What Is Goble (GM)? Everything You Need To Know

Imagine being able to gain tokens with value throughout a developing blockchain ecosystem in addition to in-game points by cooperating with peers in a mobile game. That is the idea behind Goble, a new Web3 gaming platform created by 111%, a South Korean firm with a lengthy history of making mobile games. Goble isn't just another play-to-earn initiative; it's based on a straightforward but effective idea: it rewards teamwork and social engagement in ways that traditional games seldom ever do.

The majority of gaming platforms continue to emphasize high-stakes speculation and individual performance as blockchain technology advances into the industry. Goble provides something unique. While incorporating features that monitor cooperation, squad missions, and group tactics, it introduces well-known, informal gaming experiences into the decentralized environment. This post will provide an overview of Goble, including its airdrop, operation, and potential future investment potential.

What Is Goble (GM)?

The 111% mobile gaming company has over 110 million users across all of its casual game titles on their Web3 gaming platform Goble, or GM. With an emphasis on rewarding players for both individual and team efforts, the project seeks to combine blockchain capabilities with easily

accessible mobile games. Goble adds features that acknowledge and encourage social collaboration, in contrast to the majority of Web3 games that focus on solitary achievements or asset speculation.

Proof of SQUAD (PoSQ) is an on-chain mechanism that captures team-based activities and is key to Goble's philosophy. This encompasses tasks accomplished in conjunction with other players, teamwork, and overall squad effectiveness over time. Players can establish a social identity and a record of their contributions that is transferable throughout the platform's ecosystem through these acts, which are influenceable and verifiable on the blockchain.

Both casual gamers and crypto users will like Goble's framework. As a backend, it offers mobile-first games with familiar controls and interfaces, and it incorporates blockchain features like NFTs, token awards, and on-chain data tracking. Community involvement at Goble has a direct effect on in-game and ecosystem-wide value because of the platform's emphasis on social gameplay and meaningful user interactions. There are more than 3.5 million users on the site as of April 2025, with 2.8 million of them playing at least once a month.

How does Goble (GM) Work

With Goble, a unified ecosystem for social gaming, blockchain features, and developer tools is born:

1. SQUAD Proof (PoSQ)

Proof of SQUAD is the mechanism that Goble use to log on-chain group actions and interactions. Collaborative mission completion validates and stores participant actions as evidence of involvement. These data are important for determining incentives and providing individuals with a social identity that is shaped by their collaboration skills rather than their point total. Teamwork, leadership, and regular participation are highly valued in PoSQ, in contrast to more conventional games that emphasize individual accomplishments.

2. Social Identity Across Games

A player's profile on Goble is viewable across the ecosystem and is built on their squad-based past. Information such as missions completed, team roles, and squad kinds are included. When participants have a distinct social identity, they are better able to compete in subsequent activities. Early access to new features or invitations to unique missions might be given to those who frequently take on a strategic role or contribute regularly, for instance. New avenues for game developers to personalize player experiences are also opened up by this.

3. The Goble Squad

The platform's community layer is the Goble SQUAD feature. Teams can be created or joined, missions can be taken on by groups of players, and rewards can be unlocked by completing them. There are opportunities for squad members to form lasting alliances, share the environment with others, and compete in seasonal challenges. Because of this setup, players are incentivized to be active and come back frequently, which is great for the game, their relationships, and their team's leaderboards.

4. The Platform for Goble Builders

Streamline your game creation and onboarding using Goble Builders, a platform offered by Goble. Tools like analytics dashboards, software development kits (SDKs), AI-based help, and PoSQ user data access are all part of the package. Through Goble's licensing services, developers can also make use of existing game intellectual property. Goble provides a seamless experience for Web2 studios looking to reach a pre-existing audience of Web3 gamers.

5. Focused on Mobile Users with Flair for Blockchain Integration

Everyday gamers will find Goble games more approachable because they are mainly geared for mobile consumers. No prior knowledge of blockchain technology or crypto wallet management is required for players to begin. In the background, blockchain features take care of things like collecting social media data, digital asset ownership, and token usage. This makes using Web3 easier for beginning users while still giving power users access to all of its features.

What Is GM Token?

In the Goble network, the native asset for both utility and governance is the GM token. It integrates activities across games, rewards systems, and community engagement, and drives essential features for both players and developers. The main uses for GM for players include in-game purchases, special content unlocks, and incentives from activities like squad-based staking and team missions. Over time, players can collect GM if they constantly contribute to social gameplay. Access to platform activities and benefits meant for engaged community members are also granted by the token.

General Motors provides developers with access to vital services. You can't onboard new games, pay service fees, perform marketing activations, or access Goble's data backbone without it. The platform also features funding programs and incentive models that developers may take advantage of, and they can use GM to buy things in the marketplace.

One billion GM tokens are available for purchase. Goble has implemented a repurchase and burn mechanism to encourage sustainability and growth in value over the long run. We buy GM off the market and put it out of circulation for good with a cut of the profits from the games and platform services. The goals of this strategy are to stabilize prices, reward holders for the long term who participate actively in the ecosystem, and reduce inflation.

What Is Goble Airdrop?

Everyone who has an MM token, a GOLD role in Discord, is a staker in SpaceKids, has a G-Capsule, or has the \$winG token can participate. Also, depending on their activity history, wallets from certain Web3 gaming communities might be eligible, like Seraph, SuperChamps, and Gods Unchained.

Egibility

Token holders of MM, GOLD, G-Capsule, \$winG, SpaceKids, and Discord with a GOLD role or higher are all eligible to participate. Furthermore, wallets from certain Web3 gaming communities, like Gods Unchained, Seraph, and SuperChamps, might also be eligible depending on their previous participation.

How to Claim the Gumble Airdrop

1. Visit token.gumble.io, the official airdrop website
2. Establish a Web3 wallet connection
3. Your eligibility will be automatically verified by the website.
4. To claim your tokens, if qualified, adhere to the on-screen instructions.
5. Verify the transaction and check your linked wallet for your GM tokens.

Use only official links distributed via Gumble's approved methods. To avoid scams, stay away from unofficial or dubious websites.

Conclusion

With Goble, players can own and benefit from their social interactions, offering a fresh perspective on Web3 gaming. It gives more weight to the friendships and cooperation that contribute to gaming's enjoyment than to high scores or personal statistics. Goble is creating an environment where the way you play with others is actually important, thanks to its expanding ecosystem, passionate community, and token that encourages both participation and play.

Why Choose BTCC?

Founded in 2011, BTCC is among the world's oldest and most reliable bitcoin exchanges. Many traders use BTCC because it has established a solid reputation in the market for security and regulatory compliance over the years. The platform is especially well-suited for traders in North America and Europe, with presences in the US, Canada, and Europe.

In addition to bitcoin trading, BTCC provides traders with access to non-crypto assets including gold, silver, and U.S. equities through cutting-edge features like copy trading, perpetual futures, and tokenized stocks. Both novice and seasoned traders searching for a secure and regulated platform can benefit from BTCC's range of offerings.

The firm's products are designed to meet the needs and desires of both rookie and experienced traders. Here are five reasons for using the exchange:

- Numerous transferable assets
- Excessive trading leverage
- Strong copy trading capabilities
- Perfect security record
- Interface that is easy to use
- Accessible to traders in the US and Canada

[BTCC Bonuses and Special Offers]

(1) [New User Welcome Reward](#): As a new user, you can claim a welcome reward of up

to **10,055** USDT.

(2) **Referral Program**: You can earn up to 35% commission on your referrals, plus up to **10,060** USDT in rebates per referral.

How to Trade Crypto on BTCC?

This brief instruction will assist you in registering for and trading on the BTCC exchange.

Step 1: Register an account

The first step is to hit the “Sign Up” button on the BTCC website or app. Your email address and a strong password are all you need. After completing that, look for a verification email in your inbox. To activate your account, click the link in the email.

Step 2: Finish the KYC

The Know Your Customer (KYC) procedure is the next step after your account is operational. The main goal of this stage is to maintain compliance and security. You must upload identification, such as a passport or driver's license. You'll receive a confirmation email as soon as your documents are validated, so don't worry—it's a quick process.

Step 3. Deposit Funds

After that, adding money to your account is simple. BTCC provides a range of payment options, such as credit cards and bank transfers. To get your money into your trading account, simply choose what works best for you, enter the amount, and then follow the instructions.

- **Fiat Deposit.** Buy USDT using Visa/Mastercard (KYC required).
- **Crypto Deposit.** Transfer crypto from another platform or wallet.

Fund Your Account

I don't have crypto assets

Fiat Deposit

Fund your account with USDT using Visa/Mastercard

P2P

Buy and sell cryptos with flexible payment methods and 0 transaction fees.

I have crypto assets

Crypto Deposit

Get the deposit address for BTC, ETH, or any other crypto and deposit via the blockchain.

Step 4. Start Trading

If you wish to follow profitable traders, you might go for copy trading, futures, or spot trading. After choosing your order type and the cryptocurrency you wish to trade, press the buy or sell button. Managing your portfolio and keeping track of your trades is made simple by the user-friendly

interface.

BTCC FAQs

Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the platform's infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater

security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

Is KYC Necessary for BTCC?

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

Is There a Mobile App for BTCC?

Indeed. For users of iOS and Android, BTCC has a mobile app. The exchange's website offers the mobile app for download. Since both the web version and the mobile app have the same features and capabilities, they are comparable.

Will I Have to Pay BTCC Trading Fees?

Indeed. BTCC levies a fee for trade, just like a lot of other centralised exchanges. Each user's VIP level, which is unlocked according to their available money, determines the different costs. The BTCC website provides information on the charge rates.

Can I Access BTCC From the U.S?

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
