Uniswap (UNI) Price Prediction 2024, 2025, 2030 – Will UNI Hit \$100?

DeFi's have come into existence with the premise of no intermediaries. Investors are evaluating digital assets based on their TVL in [DeFi](#), as well as other aspects, indicating the sector's emergence into the mainstream. From its establishment, the UNI has functioned as a highly decentralised and distrustless financial infrastructure.

After demonstrating product-market fit for highly decentralised financial infrastructure, an independent platform has flourished. [UniSwap](#) is now ideally positioned for community-driven expansion, development, and self-sufficiency.

This sector's primary [cryptocurrency](#), Uniswap, strives to increase decentralisation. The UNI native asset of the protocol is actively considered by marketers. You are considering an investment in UNI, but you are uncertain about its future potential. Then, look no further as we decipher the probable Uniswap price prediction for 2024-2025 and beyond!

[TRADE_PLUGIN]UNIUSDT,UNIUSDT[/TRADE_PLUGIN]

Uniswap Coin Price Prediction Summary

The UNI cryptocurrency, issued by Uniswap and distributed via airdrop to platform users and liquidity providers, debuted in September 2020. During the first day of trade, it reached a record low of \$0.4699.

While the cryptocurrency market was booming in 2020, Uniswap fluctuated between \$2.1343 and \$4.18. In May of 2021, it reached its all-time high (ATH) of \$44.97.

As of June 2022, UNI had fallen 88% from its all-time high, reaching \$3.6378.

Over the course of 2022 and 2023, UNI fluctuated between \$4 and \$7.50, with many successful tests of support at \$4.

A possible peak for UNI might be around the beginning of 2024, since the Uniswap token has just broken out of a declining trend on the weekly chart that starts in the middle of 2022.

Year	Low Price	Average Price	High Price
2024	\$6	\$7.40	\$12.35
2025	\$12	\$23	\$52
2030	\$25	\$28	\$32

What is Uniswap (UNI) ?

Uniswap is a [cryptocurrency](#) exchange that operates on a decentralized system and uses distributed ledger technology (DLT) (DEX). The UNI token (also known as Uniswap) serves as the platform's official [cryptocurrency](#).

Designed in September 2020 and debuting on November 2, 2018, it is based on the Ethereum blockchain. The goal is to make trading ERC-20 tokens, which are Ethereum-based assets, as easy as possible (ETH).

Uniswap (UNI) Price Predictions

In the first six months, the median price may exceed \$20 on Uniswap, and by the end of 2023, it may reach \$28. The average price of a UNI coin is expected to remain over \$150 in 2025, and the Uniswap coin might reach a maximum of \$520 in 2030, according to market analysts' projections.

The outlook for Uniswap prices for the next few years is positive, but there are a few caveats to keep in mind.

As was discussed previously, Uniswap plays a significant role in the DeFi segment of the cryptocurrency industry. According to DeFi Llama, Uniswap has one of the highest total values locked on the DeFi platform, at around \$7.53 billion. The amount of [cryptocurrency](#) that is locked on Uniswap is approximately equal to the amount that was locked during the 2021 bull run.

The increased distrust of large financial institutions and the realization that more money can be gained by skipping the intermediary have contributed to the rapid rise in demand for DeFi services. Uniswap is capitalizing on this demand by drawing more and more people to the platform because it is a widely used decentralized exchange (DEX). More people using UNI means more UNI tokens in circulation, which could lead to a rise in price as the tokens become more in demand.

In September of 2020, when the Uniswap network first introduced the UNI token, it declared that

the total number of tokens in circulation will be capped at 1 billion for a period of four years (in other words, until September 2024). The initial year will see 40% of these tokens distributed, with subsequent years seeing annual decreases of 10%.

Sixty percent of the 1 billion UNI tokens were set aside for the Uniswap community on the exchange, twenty-one percent went to Uniswap staff, and the remaining eighteen percent were made available to investors. Since only a fixed amount of UNI tokens are available to buyers, the value of each token is expected to rise over the following four years as supply decreases and demand rises.

The following price projections for Uniswap will aid you in determining whether or not to invest in the currency now.

[TRADE_PLUGIN]UNIUSDT,UNIUSDT[/TRADE_PLUGIN]

Uniswap (UNI) Price Prediction 2024

The Bitcoin Halving will take place in 2024. Nevertheless, it will likely be 2025 before this has any noticeable effects. However, the cryptocurrency markets are preparing for a thrilling year in 2024. According to experts, the approval of a Bitcoin ETF is unlikely to happen until around January 2024.

Also, crypto rules are popping up all over the place, which is great news for developers and investors looking to launch tokens or put their money into the industry.

Uniswap is the leading decentralized exchange (DEX) on all blockchains, and this bodes well for the future of the cryptocurrency market as a whole, thanks to the combination of stricter regulation and more investor interest in cryptocurrencies.

As a last step, let's examine the Uniswap charts for technical indicators:

- Nearing the 200-day MA, the 50-day moving average (MA) on the daily chart has recently passed the 100-day MA.
- Uniswap has recently broken out of a bearish wedge on the weekly chart, which means that price support at \$4 has been tried three times and met with success.

Published on TradingView.com, Nov 24, 2023 09:47 UTC

Consequently, we anticipate a range of \$6-\$12.35, with a median price of \$7.40, for Uniswap in the year 2024.

[TRADE_PLUGIN]UNIUSDT,UNIUSDT[/TRADE_PLUGIN]

Uniswap (UNI) Price Prediction 2025

The reliability of Uniswap coin predictions declines with increasing distance from the future. We can, however, utilize certain occurrences, shifts in attitude, and changes in activity to foretell the Uniswap token price's destiny in the long run.

First, many believe that the impact of the 2024 Bitcoin Halving event will be felt in 2025, and that this is also the year when Bitcoin's price will reach new all-time highs, according to analysts. In the past, similar pattern has been followed by the cryptocurrency market, and numerous cryptocurrencies have likewise achieved new all-time highs.

This, together with Uniswap's position in the DeFi industry, the growing popularity of cryptocurrencies, and the increased exposure of retail and regular investors to DeFi, bodes well for the UNI token in 2025. In light of these advantages, we are predicting an extreme range for the Uniswap price in 2025: \$12 at the low end, \$52 at the high end, and \$23 in the middle.

[TRADE_PLUGIN]UNIUSDT,UNIUSDT[/TRADE_PLUGIN]

Uniswap (UNI) Price Prediction 2030

The 2030 Uniswap cryptocurrency price might change depending on a lot of things. Uniswap is in a prime position to capitalize on the most notable of them, which is the possible broad adoption of DeFi at this stage.

But crypto is evolving so quickly that institutional investors may prefer a different platform, or the

Uniswap DAO may be in serious trouble and the Uniswap token may not be worth much anymore due to its power being concentrated in a small number of hands. By now, the Uniswap DAO may have triumphed over this challenge and possibly used its power to make the UNI token more valuable.

After a Bitcoin halving in 2028, which is anticipated to trigger a bull run in 2029, we can anticipate a decline from these highs in 2030.

Taking everything into account, our Uniswap price forecast for 2030 is significantly more consistent: \$25 low, \$32 high, and \$28 median.

[TRADE_PLUGIN]UNIUSDT,UNIUSDT[/TRADE_PLUGIN]

Is Uniswap (UNI) a Good Investment?

Uniswap is a decentralized exchange for trading [Ethereum](#)-based tokens peer-to-peer. It does not necessitate intermediaries or centralized governance, unlike conventional exchanges.

- Uniswap utilizes an automated market maker system that utilizes smart contracts to establish prices depending on supply and demand.
- With an automated liquidity protocol, customers are able to construct their own liquidity pools. This eliminates the requirement for a centralized order book and offers traders with greater freedom.
- In addition, Uniswap is an open-source exchange, allowing developers to replicate its code and create their own decentralized exchanges.
- Contributing [cryptocurrencies](#) to liquidity pools allows users to earn fees. This is especially beneficial for smaller traders that lack the resources to construct their own liquidity pools.

[TRADE_PLUGIN]UNIUSDT,UNIUSDT[/TRADE_PLUGIN]

Will Uniswap (UNI) Hit \$100?

With its current market price of \$6.65, Uniswap would need to increase by almost 15.1 times to reach \$100.

In addition, the UNI token's value increased by 11,97%, from \$3.6 in December 2020 to \$43.1 in May 2021, a span of just five months. In other words, its rate of growth was 2.39 times faster every month.

Hence, the Uniswap token needs at least seven months to get to the \$100 mark. However, it peaked in 2021, and the market conditions are very different now. So, it seems unlikely that UNI is currently seeing a growth rate of 2.39 times every month.

Given these factors, it is unrealistic to assume that the UNI token's value would rise to \$100 any time soon (as calculated).

[TRADE_PLUGIN]UNIUSDT,UNIUSDT[/TRADE_PLUGIN]

Conclusion

There is little doubt that the Uniswap price predictions for the years 2023 through 2030 are quite bullish. But, there are still a number of red flags that potential investors should be aware of before putting money into UNI.

Scams on Uniswap must be resolved first. This is a major deterrent for would-be traders and may cause authorities to view Uniswap in a less favorable light. In addition, authorities may investigate Uniswap because it effectively permits anyone to tokenize any asset.

Enhancements in technology are another crucial aspect to think about. Despite Uniswap's efforts to catch up by supporting additional blockchains, its chief competitor SushiSwap may be able to swoop in and snare more traders in the years to come. Uniswap, in order to stay in business, must perform better than SushiSwap.

[TRADE_PLUGIN]UNIUSDT,UNIUSDT[/TRADE_PLUGIN]

FAQs

1.Is Uniswap (UNI) A Good Investment?

When looking at the big picture, Uniswap is a solid investment. UNI more than quadrupled in value from its opening price of \$4.7362 at the start of 2017 to its closing price of \$17.07 at the conclusion of the year. When you have faith in Uniswap's reliability as an exchange, you have the best reason to put your money there. The Uniswap network has a well-defined purpose, and the underlying technology appears to be robust enough to support it, as a decentralized alternative to "conventional" bitcoin exchanges.

2.Will Uniswap Expand?

Absolutely, our study of Uniswap indicates that it will continue to grow until 2030, setting multiple new all-time highs along the way. Our Uniswap price algorithm does not foresee UNI collapsing within the next decade.

3.Is Uniswap a secure platform?

As an investment, Uniswap is widely regarded as secure by the crypto community. It is one of the most prominent DEXs and cryptocurrencies. Uniswap's short history and lack of DeFi regulation are the most pressing issues at the moment. Uniswap is not a scam, although scammers do operate on the site, so be cautious!
