How to Find the Best Altcoins Under \$1 Yourself

If you want to discover low-cost crypto gems on your own, follow these criteria:

1. Look for Real Utility

Focus on use-case-driven projects (e.g., DeFi, oracles, gaming, RWA tokenization).

2. Check Tokenomics

Low supply + real demand = potential moonshot. Avoid tokens with massive inflation.

3. Community & Developer Activity

Projects with active GitHub commits and growing Telegram/Discord communities often outperform.

4. Partnerships and Roadmaps

Always check for real partnerships and whether the team delivers on roadmap milestones.

Final Thoughts: Which Altcoins Under \$1 Should You Watch?

The crypto market in July 2025 is full of opportunities, especially for investors targeting low-cost altcoins with real use cases. Coins like VeChain (VET), DIA, Kasma, and NXRA are backed by solid fundamentals and developer activity. Meanwhile, meme and community-driven projects like SHIB and ETN still have massive upside if timed correctly.

Remember: Altcoins under \$1 are not necessarily cheap by valuation — always do your own research (DYOR) before investing.

BTCC FAQs

Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the platform's infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

Is KYC Necessary for BTCC?

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

Is There a Mobile App for BTCC?

Indeed. For users of iOS and Android, BTCC has a mobile app. The exchange's website offers the mobile app for download. Since both the web version and the mobile app have the same features and capabilities, they are comparable.

Will I Have to Pay BTCC Trading Fees?

Indeed. BTCC levies a fee for trade, just like a lot of other centralised exchanges. Each user's VIP level, which is unlocked according to their available money, determines the different costs. The BTCC website provides information on the charge rates.

Can I Access BTCC From the U.S?

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
