What Is Redacted (RDAC): Everything You Need To Know About It

Redacted, an ecosystem accelerating the next big disruptors of Web3 across different verticals via a user network and data ecosystem, is drawing great attention with its RDAC token launch. Notably, Binance Alpha, the innovative platform by Binance, has announced the launch of Redacted (RDAC) on May 13, 2025, at 10:00 UTC.

This launch marks a significant milestone as RDAC token becomes the first token to be featured on the Binance Alpha platform. In this article, we dive deep into Redacted (RDAC) crypto project, exploring the utility and value proposition of the RDAC token, thus offering insights for both seasoned investors and curious developers looking to explore this unique crypto project.

REDACTED (RDAC) WILL BE ON BINANCE ALPHA

With an exclusive token airdrop for Alpha users who meet the Binance Alpha Points threshold.*

**T&C applies*

DISCLAIMER: Binance Alpha features emerging digital assets which are not listed on the Binance Exchange. The labelling as an Alpha Asset do not imply that such asset will be listed on the Binance Exchange. You may lose all or part of what you invested. Please note that (i) Alpha Assets are exposed to increase price volatility, and therefore higher risks (ii) you are exposed to price slippage and blockchain fees (iii) Alpha Assets cannot be withdrawn from the Binance Exchange. Binance will not be responsible for any losses that you may incur arising from an investment in Binance Alpha Assets.

BTCC, one of the longest-running crypto exchanges in the world, supports crypto demo trading, crypto copy trading, crypto spot trading for 240+ crypto pairs, as well as crypto futures trading for 360+ crypto pairs with a leverage of up to 500X. If you want to start trading cryptocurrencies, you can start by signing up for BTCC.

What is Redacted?

Founded in 2021, Redacted is a platform designed to accelerate startups across multiple industries. These industries include DeFi, AI, gaming, trading, payments, and SocialFi. Redacted is developed to address the biggest problems of the crypto industry: lack of sustainability, constantly changing narratives, and weak tokenomics. However, unlike conventional Web3 projects that focus on only one product or one specific niche, Redacted builds a multi-product Web3 studio model, similar to a “cake factory” where there are always new products that meet the needs of the crypto market at each time.

Instead of focusing on just one area of blockchain technology, Redacted helps grow multiple “metas” (trending sectors) by supporting innovative projects. Backed by big names like Spartan Group, Animoca Brands, Polygon Ventures, Redacted aims to become one of the most influential Web3 entertainment ecosystems, focusing on trends like GameFi, DeFi, SocialFi, AI, NFTFi and trading infrastructure.

[TRADE_PLUGIN]BTCUSDT,BTCUSDT[/TRADE_PLUGIN]

Redacted Ecosystem

At the heart of Redacted is its ecosystem of products, each designed to address specific needs in the Web3 space. Here’s a detailed look at some of the flagship products highlighted on their X page and official communications:

- **Jirasan:** Jirasan is a collection of 10,000 Non-Fungible Token on Ethereum, representing VIP privileges in the Redacted ecosystem.
- **RampX:** RampX is a gasless cross-chain bridging platform that makes blockchain transactions cheaper and easier.
- **iAgent:** iAgent is a pioneering platform that uses visual data (rather than text) to train AI agents for gaming. Users can create, own, and monetize these AI agents, redefining the intersection of AI and GameFi.
- **Mintify:** A fast and efficient platform for trading NFTs and other digital assets, with over \$25 million in trading volume.
- **FlashX:** FlashX is a trading platform integrated with X, boasting over \$18.5M in trading volume. It provides users with tools to execute trades efficiently and capitalize on market opportunities.
- **Maxis:** Maxis is a gasless NFTFi gaming marketplace with over \$96M in total volume. It enables users to trade NFTs and participate in gaming economies without the burden of high transaction fees.
- **Swipoor:** Swipoor is a swipe-powered platform on AbstractChain that allows users to “pick, play, and profit” in real-time.

What is the RDAC Token?

The \$RDAC token serves as the cornerstone of the Redacted ecosystem, functioning as a transactional, utility, and engagement token. Its design prioritizes long-term retention and value appreciation through several mechanisms:

- **Staking Benefits:** Users can stake \$RDAC to elevate their “RDAC Level,” thereby unlocking advantages such as fee reductions, exclusive token airdrops, early access to new products, and premium platform features.
- **Revenue Sharing:** The equity/revenue business model of Redacted channels value back into \$RDAC through buy-backs and rewards. This mechanism ensures that the token reaps benefits from the success of the ecosystem’s offerings.
- **Cross-Pollination:** By incentivizing user activity across multiple products, \$RDAC creates network effects that enhance the ecosystem’s overall value.
- **Airdrop Rewards:** Strategic partnerships—such as those with ThePlagueNFT—include \$RDAC airdrops for community members, promoting engagement and loyalty.

The utility of this token is further amplified by its role in governance and community-driven initiatives, ensuring that holders have a voice in shaping the future of the ecosystem.

RDAC token is not available on BTCC platform at present. However, it is worth mentioning that BTCC, one of the longest-running crypto exchanges in the world, supports trading for 360+ cryptocurrencies with a leverage of up to 500x. If you want to start trading cryptocurrencies, you can start by signing up for BTCC.

RDAC Tokenomics

The total supply of RDAC is 1,000,000,000 Token , which are allocated across two main pools: Fundraising and Project & Team.

Capital

Category	Number of Token	Total supply ratio	% unlocked at TGE	Cliff (month)	Vesting Period (month)
Seed	45,714,286	4.6%	0.46%	3	18
Strategic	110,000,000	11%	1.65%	2	12
Private	41,666,667	4.2%	0.83%	1	9
Public	42,857,143	4.3%	1.41%	1	2

Project & Team

Category	Number of Token	Total supply ratio	% unlocked at TGE	Cliff (month)	Vesting Period (month)
Ecosystem	269,761,905	27%	0%	3	45
Community	250,000,000	25%	6.75%	3	24
Contributors	130,000,000	13%	0%	12	36
Advisors	50,000,000	5%	0%	6	36
Liquidity	60,000,000	6%	100%	0	0

Total unlocked at TGE: 11.10% of total Token supply.

Redacted (RDAC) Airdrop

The RDAC token has officially launched with an airdrop scheduled for 10:00 UTC on May 13, 2025. Binance Alpha, the innovative platform developed by Binance, has announced the introduction of Redacted (RDAC) at this time. To celebrate the launch, Binance is conducting an airdrop of RDAC tokens to eligible users.

Eligible Binance users who possess at least 205 Alpha points can claim an airdrop of 482 RDAC tokens on the Alpha Event page starting at 10:00 UTC on May 13, 2025. Additionally, users with between 170 and 204 Alpha points whose UID (Binance account UID) ends in '7' are also entitled to participate in a lucky draw for the same amount of tokens beginning at the same time.

This airdrop aims to reward early adopters and foster engagement within the Binance Alpha ecosystem. The airdrop is planned to occur within ten minutes after trading commences, creating an atmosphere of excitement and urgency for user participation on the platform. It is important to note that these airdropped tokens must be claimed within the first twenty-four hours following their availability; otherwise, they will expire. To claim the Binance airdrop, the users will have to spend 15 Alpha points.

A narrow claim window is affecting the RDAC token price. Experts remain divided on its further performance due to airdrop influence volatility, low liquidity, and token movements, and suggest that investors must remain cautious for some time.

Redacted (RDAC) Price Analysis & Prediction

The RDAC token officially launched with an airdrop at 10:00 UTC on May 13, 2025. Despite being listed on several major exchanges — including Bitget, MEXC, and others — typically a bullish indicator, the token's price performance has been unexpectedly bearish.

After briefly surging to an all-time high of \$0.1018, the price of RDAC plummeted by more than 50% within the hour. At the time of writing, RDAC is trading at \$0.04979, with a market capitalization of approximately \$9.81 million.

The following sets forth the RDAC to USD Chart (RDAC)

[Redacted Price](#)

The sharp decline can largely be attributed to excessive buying activity from investors anticipating further rallies, which pushed the token into overbought territory, triggering a rapid correction.

Additionally, the Binance airdrop is another factor to consider. Most crypto airdrops bring high volatility due to the movement of tokens and sellers' activity, resulting in a crash.

According to analysts' forecasts, the short-term price target for RDAC could range from \$0.15 to

\$0.25, representing a 2x to 3.5x profit based on user demand and airdrop hype. Looking ahead, the long-term price trajectory of RDAC will depend heavily on real-world utility, ecosystem development, and sustained community engagement. If the project successfully executes its roadmap and maintains strong activity on the Base chain, a price target in the range of \$0.50 to \$1.00 over the next 12 to 24 months could be within reach. However, further growth will ultimately hinge on consistent demand, meaningful adoption, and market openness.

How to Buy the RDAC Token?

At present, RDAC tokens have secured listing on Binance, Bitget, MEXC, etc., where interested investors can trade this token by following these steps:

- Register and complete KYC verification.
- Deposit in USDT or other support currency.
- Search for “RDAC”, select a pair and place an order.

Unfortunately, \$RDAC token is not available on BTCC platform at present. However, it is worth mentioning that BTCC, one of the longest-running crypto exchanges in the world, supports trading for 360+ cryptocurrencies with a leverage of up to 500x. If you want to start trading cryptocurrencies, you can start by signing up for BTCC.

Conclusion

Redacted (\$RDAC) transcends the realm of cryptocurrency; it embodies a vision for a sustainable and interconnected Web3 ecosystem. By consolidating revenue-generating products under a single token, Redacted effectively addresses the industry’s sustainability challenges while delivering tangible value to its users. Its innovative offerings—ranging from RampX’s gasless chain abstraction to iAgent’s AI-driven gaming—demonstrate a steadfast commitment to pushing boundaries.

With a well-defined roadmap, robust community support, solid financial backing, and a sustainable development strategy, Redacted is poised to emerge as one of the most prominent Web3 ecosystems during the 2025–2026 period. This evolution promises numerous opportunities for both \$RDAC holders and long-term investors alike. For those looking to engage with this initiative, Redacted presents an enticing opportunity to join a network designed for visionaries, builders, and disruptors.

Nevertheless, potential risks associated with Redacted include the simultaneous management and development of multiple products alongside the inherent volatility of the Web3 market and increasingly stringent regulatory requirements. All investors are strongly encouraged to conduct thorough research and remain well-informed before making any investment decisions regarding Redacted (RDAC).
