Sun Token (SUN) operates on the TRON blockchain, which is known for its high throughput, scalability, and low transaction fees. As a governance token on the SUN.io platform, SUN plays a crucial role in stablecoin swaps, token mining, and community self-governance. These functionalities

are similar to how CRV operates on Curve DAO.

SUN is the native protocol of Sun Token, the native token of a TRON-based decentralized exchange and yield farm. Its name comes from the blockchain's creator, billionaire Justin Sun, who also founded TRON and is the CEO of BitTorrent.

Launched on September 16, 2020, SUN switched to a new smart contract (migrated the token to new code) in May 2021. In both iterations, it is a TRC-20 token, meaning it is based on the TRON blockchain.

What Factors Affect the Price of Sun Token?

Before outlining SUN's historical performance and price prediction, let's first list a few key elements that affect the price of SUN tokens:

Airdrop distribution: \$SUN tokens act as both utility token and governance token within the SUN ecosystem. 1% of total SUN supply (199,007,300 SUN) is earmarked for airdrops to veCRV holders. This token allocation is expected to shape the market after listing and may lead to price volatility as the community claims rewards.

Market sentiment: Market sentiment plays a key role in deciding the upside potential of a meme coin. If people are excited about meme coins and projects that work on many blockchains, the price of \$SUN can increase in the coming weeks and months.

Adoption and usage: As there is growing adoption for \$SUN, and more investors use it on different blockchains, the price of \$SUN is expected to increase because more people want it.

Partnerships and collaborations: If SUN works with other projects, exchanges, or famous people, it can make more people notice and trust the token, which could increase the price.

Rules and regulations: Changes in the rules about cryptos can either help or hurt SUN's growth, which can affect the price of its token.

[TRADE_PLUGIN]SUNUSDT,SUNUSDT[/TRADE_PLUGIN]

Sun Token (SUN) Historical Performance

Since its LAUNCH, Sun Token (SUN) has demonstrated remarkable resilience and growth potential within the volatile cryptocurrency market. Notably, SUN has garnered attention due to its significant volatility of 59.70%, which, while a double-edged sword, offers seasoned traders ample opportunities for high rewards.

SUN's year-to-date performance of 71.18% underscores its strength and appeal to investors, despite the unpredictable market conditions. This performance surpasses the returns of major cryptocurrencies such as Bitcoin (39.57%) and Ethereum (12.41%) over the past year. The substantial returns in just one year position SUN as a promising asset within the crypto sphere.

When compared to Bitcoin and Ethereum, SUN’s superior growth trajectory highlights its potential. This outperforming trend suggests that SUN could reach \$0.6 by 2025. Given the steadily growing interest and significant trading volumes, this optimistic projection appears attainable for those willing to invest now.

Is Sun Token a Good Investment in 2024?

Investing in Sun Token (SUN) offers the promise of significant return on investment (ROI) but also entails considerable risks. If SUN reaches \$ 2.1447 by 2025, early investors could reap substantial rewards. This potential is supported by the diverse functionalities and governance rights offered by the SUN.io platform, which drive demand and enhance value.

However, investors should be aware of the challenges ahead. Market volatility, regulatory changes, and competition from rival platforms pose significant risks. Moreover, the success of Sun Token is closely tied to broader crypto market trends and the continued adoption of the TRON ecosystem.

In conclusion, while the potential ROI is attractive, investors must carefully consider the risks involved. It is crucial to strike a balance between optimism and caution as you navigate the future of Sun Token (SUN).

How to Buy the Sun Token?

If you are interested in buying Sun Token, we are excited to announce that SUN USDT-margined perpetual futures contract with a leverage of up to 50x is available on BTCC, you can buy SUN coin on BTCC .

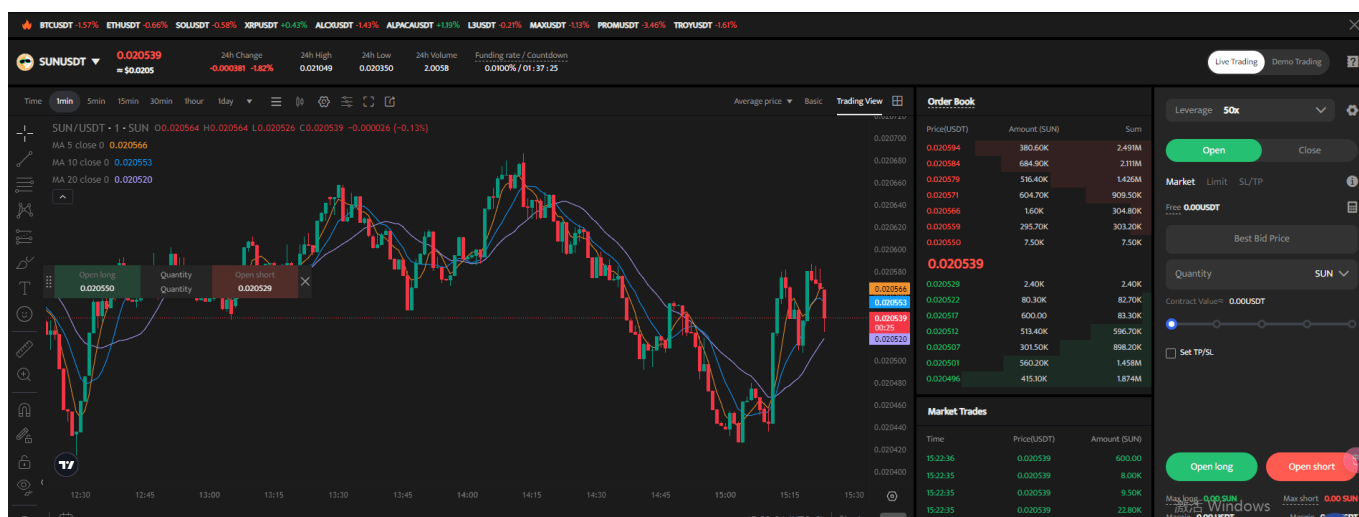

The following sets forth the guidance for SUN USDT-margined perpetual futures contract trading on cryptocurrency exchange BTCC:

Step One: go to the [BTCC homepage](#) and log in to your BTCC account. If you do not have an account, you need to register first.

Step Two: on the BTCC official homepage, choose “Deposit”, and then fund your account through your preferred methods.

Step Three: go back to the BTCC official homepage, choose “Futures” - “USDT-M Perpetual Futures Contract”, and find SUN coin trading pair.

You can also directly click the button below to enter the SUN order page ↓

[TRADE_PLUGIN]SUNUSDT,SUNUSDT[/TRADE_PLUGIN]

Step Four: choose the contract trading order type. BTCC contract orders are divided into market orders, limit orders and SL/TP orders.

- **Market Order:** users place orders at the best price in the current market to achieve fast trading.
- **Limit Order:** Limit orders are a type of order to buy or sell futures at a price more favourable than the market price. When you buy at a price lower than the market price or sell at a price higher than the market price, the order will be in the form of a limit order.
- **SL/TP Order:** SL/TP orders are a type of order to buy or sell futures at a price less favourable than the market price. When you buy at a price higher than the market price or sell at a price lower than the market price, the order will be in the form of a SL/TP order.

Step Five: adjust the leverage multiple.

Please keep in mind that operating leverage carries the risk of liquidation. Leverage

should be adjusted based on your financial status and risk tolerance.

Step Six: choose the lot size and set the SL/TP price .

Step Seven: after setting the basic data information, users can choose to buy (open long) or sell (open short) after entering their ideal price. Traders should remind that the price cannot be higher or lower than the highest buying price or lowest selling price of the platform.

Step Eight: click the buy or sell button, and the SUN coin futures contract order is completed.

That's all information about Sun Token (SUN). If you want to know more information about Sun Token (SUN) coin and other cryptocurrencies, please visit [BTCC Academy](#).
