About TiFi Token (TIFI)

TiFi token (TIFI) is an innovative decentralized [crypto](#) token that builds the solution for allverse finance – the finance ecosystem for the domain that unites metaverse and universe. It introduced a new solution to the cryptocurrency world that stimulates people to use TIFI for trade, exchange and investment across the [metaverse](#) and universe.

TiFi pronounces as /'taɪfaɪ/, which is short for “The Integrated Finance”. The goal of the TiFi project is to build an ecosystem that unites Metaverse and Universe. The ecosystem includes [DEX](#), [NFT](#) platform and mobile app which is used for crypto trading, merchandise purchase and exchange.

The token is running on Binance Smart Chain (BSC) and provides several attractive features that encourage people to invest and trade with the token itself, and also make TIFI a great wealth generator.

Token-back reward is the most innovative feature of TIFI. It stimulates token holders to use TIFI purchase merchandise by providing “token reward” back to consumers, which functions similar to cash reward credit cards.

Besides token-back reward, all token holders can earn reflection as holding interests. Reflection is a way to reward cryptocurrency holders without staking. The token rewards are reflected in real time as the balance of the holder’s wallet for every transaction happens. The amount of the reflection reward is calculated based on the transaction volume and amount of tokens the holder owns.

TIFI is an anti-inflation cryptocurrency. The decentralized smart contract of TIFI burns tokens automatically by subtracting a tiny portion from total supply whenever a transaction happens. Meanwhile, the reflection reward and future staking interests are taken from a small portion of transaction fee, so the total supply of TIFI will never grow while every token holder earns.
