\$ULTI is a functional multi-utility token which will be used as the medium of exchange between participants on Ultiverse in a decentralised manner. The goal of introducing \$ULTI is to provide a convenient and secure mode of payment and settlement between participants who interact within the ecosystem on Ultiverse without any intermediaries such as centralised third party entity/institution/credit.

Further, \$ULTI provides the economic incentives which will be distributed to encourage users to exert efforts towards contribution and participation in the ecosystem on Ultiverse, thereby creating a mutually beneficial system where every participant is fairly compensated for its efforts.

The economic model of \$ULTI revolves around the dynamic interaction between Ultiverse, Micro Worlds, and Players.

[TRADE_PLUGIN]ULTIUSDT,ULTIUSDT[/TRADE_PLUGIN]

ULTI Utility

The \$ULTI token assumes a multifaceted role in the Ultiverse ecosystem, encompassing utility, governance, and economic aspects.

- **Transaction:** Micro Worlds leverage \$ULTI to compensate Ultiverse for the integration of decentralized applications (DApps), establishing the token as the primary currency for transactions. This dynamic utilization fosters diverse and enriched digital experiences within the ecosystem.
- **Governance:** \$ULTI holders wield governance rights, enabling them to actively participate in decision-making processes. Token holders can contribute to voting sessions, influencing the overall strategic direction and development focus, including certain parameters such as allocation of ULTI that Ultiverse receives from Micro Worlds. This governance mechanism empowers the community, allowing them to shape the distribution of rewards and contribute to the platform's evolution.
- **Economic:** As the native platform currency, \$ULTI serves as the means by which players can acquire game assets from Micro Worlds. This feature enhances the economic role of the token, facilitating seamless transactions within the Ultiverse ecosystem and providing players with a direct pathway to enhance their in-game experiences. For example, when users are lack of time, they can also pay a certain amount of \$ULTI tokens to allow Ultiverse to deploy their Ulti-Pilots to various Micro Worlds to experience games and thereby earn rewards specific to those Micro Worlds.
- **Active participant rewards:** \$ULTI would be distributed as the incentives for users to participate in and engage with various aspects of the ecosystem. The reward system would take into account various aspects of ecosystem participation, for example users earning profits from item trading, participation in different micro worlds, creating and participating in a team within the Ultiverse ecosystem, holding collections such as Electric Sheep (ES), or participating and completing quests on the Quest Platform.
- **Data and training:** Users which utilise products on Ultiverse would generate data that helps

Ultiverse train their Ulti-Pilots, thereby earning rewards in \$ULTI tokens.
