTR)?

Before diving into Palantir stock predictions, let's quickly recap what Palantir does.

Founded in 2003 by Peter Thiel, Alex Karp, and others, Palantir builds data analytics software platforms that serve:

- Government agencies (like the U.S. Department of Defense, CIA, and FBI)

- Commercial enterprises (like Airbus, BP, and Ferrari)

Its two main platforms, Gotham and Foundry, help organizations collect, manage, and analyze large datasets. Palantir also launched Apollo, its continuous delivery system for software updates across multiple environments.

Palantir is often labeled as a “controversial” tech stock due to its work with surveillance, military intelligence, and government contracts. But it’s also increasingly involved in AI, machine learning, blockchain analytics, and commercial SaaS applications.

## Palantir Stock Price History at a Glance

- IPO Date: September 30, 2020 (via direct listing)
- IPO Price: ~\$10/share
- All-Time High: ~\$45/share in January 2021
- 2022 Low: ~\$6/share during the tech sell-off
- 2024 Price Range: \$13–\$28/share

PLTR has shown extreme volatility, largely driven by sentiment around its government contracts and AI ambitions. This historical context is key for anyone evaluating a Palantir stock forecast.

## BTCC FAQs

### Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the platform’s infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

### Is KYC Necessary for BTCC?

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

## Can I Access BTCC From the U.S?

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
