Where to Buy Pi Crypto in 2025: Safe Platforms, Tips & Complete Guide

The Pi Network has taken the crypto world by storm, amassing over 47 million users worldwide through its mobile-first mining model. With growing interest in Web3, NFTs, and decentralized economies, more and more people are asking: "Where can I buy Pi crypto?"

Unfortunately, the answer isn't as simple as searching on Binance or Coinbase.

This comprehensive guide will answer:

What Is Pi Crypto? A Quick Overview

Before buying Pi, it's essential to understand what it is:

- Pi Network (PI) is a cryptocurrency project that lets users mine coins via mobile app without using energy-intensive processes.
- It uses the Stellar Consensus Protocol (SCP).
- Its goal is to create a peer-to-peer decentralized ecosystem where users can use Pi for payments, services, and digital products.

As of July 2025, Pi is in the Enclosed Mainnet phase, which means:

- Coins cannot be withdrawn to external wallets.
- Users cannot officially sell or buy Pi on most centralized exchanges (CEXs).
- Only IOU-based tokens are currently tradeable on a few platforms.

Is Pi Coin Listed on Major Crypto Exchanges?

Not Yet — Here's Why

Pi Network is not officially listed on major crypto exchanges such as:

- Binance
- Coinbase
- Kraken
- KuCoin
- OKX

These platforms require public mainnet launch, developer documentation, and regulatory clarity before listing any token.

However, this hasn't stopped some smaller exchanges from offering speculative Pi trading via IOU contracts.

Where to Buy Pi Crypto in 2025? (Legit Platforms & Warnings)

Let's break down the realistic options where Pi can be "bought" right now, and what each means for buyers.

1. HTX (formerly Huobi) - IOU Trading

- Type: IOU (I Owe You) token, not the actual Pi Network token
- Trading Pairs: PI/USDT
- Price (as of July 2025): ~\$38.50
- KYC Required: Yes
- Withdrawable: No — only speculative contracts

Pros:

- High liquidity
- Easy sign-up
- Mobile and desktop trading

Cons:

- You're not buying real Pi from the app
- Cannot transfer to Pi Wallet
- Could be delisted without notice

2. XT.COM - Unofficial Market

- Type: IOU token
- Listed Since: December 2022
- Pairs: PI/USDT, PI/ETH

Pros:

- Beginner-friendly UI
- API and bot trading options

Cons:

- Unverified Pi token
- No guarantee of token conversion after open mainnet

Pi Network Peer-to-Peer (P2P) Marketplaces - Risky but Possible

Some users claim to trade Pi in informal P2P setups via:

- Telegram channels
- Discord servers
- Local WhatsApp groups
- Facebook Pi trading communities

Warning:

- Many of these are fraudulent or scams
- You cannot transfer Pi tokens freely until KYC is passed and mainnet is open
- Always use escrow if attempting P2P (not recommended)

Not Yet Available On:

- Binance
- Coinbase
- Bybit
- Gemini
- Crypto.com

Any claim that Pi is available on these platforms is false or clickbait. Always verify on official exchange websites.

What's the Difference Between Pi Coin and Pi IOU?

Feature	Real Pi (Mainnet)	IOU Token (Exchanges)
Backed by Pi Network?	<input type="checkbox"/> Yes	No
Transferable to wallet?	Not yet	No
Tradeable on DEX?	No	No
Tradeable on CEX?	Not officially	<input type="checkbox"/> Via IOUs
Real ownership?	<input type="checkbox"/> Once open mainnet	Only price speculation

If you want to own real Pi, the only way as of now is by:

- 1.Mining via the Pi app
- 2.Completing KYC
- 3.Waiting for open mainnet launch

How to Buy Pi Coin Safely: Step-by-Step Guide (Once Available)

While Pi is not fully tradeable yet, here's what you'll likely need to do once mainnet opens:

Step 1: Download the Pi Network App

Available on Google Play or App Store.

Step 2: Complete KYC Verification

Use your ID and facial recognition to unlock your coins.

Step 3: Wait for Open Mainnet Launch

Expected in late 2025 or early 2026.

Step 4: Transfer Pi to Your Wallet (Pi Browser)

Use the Pi Wallet on the Pi Browser to move coins out of your in-app balance.

Step 5: Buy Pi from Exchanges (Once Listed)

Look for:

- PI/USDT
- PI/ETH
- PI/BNB

on verified exchanges like Binance or OKX.

Future Exchanges Likely to List Pi Network Coin

While there is no official confirmation, these exchanges are rumored or expected to list Pi after open mainnet:

Exchange	Likelihood	Reason
Binance	High	Pi's massive user base & low-energy model
OKX	Medium	Listed IOU tokens before
KuCoin	Medium	Often supports new L1 blockchains
Coinbase	Low to Medium	Conservative listing policies
MEXC	High	Supports many new tokens early

How Much Pi Should You Buy?

Pi is still a speculative asset. If you're considering investing when it becomes tradeable:

Best Practice:

- Start with a small test amount (e.g., \$100)
- Only buy from verified exchanges
- Don't trust shady P2P deals
- Follow official announcements on Pi's Twitter or website

Frequently Asked Questions (FAQs)

Can I buy real Pi coin right now?

No. The real Pi coin cannot be traded or withdrawn yet. Only IOU-based speculative tokens are available on a few centralized exchanges.

Is Pi crypto available on Binance or Coinbase?

Not yet. Pi Network has not been officially listed on any major exchanges. Listings may occur after open mainnet.

What is the price of Pi crypto today?

On IOU markets like HTX or XT.com, the price is around \$38-\$40, but this is not the real value of the official Pi token.

Can I buy Pi with USDT?

Yes — but only IOU versions on platforms like HTX or XT.com. You cannot use USDT to buy real Pi from the Pi app yet.

When will I be able to sell my Pi tokens?

Once the open mainnet launches and KYC is complete, users will likely be able to trade Pi officially.

Expert Opinions on Pi Trading

Crypto Analysts

"Pi Network's scale is unprecedented, but until the mainnet opens, all trading is speculative."

Pi Core Team (Official Blog)

“We do not recognize any IOU token trading on exchanges. Only the real Pi on the enclosed mainnet is valid.”

Crypto YouTuber CoinBureau

“If Pi succeeds in its goal, it could be one of the most democratic and accessible currencies in the world.”

Final Thoughts: Should You Buy Pi Crypto Now or Wait?

So, where can you buy Pi crypto today? Technically, nowhere safely — yet.

- All current Pi trades are IOUs, not real token exchanges.
- Real Pi coins are still locked within the enclosed mainnet.
- Only after KYC and open mainnet launch will true Pi trading begin.

If You Want to Own Real Pi:

- Use the official Pi Network app
- Complete KYC verification
- Wait for open mainnet and exchange listings

Avoid:

- Unverified exchanges
- P2P scams
- “Too good to be true” airdrops or giveaways

Summary Table: Where to Buy Pi Coin in 2025

Platform	Type	Buy Real Pi?	Risk Level	Notes
HTX/XT.COM	IOU	❑ No	⚠ Medium Risk	Trading IOUs, not real Pi
Binance	Not listed	❑ No	❑ Safe	Pi not available
Coinbase	Not listed	❑ No	❑ Safe	Pi not available
Pi App	Earn only	❑ Yes	❑ Safe	In-app earning only
P2P Groups	Informal trading	⚠ Possible	❑ Risky	No official protection

How to Trade Crypto on BTCC?

This brief instruction will assist you in registering for and trading on the BTCC exchange.

Step 1: Register an account

The first step is to hit the “Sign Up” button on the BTCC website or app. Your email address and a strong password are all you need. After completing that, look for a verification email in your inbox. To activate your account, click the link in the email.

Step 2: Finish the KYC

The Know Your Customer (KYC) procedure is the next step after your account is operational. The main goal of this stage is to maintain compliance and security. You must upload identification, such as a passport or driver's license. You'll receive a confirmation email as soon as your documents are validated, so don't worry—it's a quick process.

Step 3. Deposit Funds

After that, adding money to your account is simple. BTCC provides a range of payment options, such as credit cards and bank transfers. To get your money into your trading account, simply choose what works best for you, enter the amount, and then follow the instructions.

- **Fiat Deposit.** Buy USDT using Visa/Mastercard (KYC required).
- **Crypto Deposit.** Transfer crypto from another platform or wallet.

Fund Your Account

I don't have crypto assets

Fiat Deposit

Fund your account with USDT using
Visa/Mastercard

P2P

Buy and sell cryptos with flexible payment
methods and 0 transaction fees.

I have crypto assets

Crypto Deposit

Get the deposit address for BTC,ETH,or any
other crypto and deposit via the blockchain.

Step 4. Start Trading

If you wish to follow profitable traders, you might go for copy trading, futures, or spot trading. After choosing your order type and the cryptocurrency you wish to trade, press the buy or sell button. Managing your portfolio and keeping track of your trades is made simple by the user-friendly interface.

BTCC FAQs

Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the platform's infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

Is KYC Necessary for BTCC?

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

Is There a Mobile App for BTCC?

Indeed. For users of iOS and Android, BTCC has a mobile app. The exchange's website offers the mobile app for download. Since both the web version and the mobile app have the same features and capabilities, they are comparable.

Will I Have to Pay BTCC Trading Fees?

Indeed. BTCC levies a fee for trade, just like a lot of other centralised exchanges. Each user's VIP level, which is unlocked according to their available money, determines the different costs. The BTCC website provides information on the charge rates.

Can I Access BTCC From the U.S?

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
