## How to Find the Best Crypto Under \$1

Finding undervalued crypto under \$1 involves more than just picking low prices. Use these tips:

### 1. Look at Market Cap, Not Price

A coin's price doesn't reflect its true potential. Focus on low market cap coins under \$1 rather than just cheap tokens.

### 2. Check Real Use Cases

Invest in coins with real-world utility. Avoid hype-driven coins with no product.

### 3. Review the Roadmap

Promising coins often have detailed development plans. Look for consistent progress on GitHub or official updates.

### 4. Assess Community and Partnerships

Strong communities often drive adoption. Look for coins with vibrant Twitter, Telegram, or Reddit engagement.

### 5. Watch Volume and Liquidity

Avoid coins with very low trading volume. High liquidity ensures you can enter and exit easily.

## Risks of Investing in Crypto Under \$1

While these coins offer high upside, they also carry risks:

- Volatility: Cheap altcoins can swing wildly in price.
- Scams and rug pulls: Low-cap coins are prime targets for pump-and-dump schemes.
- Lack of utility: Some cheap coins may never gain real adoption.
- Delisting: Tokens with low volume risk being removed from exchanges.

Always do your own research (DYOR) and never invest more than you can afford to lose.

## Where to Buy Crypto Under \$1

You can buy these low-cost cryptocurrencies on trusted exchanges such as:

- Binance – Great for SHIB, XRP, VET, XLM, ACH
- KuCoin – Good for NXRA, IOTX, COTI
- Coinbase – Accessible for XRP, XLM, SHIB
- Gate.io – Wide range of micro-cap altcoins
- Bybit – Useful for futures and spot trading

Make sure to use a secure non-custodial wallet for long-term storage, like Trust Wallet or Ledger Nano X.

## Conclusion: Is Crypto Under \$1 Worth It?

Absolutely — if you choose the right projects. Cryptocurrencies under \$1 give retail investors the chance to gain significant exposure to the next wave of crypto adoption without a massive upfront investment.

By focusing on utility, partnerships, and fundamentals, you can find undervalued crypto gems poised for breakout growth in 2025.

Whether you're looking for cheap DeFi coins, payment tokens, or blockchain infrastructure projects, this list provides a solid starting point for building your low-cost portfolio.

## BTCC FAQs

### Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the platform's infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

### Is KYC Necessary for BTCC?

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

### Is There a Mobile App for BTCC?

Indeed. For users of iOS and Android, BTCC has a mobile app. The exchange's website offers the mobile app for download. Since both the web version and the mobile app have the same features and capabilities, they are comparable.

## **Will I Have to Pay BTCC Trading Fees?**

Indeed. BTCC levies a fee for trade, just like a lot of other centralised exchanges. Each user's VIP level, which is unlocked according to their available money, determines the different costs. The BTCC website provides information on the charge rates.

## **Can I Access BTCC From the U.S?**

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
