### **Pi Network (PI) Price Prediction: Will Pi Coin Reach \$10 Amid Binance Listing Rumors?**

Pi Network, a unique mobile mining project that allows users to earn Pi tokens from their phones without affecting battery life, finally enters a crucial phase as Pi Network's core team confirmed that its mainnet will officially launch on February 20, 2025. Following the announcement, several leading crypto exchanges rush to list Pi Coin, such as OKX, Bitget.

The price of Pi Network (PI) experienced a sharp rally following its initial listing, but quickly retraced, plunging by 85% and reaching a new all-time low on April 5. However, the price of PI later stabilized and showed signs of a potential breakout in May, fueled by speculation surrounding a possible Binance listing.

Notably, a major event scheduled for May 14th, is expected to bring more clarity, with core team members set to speak about future plans for the PI ecosystem. This article will introduce Pi Network, analyzing whether Pi Coin can hit \$10 amid Binance listing rumors.

## Pi Network Confirms Mainnet Launch Date on February 20

After years of anticipation, Pi Network has officially confirmed its [Open Mainnet launch](#), marking a significant milestone in the project's evolution. On February 11, the core team announced that the mainnet would go live on February 20, 2025, signaling the project's long-awaited transition into an open, fully functional blockchain ecosystem.

The team reported that over 19 million users have successfully completed KYC verification, with 10.4 million already migrating their coins to the mainnet. Additionally, the network now boasts 100 fully developed applications, satisfying another major requirement for the Open Network phase. With no external obstacles expected, the launch is set to proceed on schedule.

As anticipation builds, Pi Network's (PI) IOU price has surged significantly, reflecting growing investor excitement. Between February 9 and February 12, PI skyrocketed 78%, underscoring the market's enthusiasm for the upcoming Open Network launch.

## Will Binance List Pi Coin?

With millions of KYC-verified users, Pi Network wields considerable influence in the crypto space. Despite scurrying major listing on several leading crypto exchanges, with Binance being the largest crypto exchange by trading volume, a listing on this platform could drive another major rally, possibly pushing Pi Coin toward the \$10 milestone. Despite the momentum, the key question remains: Will Binance officially list Pi Coin? As major exchanges focus on user engagement and trading volume, the stance of Binance on this matter has sparked significant interest.

Notably, the Pi Network has seen renewed attention amid speculation of an upcoming Binance listing. Although no official confirmation has been issued by Binance, activity around the token—particularly a sudden increase of 5 billion PI coins added to the circulating supply—has sparked interest.

This spike has driven \$PI's circulating supply from 7 billion to 12 billion, despite centralized exchanges and CoinMarketCap still reflecting the older data. The additional tokens are believed to originate from a liquidity pool, possibly in preparation for a major exchange listing.

This move could indicate that the Pi Network team is aligning its infrastructure to meet listing requirements, especially with Binance in focus.

## Future Outlook of Pi Network

Looking ahead, the future outlook for Pi Coin will be shaped by several key factors that could determine its position within the broader cryptocurrency market:

**Expanding User Base:** With over 10 million users already migrated to the Mainnet and a total user count surpassing 19 million, Pi Network boasts one of the largest and most active communities in the crypto space. This robust user base offers a strong foundation for adoption and long-term growth.

**Enhanced Accessibility Through Mobile Mining:** Unlike traditional cryptocurrencies that often require costly hardware for mining, Pi enables users to mine tokens directly from their smartphones. This mobile-first approach significantly lowers the barrier to entry, making crypto participation more accessible to the general public—especially in regions with limited access to advanced computing resources.

**Ecosystem Growth and Utility Expansion:** The Pi ecosystem continues to evolve, incorporating platforms such as the Fireside Forum and a native ad network. With plans to onboard over 100 decentralized applications (dApps), Pi is building a functional ecosystem that extends beyond simple token trading. This development broadens its practical use cases and strengthens its appeal as a utility-focused digital currency.

Together, these elements position Pi Network as a project with notable potential—provided it can maintain momentum, deliver on its development roadmap, and achieve greater integration within the global crypto economy.

## Final Verdict: Will Pi Coin Hit \$10?

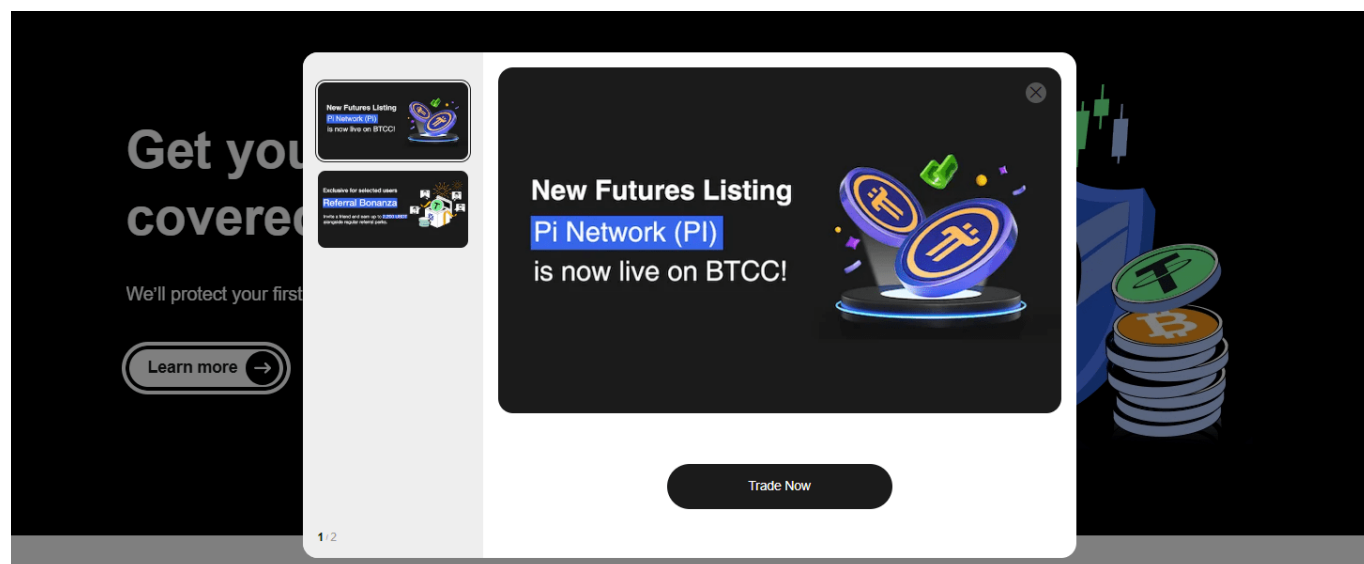

Pi Network's progression from Mainnet to Open Network marks a significant milestone in its goal to build a more accessible and inclusive cryptocurrency ecosystem. With the mainnet launch just days away and major exchanges supporting its growth, Pi Coin is entering a pivotal phase.

Despite the surge in Pi Coin's price following news of its exchange listings, its future remains uncertain. While a potential listing on Binance could drive the price towards \$10, skepticism about the project's long-term viability persists. Investors should proceed with caution, as unverified exchange listings and the prolonged Enclosed Mainnet phase contribute to ongoing uncertainty.

Then, choose the contract trading order type. Futures contract orders on BTCC platform include market orders, limit orders and SL/TP orders.

- **Market Order:** users place orders at the best price in the current market to achieve fast trading.
- **Limit Order:** Limit orders are a type of order to buy or sell futures at a price more favourable than the market price. When you buy at a price lower than the market price or sell at a price higher than the market price, the order will be in the form of a limit order.
- **SL/TP Order:** SL/TP orders are a type of order to buy or sell futures at a price less favourable than the market price. When you buy at a price higher than the market price or sell at a price lower than the market price, the order will be in the form of a SL/TP order.

Next, adjust the leverage multiple.

**Please keep in mind that operating leverage carries the risk of liquidation. Leverage should be adjusted based on your financial status and risk tolerance.**

Then, choose the lot size and set the SL/TP price. After setting the basic data information, users can choose to buy (open long) or sell (open short) after entering their ideal price. Traders should remind that the price cannot be higher or lower than the highest buying price or lowest selling price of the platform.

Finally, click the buy or sell button, and PI futures contract order is completed.
