Pepe Unchained is a Layer-2 solution aimed at making transactions faster and cheaper by processing them off the main Ethereum chain. Pepe Unchained promises a remarkable increase in speed, up to 100 times faster, while remaining integrated within the Ethereum ecosystem, thereby providing users with a seamless and highly efficient experience. Notably, Pepe Unchained is more than just a meme coin; it's an entirely meme coin ecosystem. Pepe Unchained is improving upon the traditional Ethereum Layer 1 by improving speed, lowering fees, and creating \$PEPU, a native token that powers the ecosystem.

As an enhanced version of Original Pepe, Pepe Unchained (\$PEPU) utilizes Layer 2 technology to double staking rewards for all stakers, especially benefiting presale buyers. As per the website, "Pepe Unchained is the future of meme coins- a Layer 2 blockchain built for speed, security, low fees-and of course-Memes." Building on top of the Ethereum network, Pepe Unchained offers users the ability to trade and stake at very high speeds while incurring significantly lower gas fees than those on the L1.

Despite introducing the beloved Pepe theme, \$PEPU also targets to bring concrete technological innovations that position it high on investing lists of all crypto enthusiasts looking for ways to maximize their profit in the following period. Its objective is not merely to capitalize on a popular meme but to establish itself as a groundbreaking project worthy of top consideration among investors. By offering concrete utility, Pepe Unchained goes beyond offering humor, even though it doesn't lack it.

Pepe Unchained (\$PEPU) Key Features

The key feature of Pepe Unchained (\$PEPU) lays on its layer 2 blockchain. Layer 2 is a layer built on top of the Ethereum Network that allows for faster, and cheaper transactions. This makes Pepe Unchained the World's first Pepe token on its own chain! This secondary layer improves the

scalability, speed, and efficiency of the primary blockchain, making it possible to handle a higher volume of transactions at a lower cost.

Benefits of Layer 2 for PEPE Unchained

1. **Double the staking Rewards:** By offloading transactions to PEPEUNCHAINED Layer 2, PEPE Unchained can offer significantly higher \$PEPU staking rewards. The reduced operational costs and increased efficiency mean more rewards for you, Ser.
2. **Frens With Benefits:** Frens With Benefits is an additional feature tailored to elevate the Pepe Chain to prominence within the meme coin blockchain landscape. Specifically catering to blockchain developers, its objective is to incentivize the creation and deployment of applications on Pepe Unchained's Layer 2 chain.
3. **Pepe's Pump Pad:** This innovative platform allows anyone to create and launch their own meme coins, opening up new opportunities for users to tap into the lucrative meme coin market without requirements for any coding knowledge or blockchain expertise.
4. **Faster Speed:** Transactions on Layer 2 are processed much quicker than on Layer 1. This means you can stake, trade, and interact with PEPE Unchained at lightning speed.
5. **Lower Fees:** With fewer transactions clogging up the main Ethereum network, gas fees are substantially lower on Layer 2. This means more of your investment goes towards earning gains rather than paying for transaction costs.

Pepe Unchained Roadmap

The future for Pepe Unchained is promising. Boasting a comprehensive roadmap full of exciting milestones, Pepe Unchained exerts enormous potential for sustainable growth.

The roadmap of Pepe Unchained includes 3 steps, showing how the ambitious goals of the project will be realised.

Step 1 - Make Pepe Great Again

The time has come for Pepe to take a giant leap into his ultra-based future. By inseminating the world with L2 technology, Pepe Unchained becomes an absolute Giga Brain. He's now ready to release his rewards.

Step 2 - Coin Eruption

With L2 technology, and a burning desire in his loins, Pepe Unchained erupts during presale, offering DOUBLE the staking rewards. This is an explosion of Pepe juice all over the blockchain.

Step 3 - Kill Original Pepe

Original Pepe was cool, but he lacks the Giga Brain and layer 2 tech. The future belongs to Pepe Unchained. Will they be friends or frenemies? only time will tell.

Pepe Unchained Officially Launches On Uniswap And Dextools

Pepe Unchained's presale is widely regarded as one of the most popular ICO in 2024. According to its tokenomics, 40% of the total 8 billion supply is scheduled to allocate to presale buyers.

[Trump's elction victory](#) sends Bitcoin to break the \$100K milestone, boosting a strong bullish sentiment within the crypto community. Following the announcement that the 30-day countdown to the end of the presale has begun, Pepe Unchained (\$PEPU) continued to leapfrog expectations, securing over \$74 million funds in its presale stage during the current market bull run.

Notably, as one of the most viral meme coins of 2024, at 2 PM UTC on Tuesday, 10th December, Pepe Unchained finally officially launched on Uniswap and the \$PEPU token were claimable.

Notably, the meme coin market is buzzing with excitement after the explosive debut of Pepe Unchained, jumping 145% to a \$180 million market cap on its first day.

It remains to be seen whether Binance, Coinbase, or potentially Robinhood will list PEPU first. Yet, one thing is for certain, whichever exchange wins listing rights will have its hands full as on-platform trading activity for this viral token soars.

Pepe Unchained Secures Major CEX Listings

After completing a successful presale, Pepe Unchained (\$PEPU) proved to be rewarding after getting officially listed on the BingX crypto exchange on December 16. After that, as the Pepe Unchained (\$PEPU) team looks to expand the token's availability, Pepe Unchained successively secured listing on major crypto exchange, including listing on MEXC on December 17, BitMart on December 18, as well as LBank on December 19.

All these listings will significantly boost \$PEPU's trading exposure, naturally acting as a catalyst in driving further interest in PEPU, which raised a staggering \$74 million during its presale campaign.

Pepe Unchained (\$PEPU) Staking

Generous staking rewards is regarded as one of the standout features of the Pepe Unchained. Thanks to the improved scalability, which offloads work from the main chain, Pepe Unchained offers \$PEPU stakers far greater rewards than Layer 1 meme coin counterparts.

Due to Pepe Unchained's low operational costs, the team allocated 30% of the total supply to staking

rewards. The low operational costs and increased efficiency enable investors to earn more passive income from their \$PEPU holdings.

Staking \$PEPU tokens now offers an APY of **206%**. With over 1.5 billion \$PEPU tokens already staked, this provides great value and reflects solid participation from the community.

By staking their \$PEPU tokens, the investors impact the price stability of the tokens because doing so reduces the supply in circulation.

Moreover, such a high APY will encourage investors to hold PEPU longer as the staking rewards will be distributed over 2 years.

Notably, on December 18, Pepe Unchained officially launched double-rewards staking, further indicating its huge potential for growth.

What Factors Affect \$PEPU Price?

As a kind of digital asset, there are a number of variables in the cryptocurrency market that can drive the price of Pepe Unchained (\$PEPU) upwards or downwards. Here is breakdowns about factors influencing Pepe Unchained (\$PEPU) 's price trend:

- **Community sentiment:** Meme coins thrive on hype and speculation, so \$PEPU plans to spread project awareness and foster loyalty with continued marketing efforts and community rewards. It's worth noting that bullish community sentiment often results in price increases, while bearish sentiment can lead to price drops.
- **Adoption of the underlying network:** The popularity of any crypto project hinges on the adoption of the underlying blockchain, which, for \$PEPU, is Ethereum. More users on the network often translates to higher token prices.
- **Adoption:** Whether the demand for more \$PEPU increases or decreases depends greatly on growing adoption. Wider adoption of \$PEPU by businesses and individuals could drive the price up.
- **Regulations:** Government regulations around cryptocurrency can significantly exert profound influence on the price of cryptos, including \$PEPU token.
- **Layer 2 Efficiency:** High transaction speeds and lower fees will draw attention from those seeking to maximize their crypto investments. This heightened interest can generate demand, which in turn, can propel prices upwards. Moreover, the scalability of Layer 2 blockchains enables seamless accommodation of escalating transaction volumes, ensuring uninterrupted

performance and growth potential.

- **Exchange Listings:** Listing on major crypto exchanges could increase \$PEPU’s visibility and accessibility- potentially propelling the token’s demand and price.
- **Project development:** \$PEPU’s price could increase due to new features, incentives, and updates. Conversely, poor communication and a lack of updates can hurt trust and decrease \$PEPU’s value.
- **Celebrity Endorsements:** High-profile individuals often endorse promising coins, giving them a significant boost in visibility and perceived legitimacy.
- **Social Media Influence:** Platforms like X (Twitter), Reddit, and TikTok play a critical role in spreading awareness and driving hype for cryptocurrencies.
- **Tokenomics and vesting schedule:** Strategic token distribution and allocation discourage immediate selling pressure and incentivize holding. A controlled release schedule (vesting) also prevents a price crash by slowly introducing tokens into the market.

Is Pepe Unchained (\$PEPU) a Good Investment?

As the first Pepe token to operate on its own proprietary Ethereum Layer 2 blockchain, Pepe Unchained is igniting fervor in the crypto world. What sets Pepe Unchained apart is its ability to deliver the same fun and playful spirit of Pepe ownership – while also offering significant utility and cost-efficiency. Pepe Unchained is set to be the superior alternative to \$PEPE, promising lower transaction costs and faster speeds for Pepe ownership. Its new proprietary blockchain will also serve as the launchpad for future meme coins and other tokens, leveraging the same cost-efficient transactions as \$PEPU.

With its key distinguishing feature native Layer 2 chain, unique staking reward mechanism and excellent presale performance, Pepe Unchained (\$PEPU) is set to transform the meme coin landscape by improving speed, lowering fees, and creating \$PEPU, a native token that powers the ecosystem. For meme coin and DeFi investors looking to strengthen their meme coin portfolios, Pepe Unchained is shaping up to be a hot ticket for substantial staking returns and potentially explosive trading once the token enters the open market.

Pepe Unchained stands out as anything but an ordinary token. While most frog-themed meme coins merely rely on their “Pepe The Frog” packaging or their association with PEPE, PEPU strives to transform the meme coin landscape with its next-gen features. For example, following the conclusion of its presale, PEPU is poised to introduce a Layer-2 ecosystem. In stark contrast to the majority of ERC-20 meme coins, PEPU holders will reap the benefits of exceptionally low trading fees, virtually instant transactions, and advanced tools such as an ETH-PEPU bridge, a customized decentralized exchange (DEX), a block explorer, sophisticated analytics, and more. Experts believe that this unique formula is ideally suited to attract retail investment, potentially serving as a pivotal factor behind its robust presale performance.

Furthermore, Pepe Unchained is set to introduce its proprietary Decentralized Exchange (DEX). This will make \$PEPU swaps with tokens like ETH and USDT cheaper. In the near future, all future tokens built on Pepe Unchained will be tradable on this DEX, and transactions can be tracked via its block explorer. All of this combined has led to an impressive social media following for this project. Its growing community highlights its potential, with over 18,000 Telegram subscribers and more than 67,000 followers on X (formerly Twitter).

Via its wildly successful \$PEPU presale, which amassed over \$74 million, Pepe Unchained is widely expected to be the next big thing in crypto landscape. As the presale of Pepe Unchained has closed and it has officially listing on several major DEXs, the project has garnered immense attention. With higher exposure, an explosion in early investor funding, and a wave of media attention, \$PEPU is building an undeniable case for a scorching reception upon its listing on top-tier exchanges.

Overall, with its interesting marketing strategy and extensive payment options, \$PEPU is showing all

signs of being a long-term investment. Despite not yet being listed on a major exchange to boost its liquidity, Pepe Unchained has all the potential to unseat \$PEPE for the third spot in the meme coin market. It is therefore no surprise that savvy investors are bullish on this meme coin, with some expecting it the next **100x** crypto.

About BTCC

BTCC, one of the longest-running exchanges in the world, supports [crypto copy trading](#), [spot trading](#), as well as [futures trading](#) for 300+ cryptocurrencies with a leverage of up to **500X**. If you want to trade cryptocurrency, you can start by signing up for [BTCC](#).

[BTCC](#) is among the best and safest platforms to trade cryptos in the world. The reasons why we introduce BTCC for you summarize as below:

- **Industry-leading security**
- **High Liquidity & Volume**
- **Extremely low fees**
- **High and rich bonus**
- **Excellent customer service**

How to Trade Crypto Futures on BTCC?

BTCC supports trading for Perpetual Futures contracts with a leverage of up to [500x](#), you can trade over 300 cryptocurrencies on BTCC at the most competitive price and highest security.

The following sets forth the step-by-step guidance for crypto futures trading (take Bitcoin as an example) on cryptocurrency exchange BTCC:

Step One: go to the [BTCC homepage](#) and log in to your BTCC account. If you do not have an account, you need to register first.

Step Two: on the BTCC official homepage, choose “Deposit”, and then fund your account with your preferred method (fiat deposit, crypto deposit or convert).

Step Three: go back to the BTCC official homepage, choose “Futures” -“USDT-M Perpetual Futures Contract”, and find BTC/USD trading pair.

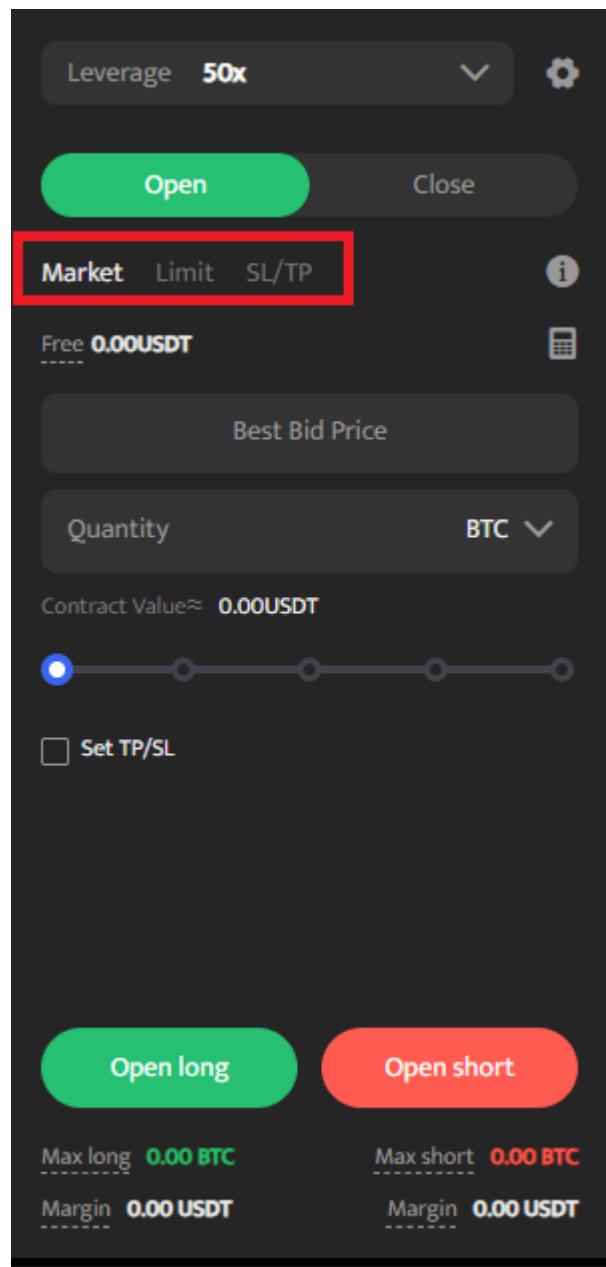

You can also directly click the button below to enter the BTC order page.

Step Four: choose the contract trading order type. Futures contract orders on BTCC platform include market orders, limit orders and SL/TP orders.

- **Market Order:** users place orders at the best price in the current market to achieve fast trading.
- **Limit Order:** Limit orders are a type of order to buy or sell futures at a price more favourable than the market price. When you buy at a price lower than the market price or sell at a price higher than the market price, the order will be in the form of a limit order.
- **SL/TP Order:** SL/TP orders are a type of order to buy or sell futures at a price less favourable than the market price. When you buy at a price higher than the market price or sell at a price lower than the market price, the order will be in the form of a SL/TP order.

The screenshot displays the BTCC futures trading interface. At the top, the leverage is set to 50x. Below this are 'Open' and 'Close' buttons. A red box highlights the order type selection area, which includes 'Market', 'Limit', and 'SL/TP' options. Below the order type selection, the 'Free' amount is 0.00USDT. The 'Best Bid Price' is displayed. The 'Quantity' field is set to BTC. The 'Contract Value' is approximately 0.00USDT. A slider is visible below the contract value. There is a checkbox for 'Set TP/SL'. At the bottom, there are 'Open long' and 'Open short' buttons. The 'Max long' and 'Max short' positions are both 0.00 BTC, and the 'Margin' is 0.00 USDT.

Step Five: adjust the leverage multiple.

Please keep in mind that operating leverage carries the risk of liquidation. Leverage should be adjusted based on your financial status and risk tolerance.

Step Six: choose the lot size and set the SL/TP price .

Step Seven: after setting the basic data information, users can choose to buy (open long) or sell (open short) after entering their ideal price. Traders should remind that the price cannot be higher or lower than the highest buying price or lowest selling price of the platform.

Step Eight: click the buy or sell button, and BTC futures contract order is completed.
