Pi Network Price Prediction: Will Pi Coin Hit \$2?

As the price of the Pi Coin soars above \$1, the Pi Network is once again in the news, boosting optimism in the cryptocurrency industry.

The Pi [cryptocurrency](#) value has attracted the interest of traders, investors, and analysts due to its 51% price increase in a single day and its more than 167% trading volume increase. Many are now aiming for the \$2 milestone as anticipation builds for a significant announcement from the Pi Core Team.

Pi Network Price Slashes Through Critical Support

The value of Pi Coin surged above \$1 after weeks of relatively flat movement, momentarily reaching \$1.20 before stabilising. Pi Network Coin is one of the best-performing digital assets this week because of its recent climb, which is fuelled by increased speculation about the network's future and renewed excitement.

There is immediate resistance at \$1.40 according to technical indicators, while support is near the \$0.80 level. According to market experts, if forthcoming developments live up to the expectations, breaking the \$1.40 barrier might pave the way for a greater push above \$2.

“\$PI roaring back to almost a dollar,” crypto expert Justin Wu thundered on X, echoing the general excitement felt across web 2.0.

Ahead of the Announcement on May 14, Anticipation Grows

Pi Core Team’s much-anticipated announcement, set to take place on May 14 at the Consensus Conference 2025 in Toronto, is a major factor driving Pi Coin’s surge. The event’s anticipated speech by Pi Network founder Dr. Nicolas Kokkalis has prompted wild speculation over possible enhancements to the ecosystem.

If crypto expert Dr. Altcoin is to be believed, the impending announcement might be a watershed moment. He made the observation that this might not be a routine update. “Some have even suggested integrating real-world utilities into an even more expansive app ecosystem.”

Among the possible enhancements that could make the Pi cryptocurrency practical for daily transactions are decentralised software (dApps), gaming projects, and expanded wallet functionalities. To further empower users to shape the future of the Pi Network, rumours have it that community governance tools like a decentralised autonomous organisation (DAO) will soon be implemented.

Will Pi Coin Hit \$2?

The bullish momentum surrounding the Pi coin has not yet been slowed, and the price is currently over the important \$1 mark. If the present trend continues and the forthcoming announcements bring about significant utility enhancements or partnerships, analysts predict that the token might reach \$2 by August.

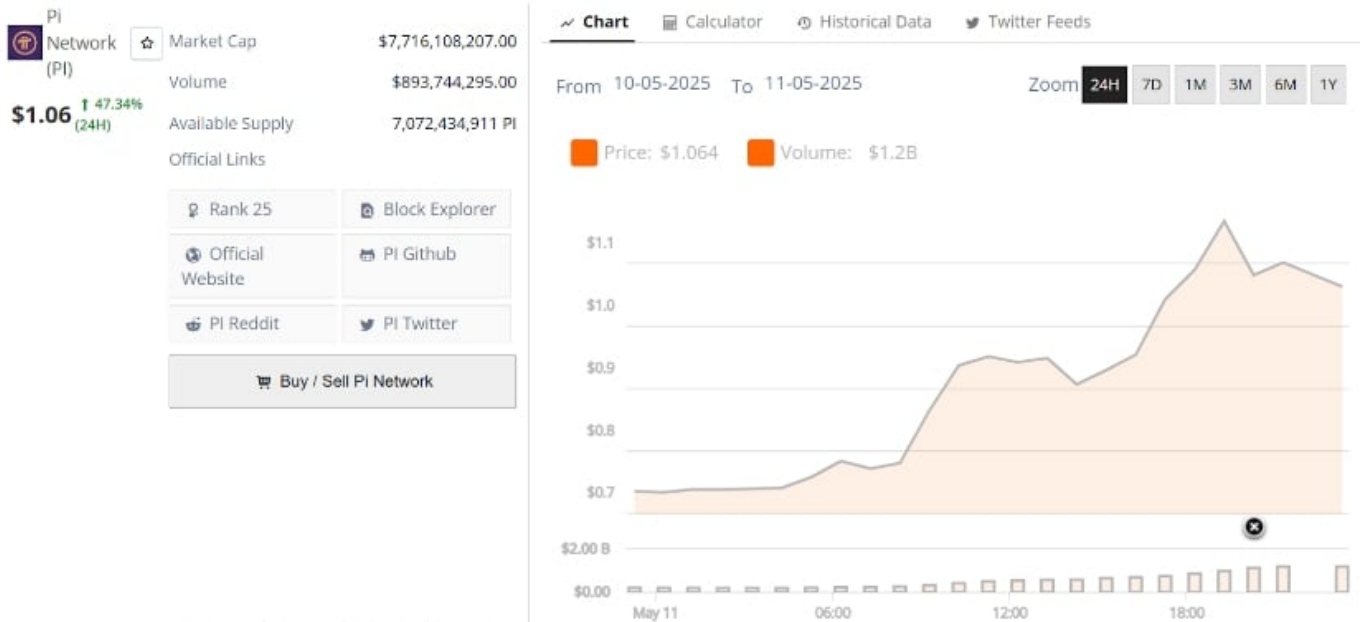

If the targets outlined in the roadmap are achieved and the market demand remains high, Dr. Altcoin has even proposed a \$5 aim for Pi Coin by the end of the year.

The Pi Network crew has not officially announced anything at this time, so keep that in mind. Speculation may remain the primary driver of market fluctuations until that time comes.

Rumours about Binance Listing and Whale Activity

Just to add gasoline to the fire, blockchain data shows that one wallet now has 155 million PI tokens, the most of any wallet on centralised exchanges, after purchasing 70 million tokens from OKX. This development has caused some to wonder if a big cryptocurrency exchange is getting ready to list Pi Network Coin.

There are rumblings that the largest cryptocurrency exchange in the world, Binance, may be the next to list Pi Coin. There have been indications of increased blockchain activity and Know Your Business (KYB) compliance activities, which typically occur before a listing on trustworthy platforms, so this prediction makes sense.

Conclusion

The most recent updates on the Pi Network indicate that this innovative cryptocurrency project is heading in the right direction. Pi Coin appears to have all the makings of a legendary coin, what with its massive exchange listings, expanding community, and cutting-edge innovation.

At present, the crypto community is keeping a careful eye on May 14, a date that has the potential to shape Pi Coin's market trajectory for the remainder of 2025 and set the tone for Pi Network's next chapter.

Why Trade Crypto on BTCC

Founded in 2011, BTCC is among the world's oldest and most reliable bitcoin exchanges. Many traders use BTCC because it has established a solid reputation in the market for security and regulatory compliance over the years. The platform is especially well-suited for traders in North America and Europe, with presences in the US, Canada, and Europe.

In addition to bitcoin trading, BTCC provides traders with access to non-crypto assets including gold, silver, and U.S. equities through cutting-edge features like copy trading, perpetual futures, and tokenized stocks. Both novice and seasoned traders searching for a secure and regulated platform can benefit from BTCC's range of offerings.

The firm's products are designed to meet the needs and desires of both rookie and experienced traders. Here are five reasons for using the exchange:

- Numerous transferable assets
- Excessive trading leverage
- Strong copy trading capabilities
- Perfect security record
- Interface that is easy to use
- Accessible to traders in the US and Canada

By creating an account, I agree to BTCC's [Privacy Policy](#) and [User Agreement](#).

Step 2: Finish the KYC

The Know Your Customer (KYC) procedure is the next step after your account is operational. The main goal of this stage is to maintain compliance and security. You must upload identification, such as a passport or driver's license. You'll receive a confirmation email as soon as your documents are validated, so don't worry—it's a quick process.

Step 3. Deposit Funds

After that, adding money to your account is simple. BTCC provides a range of payment options, such as credit cards and bank transfers. To get your money into your trading account, simply choose what works best for you, enter the amount, and then follow the instructions.

- **Fiat Deposit.** Buy USDT using Visa/Mastercard (KYC required).
- **Crypto Deposit.** Transfer crypto from another platform or wallet.

Fund Your Account

BTCC FAQs

Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the

platform's infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

Is KYC Necessary for BTCC?

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

Is There a Mobile App for BTCC?

Indeed. For users of iOS and Android, BTCC has a mobile app. The exchange's website offers the mobile app for download. Since both the web version and the mobile app have the same features and capabilities, they are comparable.

Will I Have to Pay BTCC Trading Fees?

Indeed. BTCC levies a fee for trade, just like a lot of other centralised exchanges. Each user's VIP level, which is unlocked according to their available money, determines the different costs. The BTCC website provides information on the charge rates.

Can I Access BTCC From the U.S?

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
