What are Metaverse Cryptocurrencies?

Metaverse crypto is an emerging segment of digital assets where cryptocurrencies serve both as exchange currencies and governance mechanisms in the virtual world. These tokens have many functions, such as providing users with a stake in the digital landscape, participation in governance, and shaping its evolution. Beyond digital real estate, these tokens are the backbone of entire economies, aiding everything from gaming and socializing to virtual commerce and art.

A cryptocurrency exchange is necessary for holders to convert these metaverse coins to fiat. Usually, investors can look for the most popular types of metaverse crypto coins in play-to-earn (P2E) games, metaverse platforms and 3D virtual worlds.

BTCC offers 300+ virtual currency contract trading pairs with leverage ranging from 1X to 225X. If you want to start trading cryptocurrencies, you can start by signing up for [BTCC](#).

Top Metaverse Cryptocurrencies to Buy in 2024

After have a basic knowledge about metaverse coin, let's have a close look on the best metaverse cryptocurrencies to buy in 2024.

Axie Infinity (AXS)

The first best metaverse crypto we list is Axie Infinity (AXS). Axie Infinity is an online NFT (non-fungible token) based game created by Sky Mavis in Vietnam. As a turn-based card game built on the Ethereum network, Axie Infinity enables players to breed, raise, battle and trade Axie creatures.

During the Covid-19 pandemic, Axie Infinity went viral in crypto world, emerging as the biggest "play-to-earn" game. As a governance token, AXS allows token holders to vote on the future development of the gaming experience. AXS was wildly popular during the pandemic as a way for people to earn money while locked up at home.

Decentraland (MANA)

Launched in February 2020, Decentraland is one of the first blockchain-based metaverses. Decentraland is a VR platform powered by the Ethereum (ETH) blockchain, with a native token MANA used to transact business within its worlds.

With a hope of becoming a place where more and more users choose to hang out, conduct business and transact daily, Decentraland allows users to create avatars and navigate this online universe as they wish. By the end of 2021, the platform had attracted an impressive 300,000 monthly active users, as well as tens of thousands of LAND owners.

The platform's native cryptocurrency, known as MANA, is expected go down in history as one of the most profitable metaverse assets of all time.

ApeCoin (APE)

ApeCoin is an ERC-20 cryptocurrency that was launched in 2022 by Yuga Labs. It is native to both the Bored ApeY Club (BAYC), and the Otherside metaverse game. ApeCoin is not only one of the biggest metaverse coins on the market but also one of the newest coins. We can even say that no metaverse crypto coins list would be complete without ApeCoin, indicating its significant role in crypto space.

APE is designed to power the growing ecosystem around the popular Bored Ape Yacht Club, one of the most successful non-fungible token (NFT) art collections. ApeCoin (APE) token is also the native transactional unit within the Otherside metaverse and will be used as a peer-to-peer currency between users. It will also likely be required to buy and/or rent land within Otherside.

Given the massive potential of Otherside, ApeCoin is a solid contender for the most promising metaverse crypto.

The Sandbox (SAND)

The Sandbox (SAND) cryptocurrency is an ERC-20 token based on the Ethereum blockchain. The SAND coin was issued by The Sandbox team to build an open and decentralized virtual world. As a functional token, SAND coins play an important role in The economic ecosystem of The Sandbox platform. Users can use SAND coins to participate in the purchase, sale, and trading of digital assets such as plots, scenes, and game items. SAND coins can also be used to support incentives for creators and developers, promoting the continued development and innovation of the platform.

As SAND coin is based on Ethereum blockchain technology, it features decentralization, security and transparency of blockchain. All transactions made with SAND coins would be recorded on the blockchain, ensuring the security and traceability of transactions. Besides, SAND coins have relatively low transaction fees and transaction confirmation time on the Ethereum network is fast.

To sum up, as a functional token based on the Ethereum blockchain, The Sandbox (SAND) cryptocurrency aims to build an open and decentralized virtual world and provide users with rich digital asset transactions and incentives. As the platform evolves and market acceptance increases, SAND Coin is expected to become a significant digital asset.

Are Metaverse Coins a Good Investment in 2024?

Since Facebook announced the rebranding of the company to “Meta”, all metaverses have welcomed new investors. According to a recent report by Spherical Insights, the metaverse was a \$50.54 billion industry in 2021 but is expected to reach \$626.65 billion by 2030 — achieving a compound annual growth rate of 45.2%.

Given the growing popularity in this industry, there is no doubt that metaverse coins and NFTs are the keys to the virtual reality of future online platforms. However, given that the industry is still in its early stages, there is a lot of speculation about the emerging player, and that could lead to many uncertainties its future development.

Whether metaverse coins are a good investment in 2024 depends heavily on your risk tolerance and understanding of this new technology. All investors are advised to do their own research before putting any money in any of these metaverse cryptocurrencies.
