Pi Network, a decentralized cryptocurrency project, was launched on March 14, 2019 (Pi Day) by a team of Stanford graduates. Unlike traditional cryptocurrencies that require extensive computational power or staking, Pioneers—as Pi Network users are called—can mine Pi coins on their mobile devices with minimal energy consumption. The project aims to build a peer-to-peer digital economy, prioritizing security, accessibility, and community-driven growth.

The Pi coin, Pi Network's native token, is mined through a simple process: users tap a button in the

app once per day, making it one of the most accessible mining mechanisms in the crypto space.

Since its inception, Pi Network has been a topic of heated discussion in the cryptocurrency community. While millions have joined the project, attracted by its innovative approach, others remain skeptical, questioning its legitimacy and long-term viability.

PI USDT-margined perpetual futures contracts with a leverage of up to 50x are now available on BTCC platform. If you are interested, click the button below to enter PI trading page⇓

Pi’s Open Mainnet Goes Live On February 20

In December 2021, Pi Network reached a key milestone with the launch of its Mainnet. However, rather than an immediate full-scale launch, the project entered an Enclosed Network phase, during which the blockchain was functional but remained isolated from external connectivity.

On February 12, Pi Pi network team officially announced that Pi Network’s mainnet set to launch at 8am UTC on February 20, 2025. This highly anticipated event will mark the next major step in Pi’s evolution, enabling full external connectivity for its blockchain and unlocking new possibilities for users, developers, and the broader crypto community.

At 8:00 AM UTC on February 20, Pi Network officially launched its open mainnet, marking a long-awaited milestone for users who have been mining the cryptocurrency for the past six years. With this transition, both early adopters and the broader market are eager to see how Pi will integrate into the wider crypto ecosystem.

The launch ignited a wave of excitement, driving Pi Coin’s value up by 36% within the first hour. However, price volatility quickly followed, with PI surging to $1.97 before dropping to $1.80 on OKX and $1.70 on Bitget. These fluctuations sharply contrast pre-launch speculations, where IOU prices were projected between $60 and $70.

As trading stabilizes, market participants will closely monitor Pi Network’s real-world adoption and its long-term position within the broader cryptocurrency landscape.

What can be Expected from Pi Network's Open Network Launch?

The Pi Network Open Network launch marks a significant turning point, enabling external connectivity for the first time. This transition will unlock new opportunities for Pioneers, developers, and businesses, expanding Pi's real-world applications and solidifying its role in the broader digital economy. With the Open Network, Pi will move beyond its enclosed system and introduce the following major changes:

External Connectivity & Expanded Utility

With the removal of ecosystem restrictions, Pi's blockchain will integrate with external networks, allowing seamless transactions beyond its enclosed system. This shift enhances Pi's functionality, liquidity, and overall utility, making it a more viable asset in the global cryptocurrency landscape.

Node Transition to Mainnet

Following the launch, Pi Network's firewall will be removed, allowing nodes to fully participate in the Mainnet blockchain. The Core Team will prioritize reliable contributors, ensuring a smooth transition from Testnet to Mainnet while maintaining network stability and security.

Secure & Verified Participation

To ensure a trusted and secure environment, Pi Network will implement strict KYC (Know Your Customer) verification for all Pioneers. Additionally, businesses looking to integrate Pi payments or services must complete KYB (Know Your Business) verification. A directory of KYB-verified businesses will be available on the official Pi Network website, providing transparency and fostering a more secure ecosystem.

What is the Significance of Open Network Launch?

The Open Network launch is a pivotal moment for Pi Network, transitioning it from a closed ecosystem to a fully integrated and accessible blockchain. This shift represents more than just expanded usability—it signals Pi's entry into the broader cryptocurrency market and its potential adoption in real-world applications.

The Open Network launch is a defining moment in Pi Network's journey, setting the stage for mass adoption, innovation, and long-term sustainability. Whether it becomes a widely used digital currency depends on continued development, strategic partnerships, and active community participation.

What should Pioneers Do Before and After the Open Network Launch?

Before Open Network Launch (Pre-February 20, 2025)

- Complete KYC if you haven't already.
- Migrate your Pi to Mainnet to ensure it's usable in the Open Network.
- Engage with Pi apps and services to support the ecosystem's development.

After Open Network Launch (Post-February 20, 2025)

- Explore external transaction opportunities using Pi.
- Monitor Pi's integration with exchanges (if and when listed).
- Continue crypto mining and contributing to the ecosystem's growth.
- Support businesses that accept Pi, strengthening its real-world adoption.

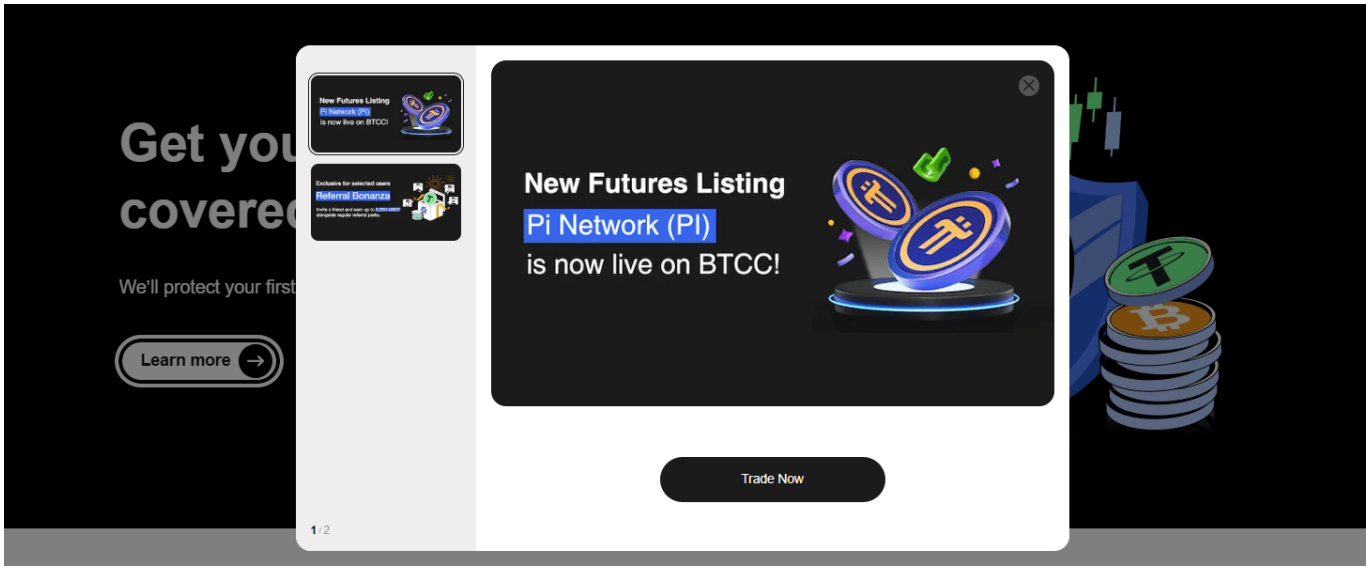
How to Buy Pi Coin: A Step-by-Step Guide

Luckily, PI USDT-margined perpetual futures contracts with a leverage of up to 50x are now available on BTCC platform. If you are interested in PI and want to buy the token, you can start by signing up for BTCC platform.



The following sets forth the guidance for trading PI futures on cryptocurrency exchange BTCC:

Step 1: Create a BTCC account

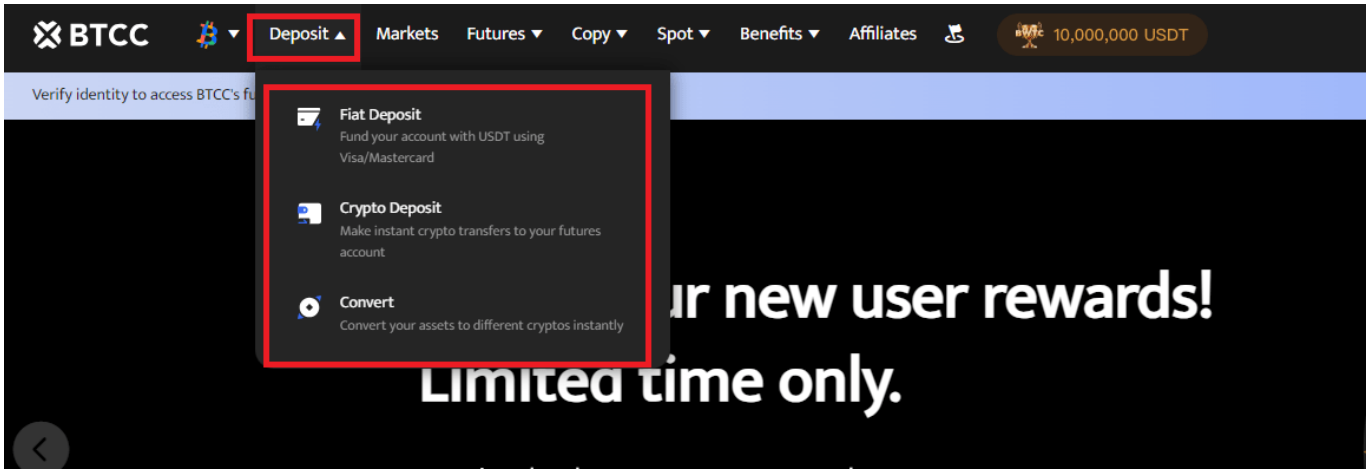
Sign up BTCC to start your journey on this leading crypto exchange.

Step 2: Complete BTCC's identity verification

Kindly verify your identity to ensure full compliance and enhance your trading experience on BTCC. You can access the identity verification page, fill out your country, upload your ID documents, and submit your selfie. You will receive a notification once your identity has been successfully verified.

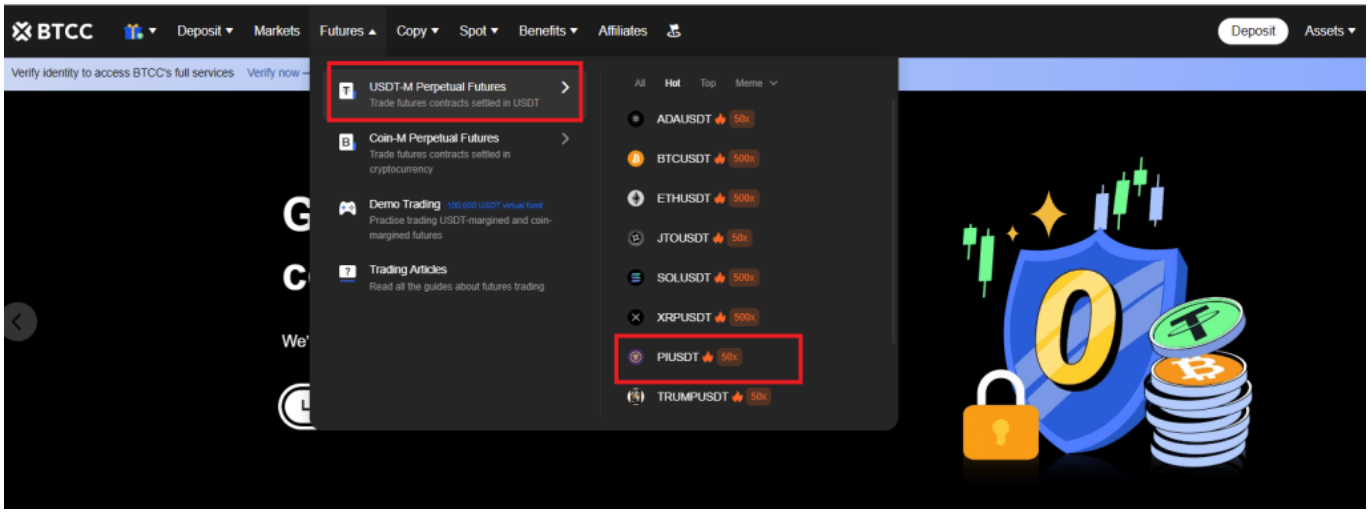
Step 3: Fund your BTCC account

On the BTCC official homepage, choose "Deposite", and then fund your account with your preferred method.



Step 4: Place your crypto futures order on BTCC

Go back to the BTCC official homepage, choose "Futures" -"USDT-M Perpetual Futures Contract", and find the PI trading pair that you want to trade.

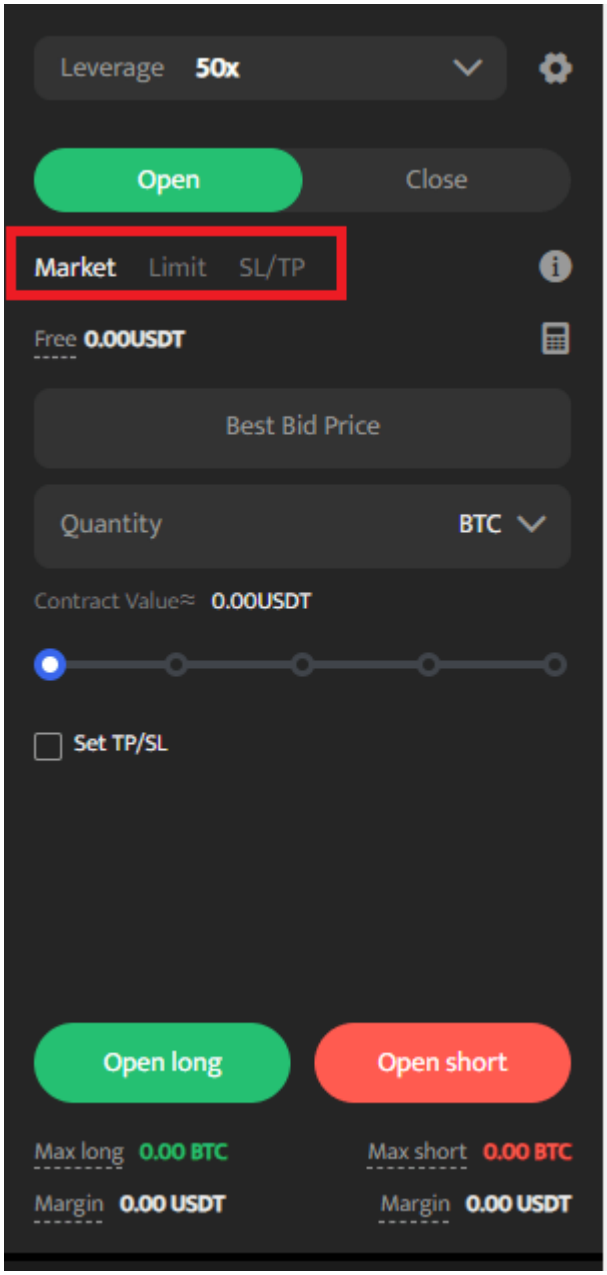


You can also click the button below to directly enter PI trading page⇓

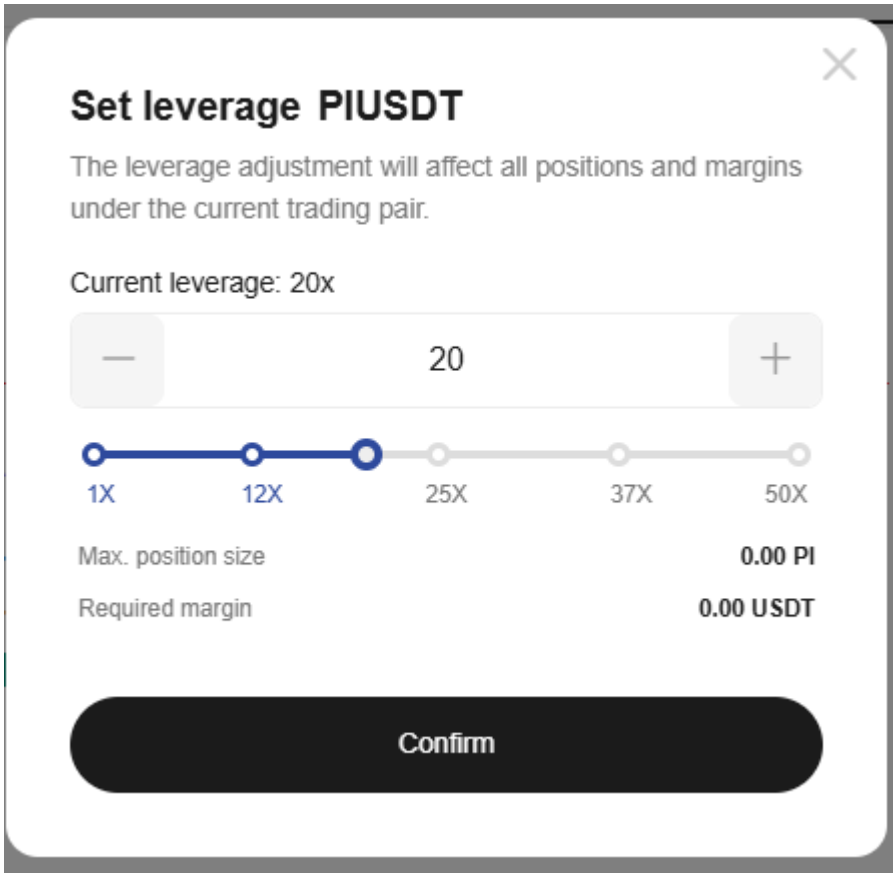
[TRADE_PLUGIN]PIUSDT,PIUSDT[/TRADE_PLUGIN]

Then**,** choose the contract trading order type. Futures contract orders on BTCC platform include market orders, limit orders and SL/TP orders.

- **Market Order**: users place orders at the best price in the current market to achieve fast trading.
- **Limit Order**: Limit orders are a type of order to buy or sell futures at a price more favourable than the market price. When you buy at a price lower than the market price or sell at a price higher than the market price, the order will be in the form of a limit order.
- **SL/TP Order**: SL/TP orders are a type of order to buy or sell futures at a price less favourable than the market price. When you buy at a price higher than the market price or sell at a price lower than the market price, the order will be in the form of a SL/TP order.



Next, adjust the leverage multiple.



Please keep in mind that operating leverage carries the risk of liquidation. Leverage should be adjusted based on your financial status and risk tolerance.

Then, choose the lot size and set the SL/TP price. After setting the basic data information, users can choose to buy (open long) or sell (open short) after entering their ideal price. Traders should remind that the price cannot be higher or lower than the highest buying price or lowest selling price of the platform.

Finally, click the buy or sell button, and PI futures contract order is completed.

Conclusion

Pi Network’s progression from Mainnet to Open Network represents a major milestone in its mission to create a more accessible and inclusive cryptocurrency ecosystem. This launch marks the moment when Pi will finally integrate with the broader blockchain landscape, unlocking new opportunities for users, businesses, and developers.

By enabling external connectivity, Pi has the potential to reshape digital transactions, expand its real-world applications, and drive broader adoption. As the Open Network era begins, the active participation of the Pi community will play a crucial role in shaping its future and ensuring its long-term success in the evolving world of blockchain technology.

About BTCC

BTCC, one of the longest-running exchanges in the world, supports crypto copy trading, spot trading, as well as futures trading for 300+ cryptocurrencies with a leverage of up to 500X. If you want to engage in cryptocurrency trading, you can start by signing up for BTCC.

BTCC is among the best and safest platforms for crypto trading. The reasons why we introduce BTCC for you set forth as below:

Industry-leading security

BTCC attaches great importance on security. Since founded in 2011, BTCC has never been hacked or been a victim of any other kind of successful malicious attack, which fully illustrates its security capabilities. Through measures like segregation of assets, 1:1 storage of users' assets, money laundering prevention and identity authentication and no collateralising tokens for loans, BTCC enjoys good reputation in asset security.

High Liquidity & Volume

BTCC is ranked top 10 by trading volume on both CoinMarketCap and CoinGecko, the world's two largest crypto information platforms. BTCC prides itself on providing crypto futures trading services to users worldwide with market-leading liquidity, offering perpetual futures on over 300 cryptocurrencies, including BTC, ETH, DOGE, LTC, SOL, XRP, SHIB, etc.

Extremely low fees

Charging high fees means less return for investors. Compared with other major exchanges, BTCC only charges 0.06% for both takers and makers, which are far below the industry average. According to the largest and most recent empirical study on crypto exchange trading fees, the average spot trading taker fee is 0.2294% and the maker fee is 0.1854%.

High and rich bonus

BTCC holds all kinds of campaigns where investors can participate to win exciting bonus. For example, new users can get rewards up to 10,055 USDT coupon through completing relevant missions, like registration, identity verification, first deposits, cumulative futures trading volume, etc. Besides, becoming VIP also can enjoy rewards like VIP-exclusive perks, including discounts on trading fees, access to exclusive campaigns, BTCC merch, priority customer support, fast withdrawal, and many more.

Excellent customer service

BTCC also gains great reputation in terms of customer support. If you are confused or have problem in the process of trading currencies, you can obtain customer support via email and live chat, BTCC offers 24/7 online customer service for you.
